THE ONE-PAGE READ

Executive Summary

TATASTEEL — Tata Steel

Cheap vs JSW Steel, expensive vs SAIL (P/E premium reflects private-sector execution vs PSU discount)

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
46/100	Metals & Mining	Rs 183.00	MIXED SIGNAL

- 32.94% promoter ownership limits free float and ties the stock to government/public-sector capex cycles.
- Brokerage views are sharply split — bull cases point to order-book strength, bear cases to valuation and a maturing thermal-power cycle (see Section 5).

This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

Key Statistics

CURRENT PRICE	REPORT DATE	INSIGHT SCORE	MARKET CAP
Rs 183.00	September 2026	46/100	Rs 228,449 Cr

Valuation Verdict: Cheap vs JSW Steel, expensive vs SAIL (P/E premium reflects private-sector execution vs PSU discount) · **Model Read:** MIXED SIGNAL (weakest peer ROE, and a key UK green-steel project just slipped a year)

52-Week Trading Range

Low: Rs 160.00

High: Rs 224.00

Now: Rs 183.00 (36%)

KEY TAKEAWAY › TATASTEEL trades at Rs 183.00, 36% of the way up its 52-week range (Rs 160.00-Rs 224.00) — Insight Score 46/100, flagged Cheap vs JSW Steel, expensive vs SAIL (P/E premium reflects private-sector execution vs PSU discount).

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Metals & Mining	Metals & Mining	Nifty 200	INE081A01020

Tata Steel Ltd.

Founded 1907 — Asia's first integrated private steel company, with operations spanning mining, processing and manufacturing across India, the UK and Europe.

- **India — Flat Products**
- **India — Long Products**
- **Tata Steel UK (Port Talbot)**
- **Tata Steel Netherlands (IJmuiden)**

A full company profile, shareholding pattern, segment breakdown and industry context follow in Section 2 of this report.

SECTION 2

Company, Industry & Leadership

- Company Profile
- Shareholding Pattern
- Industry Context — Market Sizing
- Industry Context — Competitive Landscape
- Leadership
- Recent News

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
119 years	Mumbai, Maharashtra, India	4	Nifty 200

OWNERSHIP

Tata Steel is part of the Tata Group, with promoter entities (Tata Sons and affiliates) holding 32.94% of the company -- a notably lower promoter stake than most other Tata Group listed companies. Domestic Institutional Investors hold about 26.4%, Foreign Institutional Investors about 18.9%, and the public roughly 21.5%, making Tata Steel one of the more widely-held Tata Group stocks.

OPERATIONS

Asia's first integrated private steel company, with operations spanning mining, processing and manufacturing across India, the UK and Europe

Sources: Screener.in

KEY TAKEAWAY › Tata Steel's defining strategic project right now is the decarbonization of its UK operations -- a GBP 1.25 billion electric arc furnace (EAF) at Port Talbot, backed by GBP 500 million in UK government support, meant to cut site-level CO_2 emissions by roughly 90%. The furnace itself remains on track for 2028, but as covered in this deck's Recent News section, the electricity infrastructure needed to actually run it won't be ready until 2029 -- a reminder that large industrial transitions carry execution risk well beyond the company's own control.

Shareholding Pattern

Promoter (Tata Sons & affiliates)	32.94%
DII (Domestic Institutions)	26.44%
FII (Foreign Institutions)	18.90%
Public / Retail / Govt	21.70%

Key Named Investors

Investor	Holding	Note
Tata Sons Pvt Ltd & affiliates	32.94%	Promoter -- Tata Group holding structure
Life Insurance Corporation of India (LIC)	~8.0%	Largest named domestic institutional holder
SBI Mutual Fund (aggregated)	~3.5%	Aggregated across multiple actively-managed schemes
Government of Singapore / GIC	~1.3%	Sovereign wealth investor with a long-standing Tata Steel position

Sources: Screener.in

KEY TAKEAWAY › At just 32.94%, Tata Steel has one of the lowest promoter holdings of any major Tata Group company -- leaving nearly 70% of the float in institutional and public hands, which can make the stock more sensitive to broad institutional flow shifts than more tightly-held Tata Group peers like TCS.

Industry Context

Tata Steel competes in India's integrated steel sector against JSW Steel and state-owned Steel Authority of India (SAIL), among others. FY26 has been a year of continued capacity expansion and decarbonization investment across the sector, with global steel prices remaining volatile amid Chinese export competition. Tata Steel's UK arm (Port Talbot) is mid-transition from traditional blast-furnace steelmaking to a lower-emission electric arc furnace model, a multi-year, multi-billion-pound project being closely watched as a template for how legacy Western steel plants can decarbonize.

Sources: Business Standard — Port Talbot EAF Delay

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. BHEL
JSW Steel	Premium peer, weaker ROE	Trades at the group's highest P/E (26.4x) despite the lowest ROE (10.2%) of the three -- the market paying up for JSW's aggressive domestic capacity-growth track record.
Steel Authority of India (SAIL)	PSU discount peer	The cheapest of the group at 16.8x P/E, reflecting both its state-ownership discount and a weak 6.43% ROE -- though the stock has risen over 51% in the past year on capacity-expansion optimism.

Sources: Screener.in

KEY TAKEAWAY › Tata Steel sits between its two domestic peers on both valuation and ROE, which is a reasonably typical position for it historically. The wildcard specific to Tata Steel -- and not shared by JSW Steel or SAIL, both purely domestic players -- is its large UK and Netherlands operations, which add both geographic diversification and the decarbonization execution risk discussed above.

BOARD & SENIOR MANAGEMENT ROSTER

Leadership

Global CEO & Managing Director	T V Narendran

We show only board/leadership roles that are officially disclosed; we do not have shareholding cap-table detail beyond what's publicly filed.

Sources: Business Standard — EAF Project Update

2 ITEMS, MOST RECENT FIRST

Recent News

August 2, 2026

Tata Steel UK: electricity access for EAF project now expected by 2029, not 2028

CEO T V Narendran confirmed the GBP 1.25bn Port Talbot furnace will be physically ready in 2028, but National Grid's power infrastructure build-out pushes full operational start to 2029.

Business Standard — source

2026

Tata Steel UK begins construction of Port Talbot electric arc furnace

Construction is underway on the 3.2 million-tonne facility, expected to cut site-level CO_2 emissions by roughly 90% (about 5 million tonnes annually) once operational.

The Chemical Engineer — source

KEY TAKEAWAY › The Port Talbot story this year is one of steady physical progress paired with an external infrastructure bottleneck -- a useful reminder that a company hitting its own construction milestones doesn't guarantee the surrounding ecosystem (grid capacity, in this case) keeps pace on the same timeline.

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
19.3x	2.2x	11.7%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 5 years)

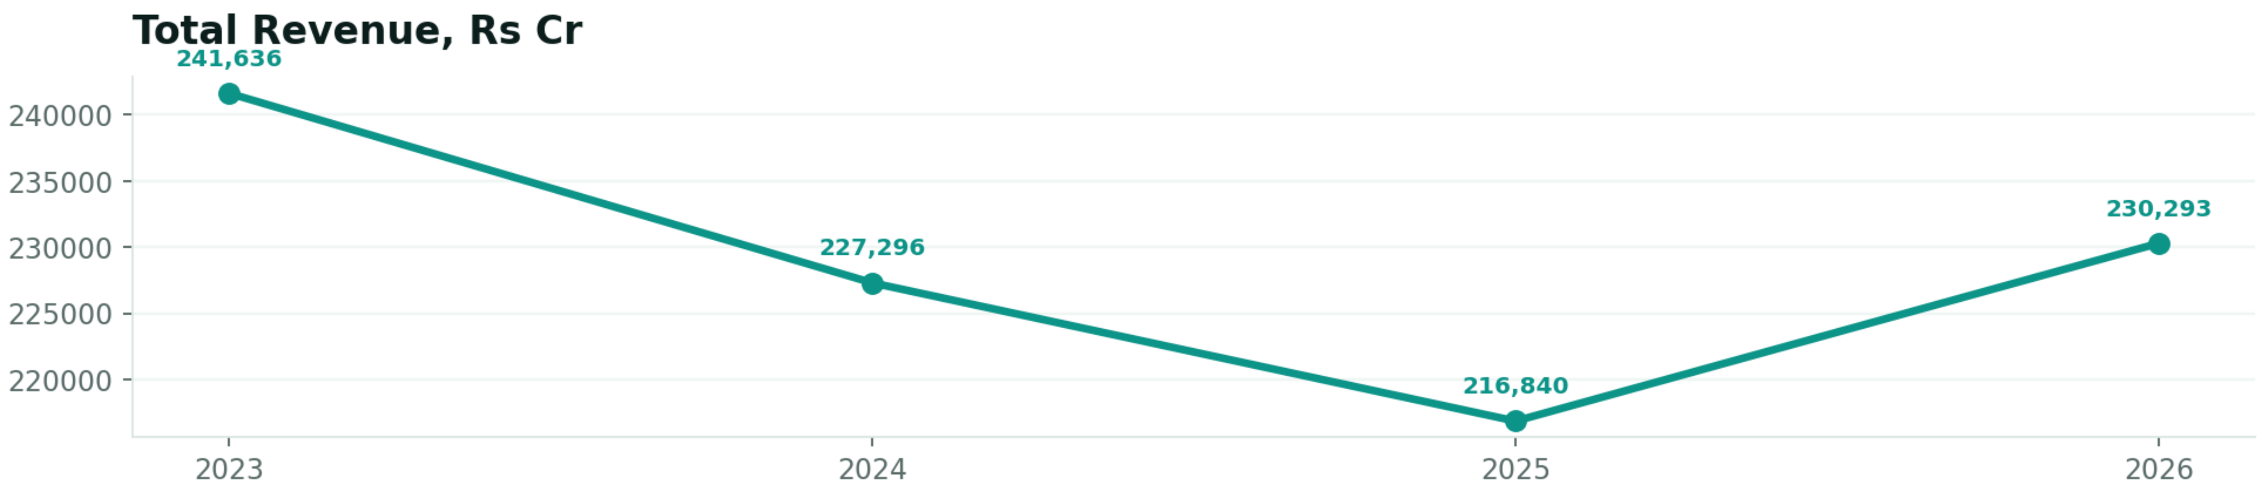
Metric (Rs Cr)	FY2022	FY2023	FY2024	FY2025	FY2026
Total Revenue	—	241,636	227,296	216,840	230,293
Net Income	—	8,760	-4,437	3,421	10,794
EBITDA	—	33,875	16,249	26,180	35,093
Total Debt	—	84,893	87,082	94,801	92,382
Stockholders Equity	—	103,082	92,036	91,170	102,168
Free Cash Flow	—	7,541	2,094	7,467	20,505
ROE	—	8.5%	-4.8%	3.8%	10.6%

Year-over-year growth

YoY Growth	FY2023	FY2024	FY2025	FY2026
Revenue Growth	—	-5.9%	-4.6%	+6.2%
Net Income Growth	—	-150.7%	+177.1%	+215.6%

FINANCIAL TREND ANALYSIS 1 OF 4

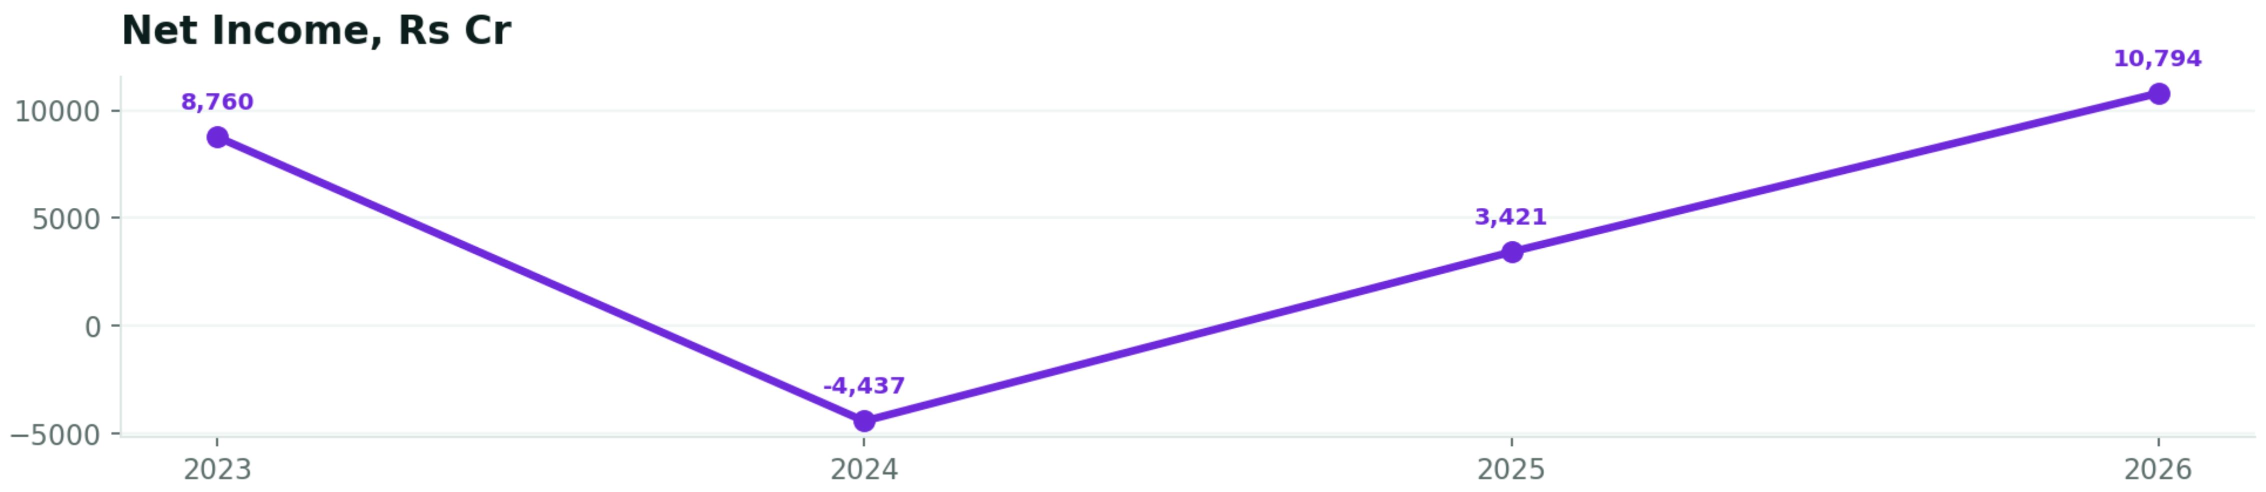
Revenue Trend



KEY TAKEAWAY › TATASTEEL's revenue trend over FY2022-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

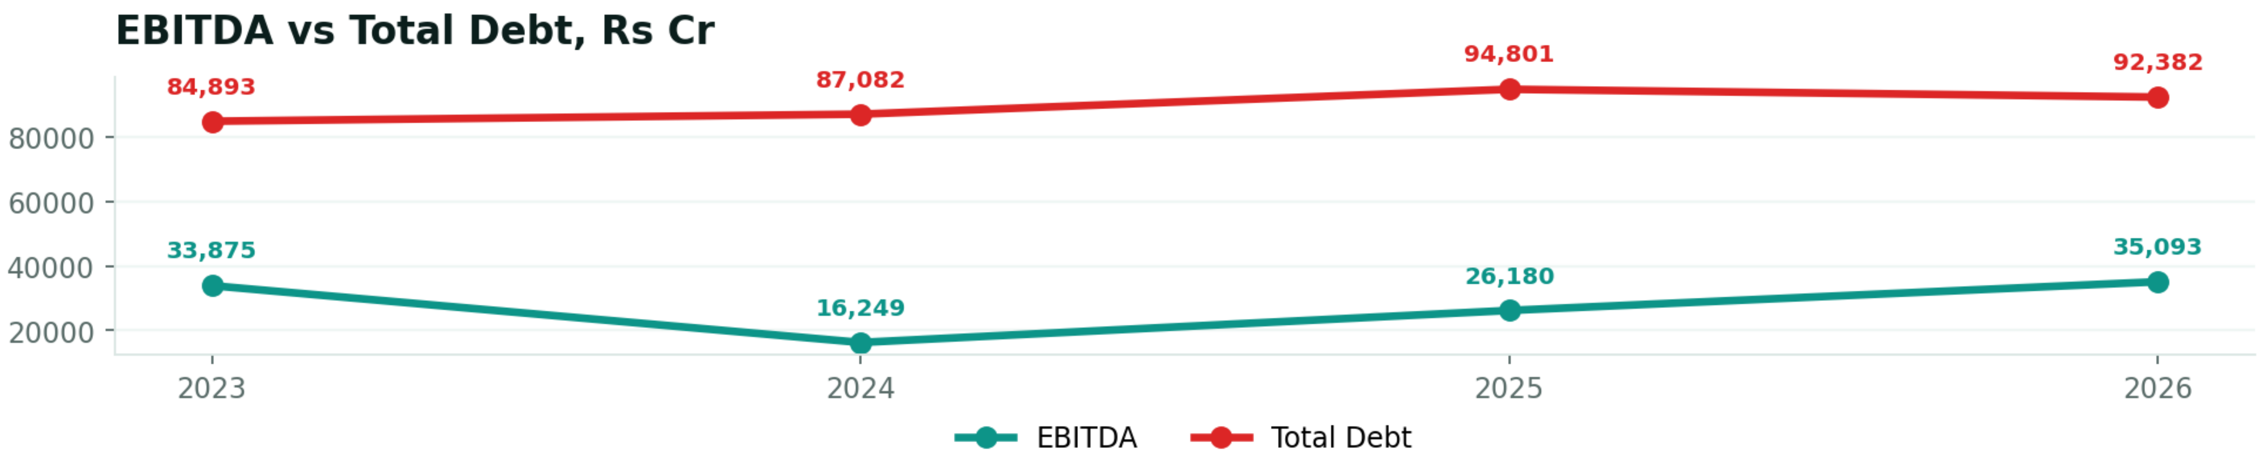


- Net margin moved from 3.6% in FY2022 to 4.7% in FY2026 — expanding profitability on each rupee of revenue.
- Profit dipped in FY2024 (Rs -4,437 Cr) before recovering — a single weak year rather than a multi-year decline.

KEY TAKEAWAY › Net Income for TATASTEEL across FY2022-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage



- EBITDA margin moved from 14.0% to 15.2% over the period — a genuine improvement in core operating efficiency.
- At the latest EBITDA of Rs 35,093 Cr against Rs 92,382 Cr of debt, it would take roughly 2.6 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for TATASTEEL — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 8.5% to 10.6% over FY2022-FY2026 — a meaningful improvement in how efficiently shareholder capital is being turned into profit.
- Average ROE across the 4 years shown was 4.5% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › TATASTEEL's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2022	FY2023	FY2024	FY2025	FY2026
Net Income	—	3.6%	-2.0%	1.6%	4.7%
EBITDA	—	14.0%	7.1%	12.1%	15.2%
Total Debt	—	35.1%	38.3%	43.7%	40.1%
Stockholders Equity	—	42.7%	40.5%	42.0%	44.4%
Total Assets	—	119.2%	120.3%	128.8%	130.8%
Operating Cash Flow	—	9.0%	8.9%	10.7%	15.2%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

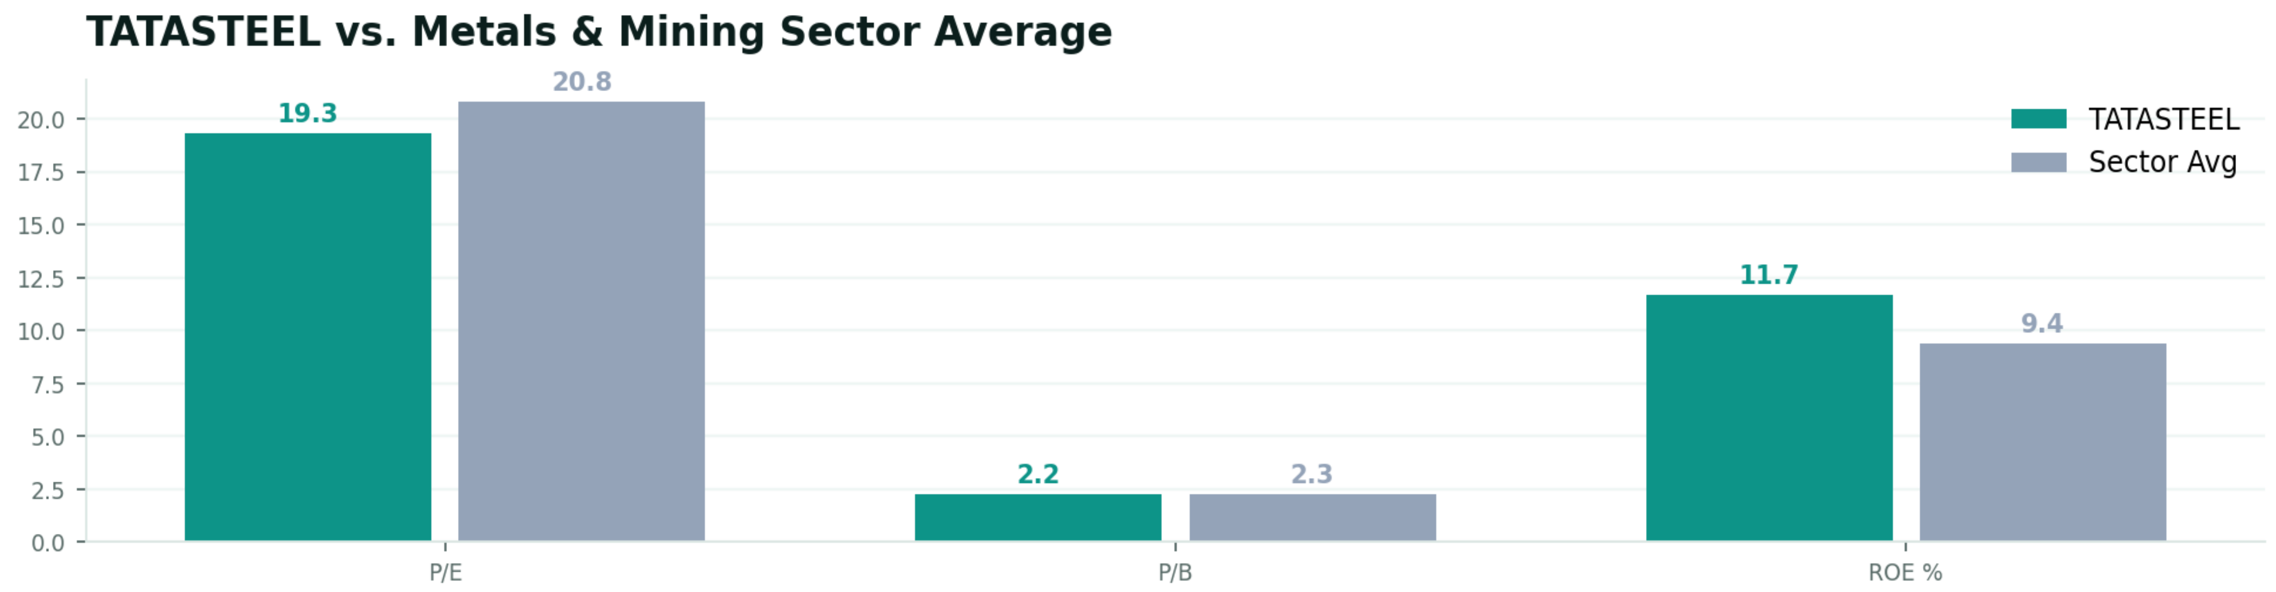
SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Metals & Mining



KEY TAKEAWAY › TATASTEEL's P/E is 7% below its sector average — trading at a discount, which can mean overlooked value or a real, priced-in problem.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

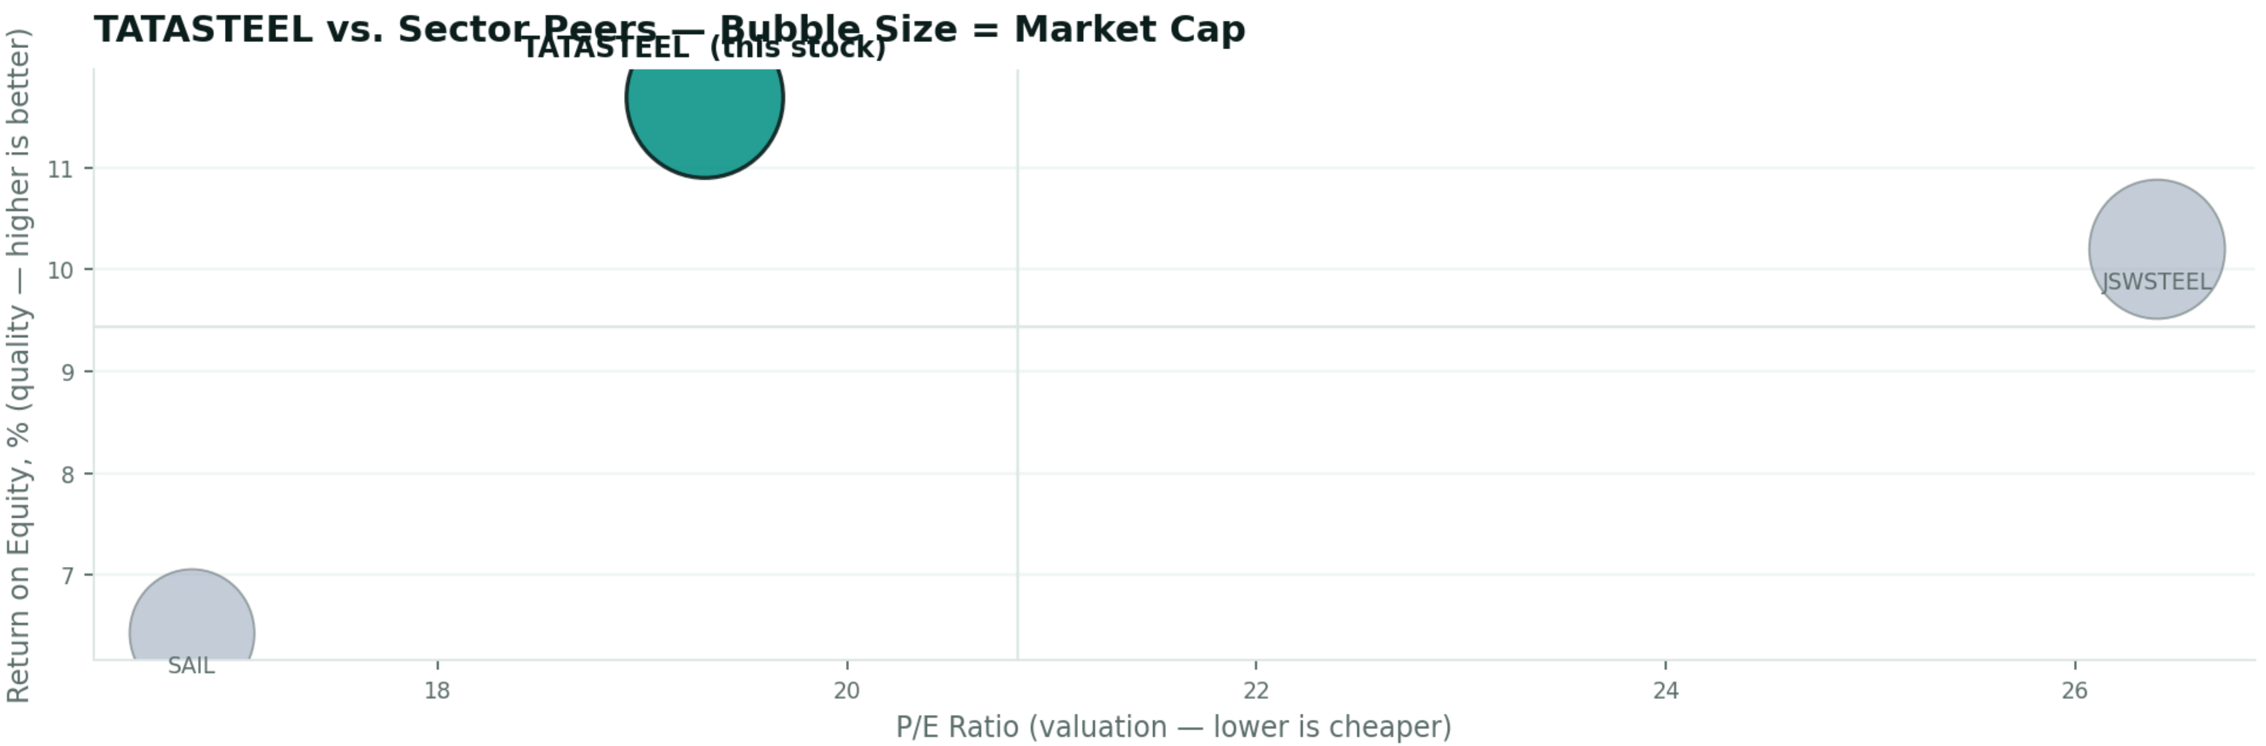
Company	P/E	P/B	ROE	Mkt Cap (Cr)
TATASTEEL (this stock)	19.3	2.2	11.7%	228,449
JSWSTEEL	26.4	3.2	10.2%	318,398
SAIL	16.8	1.3	6.43%	81,165

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 2 largest sector peers, JSWSTEEL has the highest ROE (10.2%) vs TATASTEEL's 11.7% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

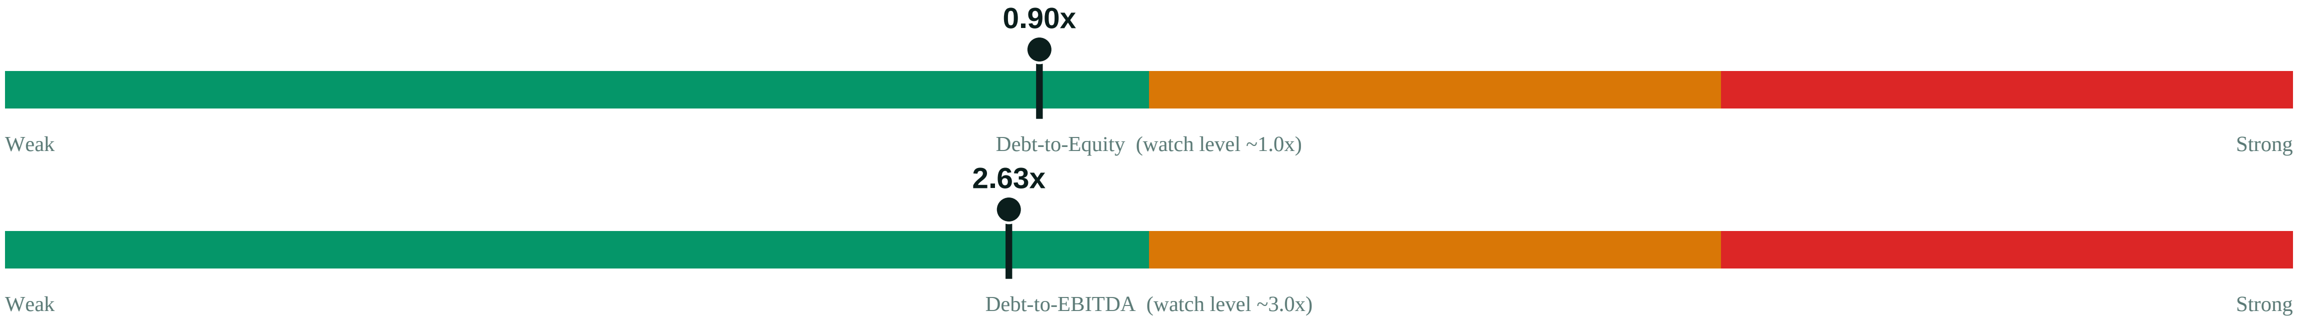
Peer Positioning Map



KEY TAKEAWAY › TATASTEEL sits in the quadrant that is cheap and high-quality — often the most interesting quadrant, worth checking why the market hasn't re-rated it, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios



Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

KEY TAKEAWAY › Debt-to-Equity of 0.90x is below the ~1x watch level — leverage looks manageable on this measure alone.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

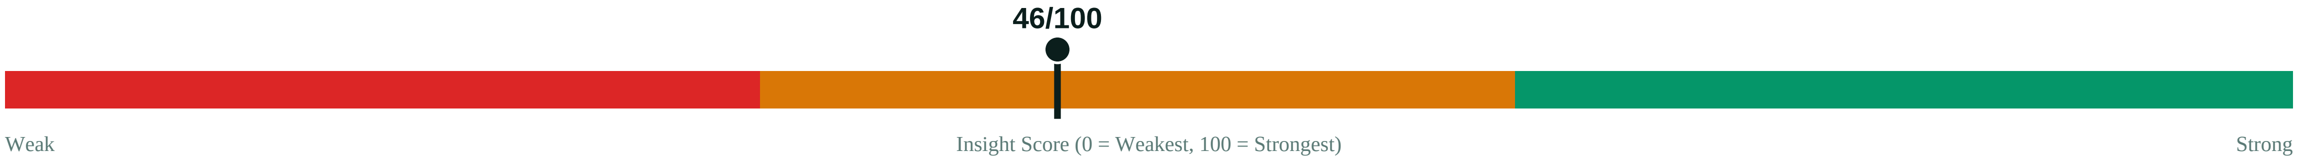
STEP 1	STEP 2	STEP 3	STEP 4
STOCK'S OWN MULTIPLES	SECTOR PEER MEDIAN	PREMIUM / DISCOUNT	VERDICT
P/E 19.3x	P/E 20.8x	-7% vs peers	Cheap vs JSW Steel, expensive vs SAIL
From live market price ÷ trailing EPS	Median across 2 Nifty 200 Metals & Mining peers	Stock's multiple vs. that peer median	Mechanical rule, not a subjective call

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
• Whether the stock is priced richer or cheaper than same-sector peers right now	• Whether the premium is justified by superior growth, order book, or moat
• A repeatable, mechanical comparison — same rule applied to all 200 stocks	• The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › TATASTEEL is flagged **Cheap vs JSW Steel, expensive vs SAIL (P/E premium reflects private-sector execution vs PSU discount)** because its current multiple sits -7% vs peers — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

Why This Verdict



STEP 1
INPUT FEATURES
Fundamentals
Profitability, debt trend, capex pattern, growth

→

STEP 2
ML MODEL
Trained on history
Learns patterns in past company fundamentals

→

STEP 3
PEER RANKING
46/100
Estimated rank vs. sector peers, not a price target

→

STEP 4
COMBINED READ
MIXED SIGNAL
Insight Score + Valuation Verdict together

KEY TAKEAWAY › MIXED SIGNAL (weakest peer ROE, and a key UK green-steel project just slipped a year) — a middling Insight Score combined with a valuation that's -7% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE

- Tata Steel's 11.7% ROE is the best of its domestic peer group shown here, ahead of both JSW Steel (10.2%) and SAIL (6.43%), while trading at a more moderate P/E than JSW Steel.
- The Port Talbot EAF project, once operational, would cut site-level UK emissions by roughly 90% and positions Tata Steel as a leader in Western steel decarbonization -- a potential long-term competitive and regulatory advantage.
- UK government backing (GBP 500 million) for the Port Talbot transition signals strong external commitment to the project's success beyond Tata Steel's own capital.

THE BEAR CASE

- The one-year delay in UK power access, even if framed as manageable by management, shows the project remains exposed to infrastructure risk entirely outside Tata Steel's control.
- 5-year sales growth of just 8.21% and a weak 3-year average ROE of 7.44% suggest recent profitability improvement may not yet be a durable trend.
- SAIL's stock has risen over 51% in the past year on capacity-expansion optimism despite a much weaker ROE (6.43%) -- a reminder that sector-wide sentiment, not just company fundamentals, is currently driving steel stock performance broadly.

Sources: Business Standard · Screener.in

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
46/100	Cheap vs JSW Steel, expensive vs SAIL	0.90x	—

Tata Steel's 19.3x P/E sits between JSW Steel (26.4x) and SAIL (16.8x), and its 11.7% ROE is the best of the three domestic peers shown here -- on that basis, the valuation looks reasonably positioned rather than clearly cheap or expensive. The MIXED SIGNAL read reflects the genuine uncertainty around execution of the Port Talbot transition: a GBP 1.25 billion strategic bet on UK decarbonization that just slipped a year due to a factor (grid infrastructure) entirely outside Tata Steel's control -- a risk this deck's numbers can't quantify but that's worth tracking closely over the next 2-3 years. This is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
• A sustained re-rating of the sector as a whole, independent of this company's own numbers.	• P/E re-rates further above the Metals & Mining sector average (20.8x) while ROE stays flat — that would mean the market is pricing in growth the numbers don't yet show. • Debt-to-Equity rises meaningfully above its current 0.90x — the balance sheet is a strength today, and that would erode it.

KEY TAKEAWAY › 1 triggers on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

STEP 1	STEP 2	STEP 3	STEP 4
Next Results	**Re-Check**	**Verdict Holds**	**Verdict Updates**
Quarterly earnings / annual report	Walk through the triggers on the prior page, one by one	If nothing on the prior page has moved	If a trigger on the prior page has fired

KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time BHEL reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 4 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Not enough clean historical data to extrapolate a forecast for this stock.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
CLEAR	**CLEAR**	**CLEAR**	**CLEAR**
Total Debt rising every year	Net margin declining every year	Most recent year negative	Debt-to-Equity above 1.5x

KEY TAKEAWAY › All 4 mechanical checks come back clear — no rising-debt, declining-margin, negative-FCF or elevated-leverage pattern detected. This is not a full risk assessment; always verify independently.

Capital Expenditure (Rs Cr)	—	-14,142	-18,207	-15,671	-14,559
ROE	—	8.50%	-4.82%	3.75%	10.56%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for TATASTEEL — Tata Steel.

ClearStocks · An independent, personal research project
