Executive Summary

WIPRO — Wipro Ltd.

Cheap vs peers (P/E, -47%)

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
58/100	Information Technology	—	Trading below its sector's typical valuation on this metric.

- 72.6% promoter ownership limits free float and gives the promoter group significant control over strategic decisions.
- Brokerage views are sharply split between bull and bear cases on this stock (see Analyst Perspectives in Section 5 for the specific points on each side).
- Revenue grew at a 0.8% CAGR over the last 3 years of available financial history (see Section 3).

This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

CURRENT PRICE	REPORT DATE	INSIGHT SCORE	MARKET CAP
—	September 2026	58/100	Rs 174,508 Cr

Valuation Verdict: Cheap vs peers (P/E, -47%) · **Model Read:** Trading below its sector's typical valuation on this metric.

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Information Technology	Information Technology	Nifty 200	INE075A01022

Wipro Ltd.

Founded 1945 (as Western India Vegetable Products Ltd; entered IT services in the 1980s) — India's fourth-largest IT services company by revenue, providing consulting, systems integration, business process and cloud/digital transformation services, with a large presence in BFSI, healthcare, and consumer verticals. Wipro has invested heavily in AI-led delivery and platform engineering under CEO Srini Pallia's transformation program ("Wipro 2.0")..

SECTION 2

Company, Industry & Leadership

- Company Profile
- Shareholding Pattern
- Industry Context — Market Sizing
- Industry Context — Competitive Landscape
- Leadership
- Recent News

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
81 years	Bengaluru, Karnataka, India	5	Nifty 200

OWNERSHIP

Wipro is unusual among large Indian IT companies for still having a dominant promoter group: Azim Premji, his family, and related entities (HASHAM, PRAZIM, ZASH TRADERS and the Azim Premji Trust) collectively hold roughly 72.6% of the company. Foreign Institutional Investors hold about 8.9%, Insurance companies ~2.9%, Mutual Funds ~1.8%, other Domestic Institutions ~0.5%, and retail/public investors the remaining ~11.1%.

OPERATIONS

India's fourth-largest IT services company by revenue, providing consulting, systems integration, business process and cloud/digital transformation services, with a large presence in BFSI, healthcare, and consumer verticals. Wipro has invested heavily in AI-led delivery and platform engineering under CEO Srini Pallia's transformation program ("Wipro 2.0").

Sources: Choice India — Wipro Shareholding Pattern · EnrichMoney — Wipro Holding Pattern (Promoters)

Shareholding Pattern

Promoter (Azim Premji & family/trusts)	72.6%
Public / Retail	11.1%
FII (Foreign Institutions)	8.9%
Insurance Companies	2.9%
Mutual Funds	1.8%
Other DII	0.5%

Key Named Investors

Investor	Holding	Note
HASHAM, PRAZIM & ZASH TRADERS (Premji family entities)	~59.5% combined	The core promoter holding vehicle, structured across multiple family trading partnerships
Azim Premji Trust	~6.5%	A philanthropic trust holding a meaningful separate stake
Azim H Premji (personal)	~4.1%	Direct individual holding, separate from trusts and trading entities

Sources: EnrichMoney — Wipro Holding Pattern

KEY TAKEAWAY › At ~72.6% promoter ownership, Wipro's free float is unusually small for a company of its size -- quite different from TCS, Infosys, or HCLTech, where institutions and the public hold a much larger share. This concentrates control firmly with the Premji family but also means the traded float can be more volatile on news given its smaller size.

Industry Context

Wipro's Q1 FY27 results (July 2026) showed consolidated net profit nearly flat at Rs 3,352 Cr (+0.6% YoY), even as consolidated revenue grew 10.6% YoY to Rs 24,479 Cr. IT services revenue in dollar terms was $2.61 billion, up just 1% YoY and down 1.4% sequentially. The more telling number was margin: IT services operating margin fell to 16% (down 130 bps sequentially and 120 bps YoY), and EBIT margin dropped to 15.6% from 17.2%, a 15-quarter low, which the company attributed to wage hikes and continued investment. Total bookings were $3.37 billion, with large deal bookings of $1.63 billion (+12.9% QoQ) across 13 large deals -- a relatively healthy pipeline signal even as near-term revenue growth stayed close to flat. Guidance for Q2 FY27 IT services revenue was $2.57-2.63 billion, implying sequential constant-currency growth of -1.5% to +0.5%.

Sources: Wipro Q1 FY27 Results — India Infoline · Wipro Q1 FY27 Results — Business Standard

KEY TAKEAWAY › Margin compression to a 15-quarter low, even while deal bookings held up, is the central tension in this result -- it suggests Wipro's transformation investments are a genuine near-term cost, with the payoff (if any) still ahead rather than showing up in current profitability.

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. WIPRO
Tata Consultancy Services (TCS)	Largest Indian IT services company	Much larger scale and a stronger recent growth/margin track record; Wipro is often benchmarked against TCS as the sector's growth ceiling.
Infosys	Large-cap IT services	Broadly similar scale to Wipro's international peers, but has generally posted steadier growth and higher margins in recent years.
HCLTech	Large-cap IT services	More engineering/products-and-platforms weighted; frequently cited alongside Wipro on margin-trend comparisons.

Sources: Univest — Wipro Share Price Target 2026

KEY TAKEAWAY › Wipro has lagged Infosys and TCS on organic revenue growth for several years running -- the investment case increasingly rests on whether CEO Srini Pallia's transformation program can close that gap, rather than on the sector's overall growth alone.

BOARD & SENIOR MANAGEMENT ROSTER

Leadership

Chief Executive Officer & Managing Director	Srini Pallia
Executive Chairman	Rishad Premji

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
14.0x	2.3x	14.9%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 4 years)

Metric (Rs Cr)	FY2023	FY2024	FY2025	FY2026
Total Revenue	90,488	89,760	89,088	92,624
Net Income	11,350	11,045	13,135	13,197
EBITDA	18,888	18,954	21,378	21,044
Total Debt	17,467	16,465	19,204	20,291
Stockholders Equity	78,116	74,988	82,831	88,537
Free Cash Flow	11,577	16,571	15,439	13,371
ROE	14.5%	14.7%	15.9%	14.9%

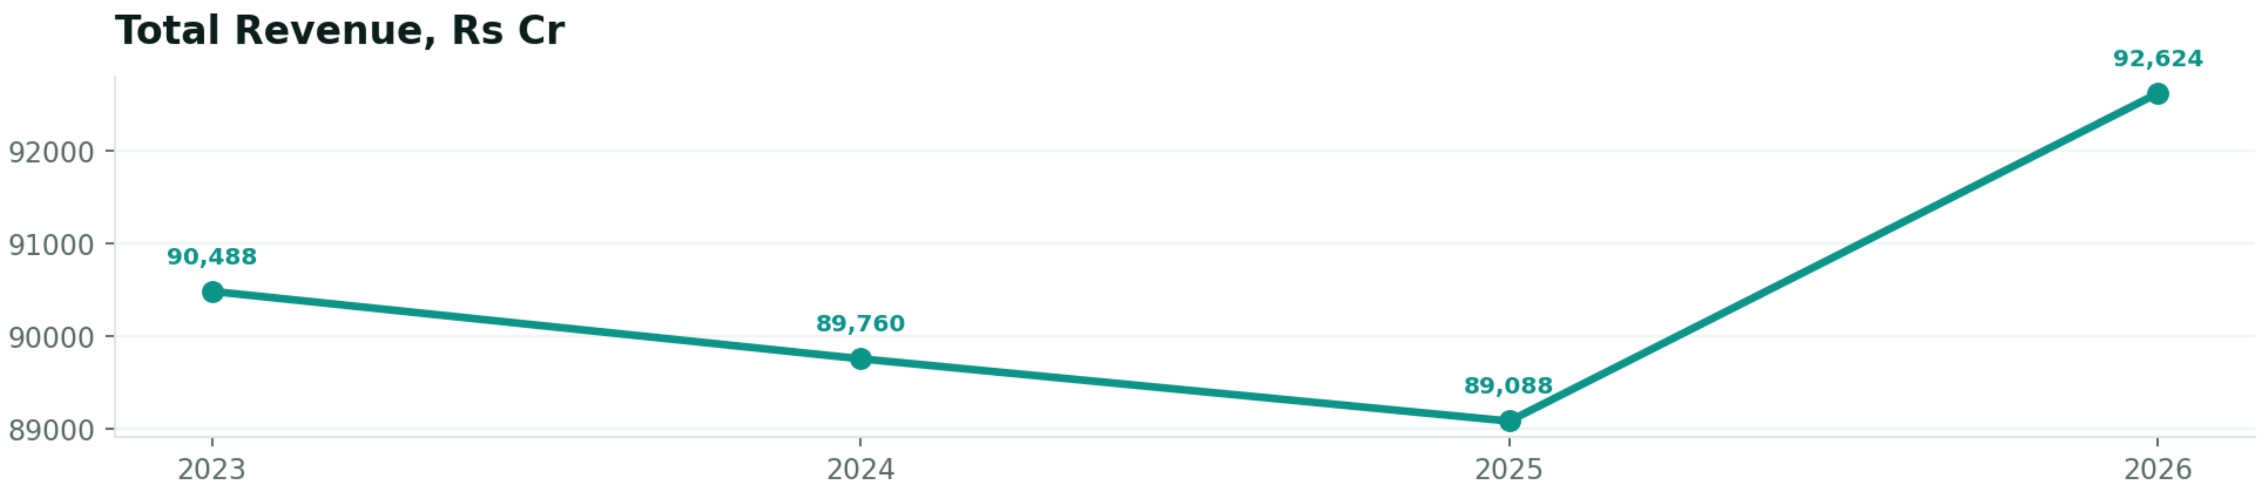
Year-over-year growth

YoY Growth	FY2024	FY2025	FY2026
Revenue Growth	-0.8%	-0.7%	+4.0%
Net Income Growth	-2.7%	+18.9%	+0.5%

KEY TAKEAWAY › Revenue grew at a 0.8% CAGR and Net Income at a 5.2% CAGR over the last 3 years of available data — profit growth outpaced revenue growth, suggesting improving margins.

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

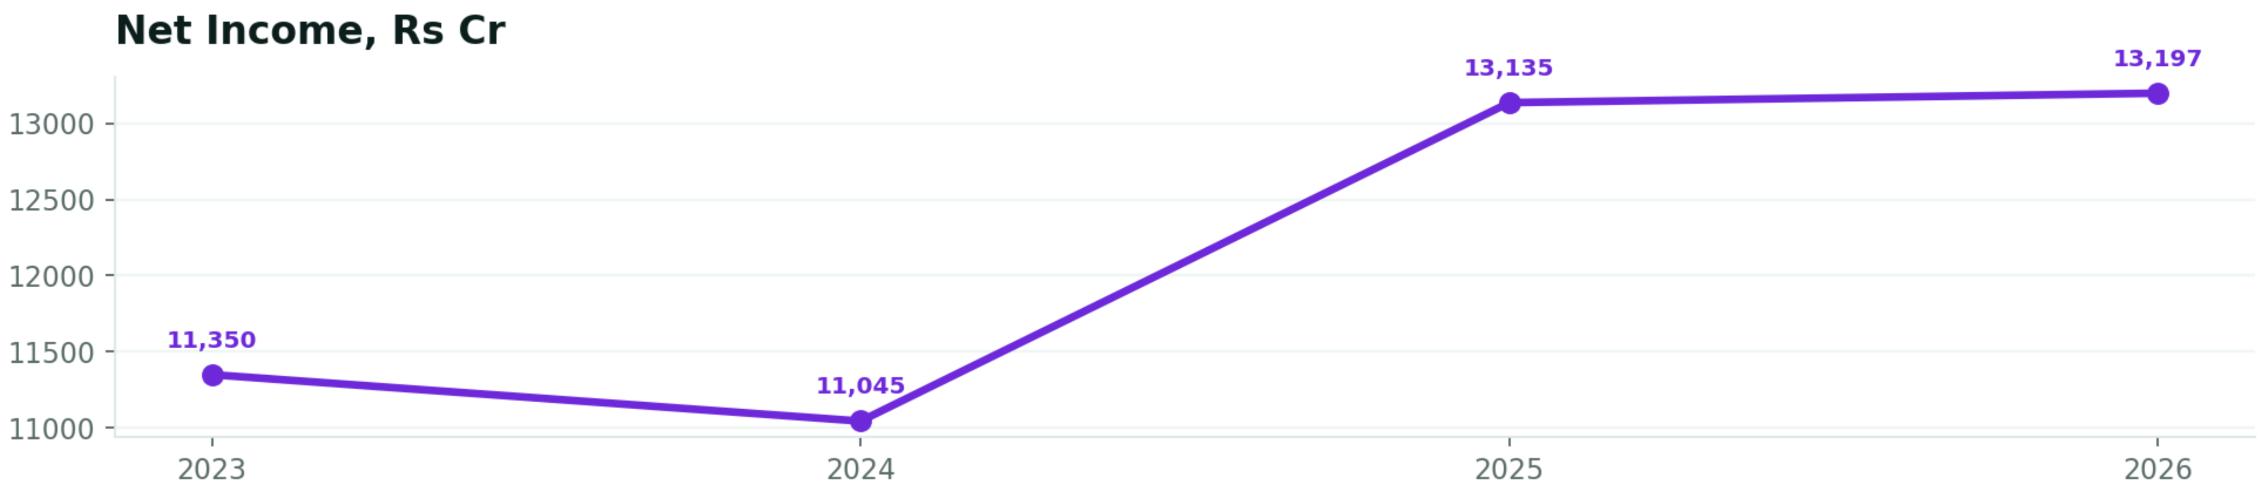


- Revenue grew 2% cumulatively from FY2023 to FY2026 (Rs 90,488 Cr → Rs 92,624 Cr), a 0.8% CAGR over 3 years.
- Growth has accelerated every year — FY2024 at -0.8% up to FY2026 at +4.0% — a sign of building, not fading, momentum.

KEY TAKEAWAY › WIPRO's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

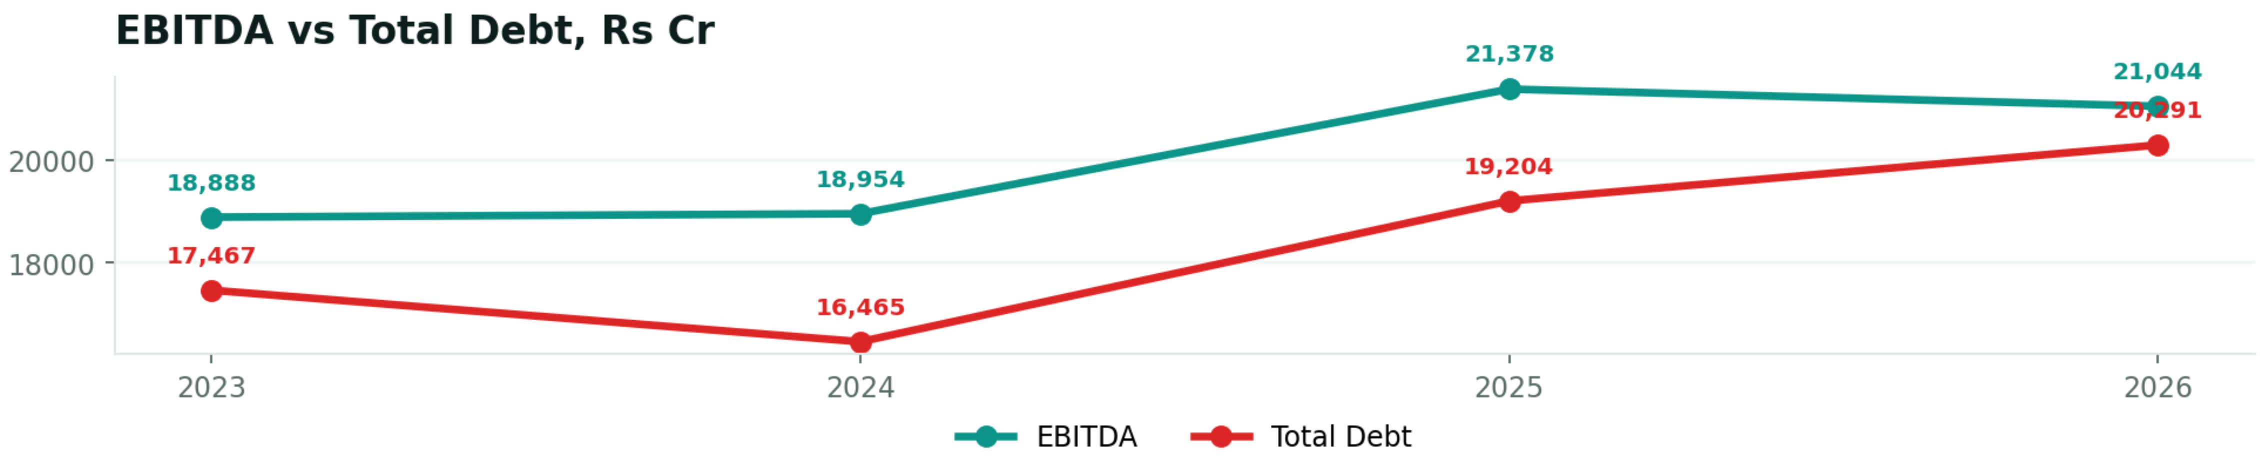


- Net margin moved from 12.5% in FY2023 to 14.2% in FY2026 — expanding profitability on each rupee of revenue.
- Net Income CAGR (5.2%) has outpaced Revenue CAGR (0.8%) — classic operating leverage: fixed costs are being spread over a larger revenue base.
- Profit dipped in FY2024 (Rs 11,045 Cr) before recovering — a single weak year rather than a multi-year decline.

KEY TAKEAWAY › Net Income for WIPRO across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

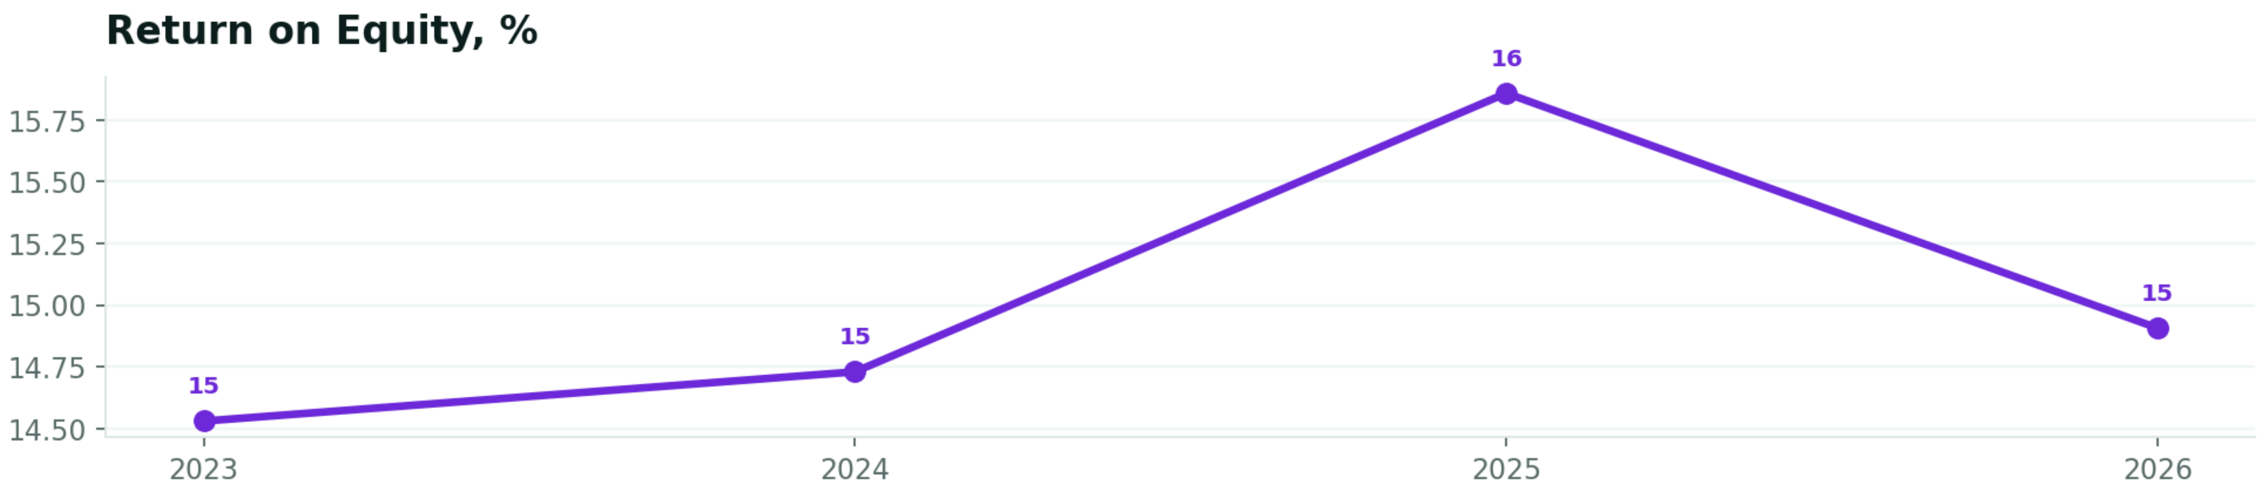


- EBITDA margin moved from 20.9% to 22.7% over the period — a genuine improvement in core operating efficiency.
- Total Debt has risen 16% over the period (Rs 17,467 Cr → Rs 20,291 Cr) while EBITDA grew — debt is being taken on faster than the operating profit base that would service it.
- At the latest EBITDA of Rs 21,044 Cr against Rs 20,291 Cr of debt, it would take roughly 1.0 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for WIPRO — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend



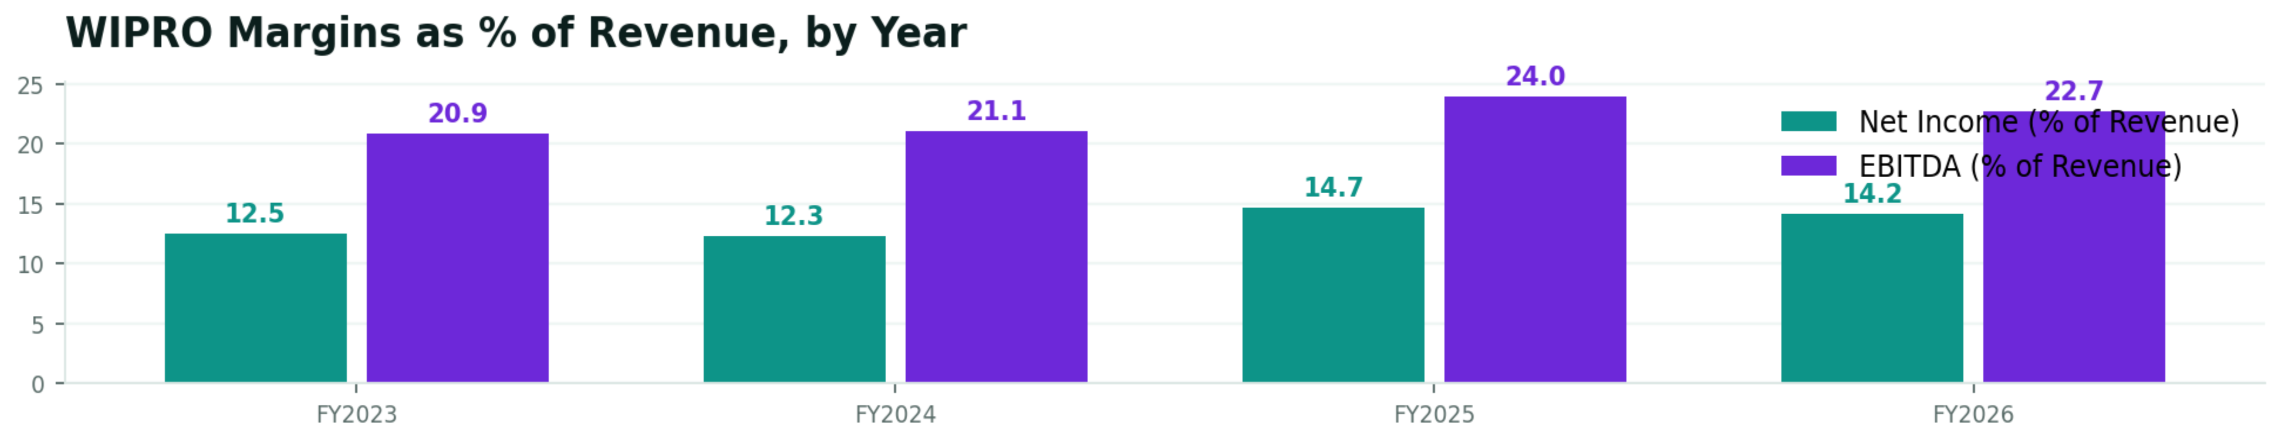
- ROE moved from 14.5% to 14.9% over FY2023-FY2026 — a meaningful improvement in how efficiently shareholder capital is being turned into profit.
- Shareholder Equity grew 13% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 15.0% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › WIPRO's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.



KEY TAKEAWAY › EBITDA margin moved from 20.9% of revenue in FY2023 to 22.7% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2023	FY2024	FY2025	FY2026
Net Income	12.5%	12.3%	14.7%	14.2%
EBITDA	20.9%	21.1%	24.0%	22.7%
Total Debt	19.3%	18.3%	21.6%	21.9%
Stockholders Equity	86.3%	83.5%	93.0%	95.6%
Total Assets	129.9%	128.4%	144.4%	153.2%
Operating Cash Flow	14.4%	19.6%	19.0%	16.1%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

KEY TAKEAWAY › Total Debt moved from 19.3% of revenue to 21.9% over this period (+2.6 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

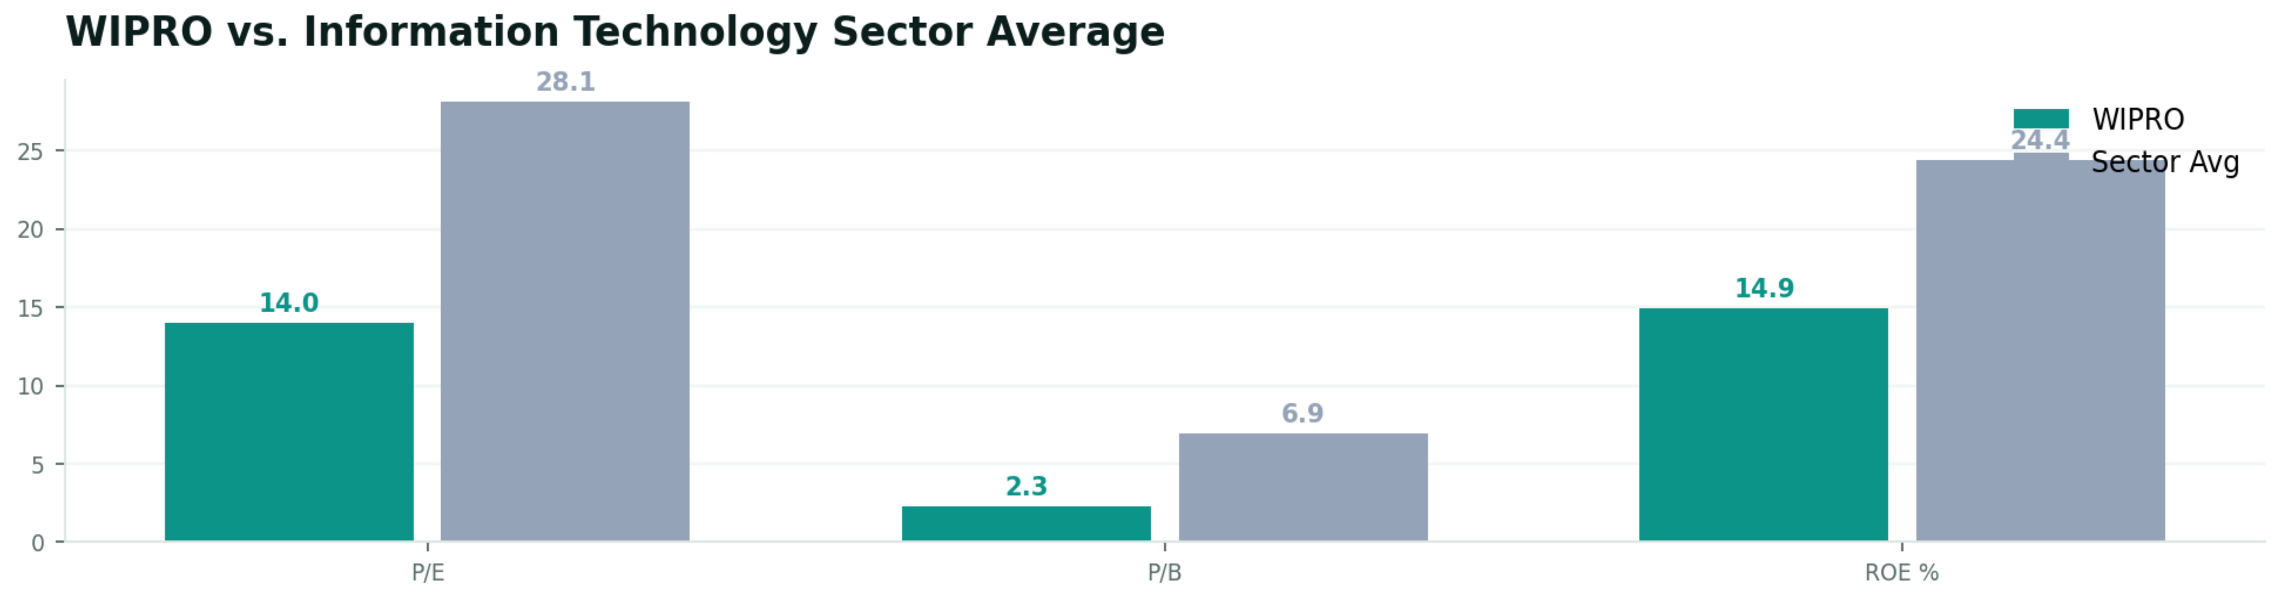
SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Information Technology



KEY TAKEAWAY › WIPRO's P/E is 50% below its sector average — trading at a discount, which can mean overlooked value or a real, priced-in problem.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

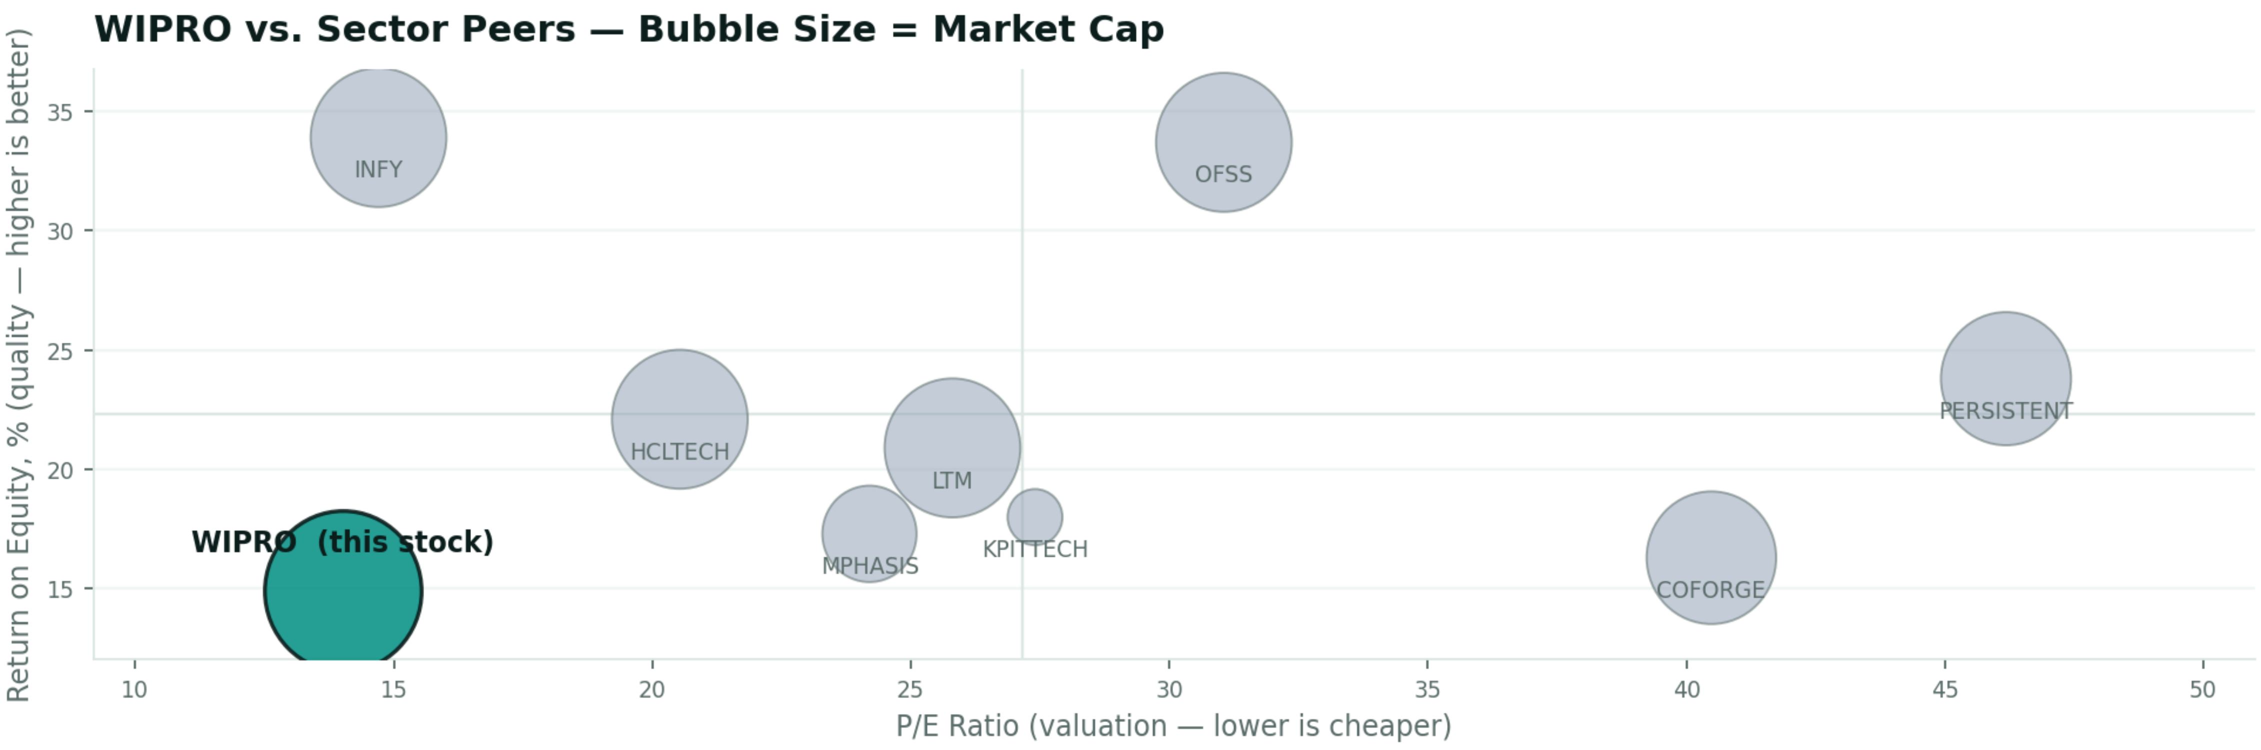
Company	P/E	P/B	ROE	Mkt Cap (Cr)
WIPRO (this stock)	14.0	2.3	14.9%	174,508
TCS	16.7	7.6	45.9%	840,506
INFY	14.7	5.0	33.9%	457,684
HCLTECH	20.5	4.7	22.1%	349,964
TECHM	27.6	4.8	16.2%	141,469
LTM	25.8	5.5	20.9%	135,008
OFSS	31.1	15.2	33.7%	105,005

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 11 largest sector peers, TCS has the highest ROE (45.9%) vs WIPRO's 14.9% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

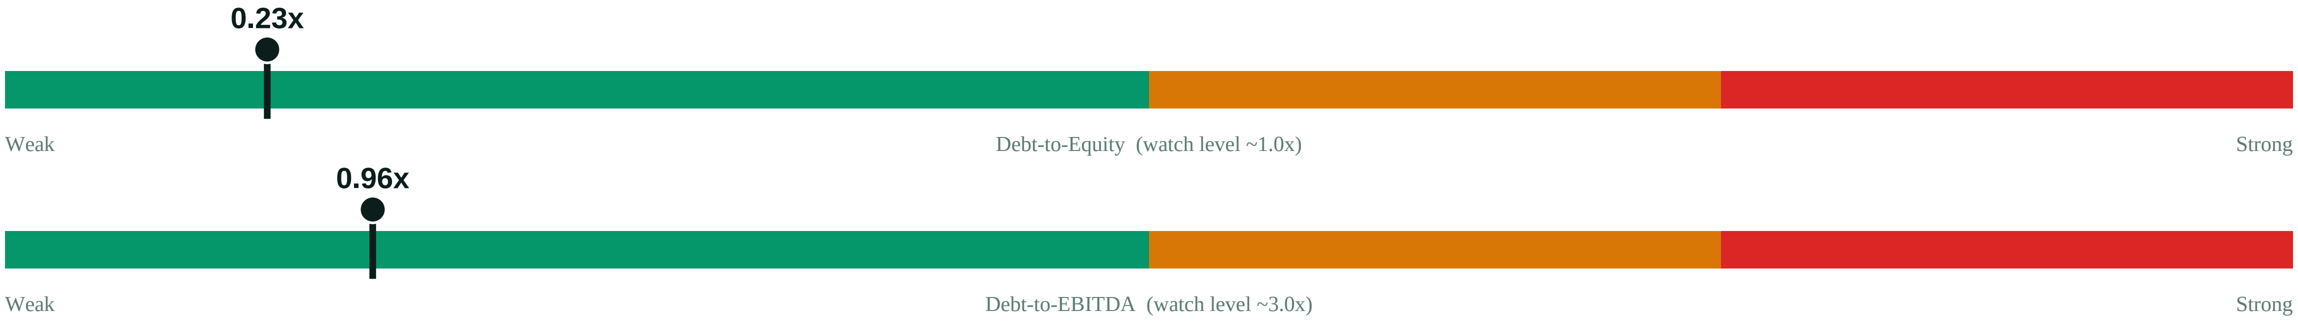
Peer Positioning Map



KEY TAKEAWAY › WIPRO sits in the quadrant that is cheap with below-average returns — cheap for a reason until proven otherwise, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios



Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

KEY TAKEAWAY › Debt-to-Equity of 0.23x is below the ~1x watch level — leverage looks manageable on this measure alone.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

STEP 1	STEP 2	STEP 3	STEP 4
STOCK'S OWN MULTIPLES	SECTOR PEER MEDIAN	PREMIUM / DISCOUNT	VERDICT
P/E 14.0x	P/E 28.1x	-50% vs peers	Cheap vs peers
From live market price ÷ trailing EPS	Median across 11 Nifty 200 Information Technology peers with live P/E	Stock's multiple vs. that peer median	Mechanical rule, not a subjective call

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
• Whether the stock is priced richer or cheaper than same-sector peers right now	• Whether the premium is justified by superior growth, order book, or moat
• A repeatable, mechanical comparison — same rule applied to all 200 stocks	• The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › WIPRO is flagged **Cheap vs peers (P/E, -47%)** because its current multiple sits -50% vs peers — a data comparison, not a judgement on whether that premium is deserved.

Insight Score + Valuation Verdict together

KEY TAKEAWAY › Trading below its sector's typical valuation on this metric. — a middling Insight Score combined with a valuation that's -50% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE

- Large deal bookings ($1.63 billion, up 12.9% QoQ across 13 deals) suggest the sales pipeline remains healthy despite soft revenue growth.
- CEO Srini Pallia's Phase 2 transformation program is still early -- full earnings delivery from it, alongside a macro recovery, is the basis for more bullish price targets.
- Wipro trades at a discount to Infosys and TCS on most valuation multiples, offering re-rating potential if execution improves.

THE BEAR CASE

- IT services margin fell to a 15-quarter low (15.6%) on wage hikes and investment spend, with no clear near-term reversal signaled.
- Organic revenue growth has been close to flat for several quarters running, and Q2 FY27 guidance (-1.5% to +0.5% sequential) does not point to an inflection yet.
- Broader risks cited by analysts include continued US enterprise spending caution delaying large deals, the 26% US reciprocal tariff overhang, and longer-term risk of AI-driven displacement of traditional IT services revenue.
- Intensifying competition from Infosys and TCS in key verticals is a recurring risk factor in analyst notes.

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
58/100	Cheap vs peers	0.23x	—

Wipro's Q1 FY27 tells a story of a company investing through a rough patch: margins are at a multi-year low and organic growth remains close to flat, but deal bookings held up and management is mid-way through a stated transformation program. The unusually high promoter ownership (~72.6%) also sets Wipro apart structurally from its large-cap IT peers -- it means less free float and potentially more control-driven strategic continuity, for better or worse. The next few quarters of margin trend, more than any single revenue print, will likely show whether the transformation is working. This is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
• A sustained re-rating of the sector as a whole, independent of this company's own numbers.	• P/E re-rates further above the Information Technology sector average (28.1x) while ROE stays flat — that would mean the market is pricing in growth the numbers don't yet show. • Debt-to-Equity rises meaningfully above its current 0.23x — the balance sheet is a strength today, and that would erode it. • Net Income growth reverses and turns negative for two consecutive years — the current growth trend is doing a lot of the work in this verdict.

KEY TAKEAWAY › 1 trigger on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

STEP 1	STEP 2	STEP 3	STEP 4
Next Results	**Re-Check**	**Verdict Holds**	**Verdict Updates**
Quarterly earnings / annual report	Walk through the triggers on the prior page, one by one	If nothing on the prior page has moved	If a trigger on the prior page has fired

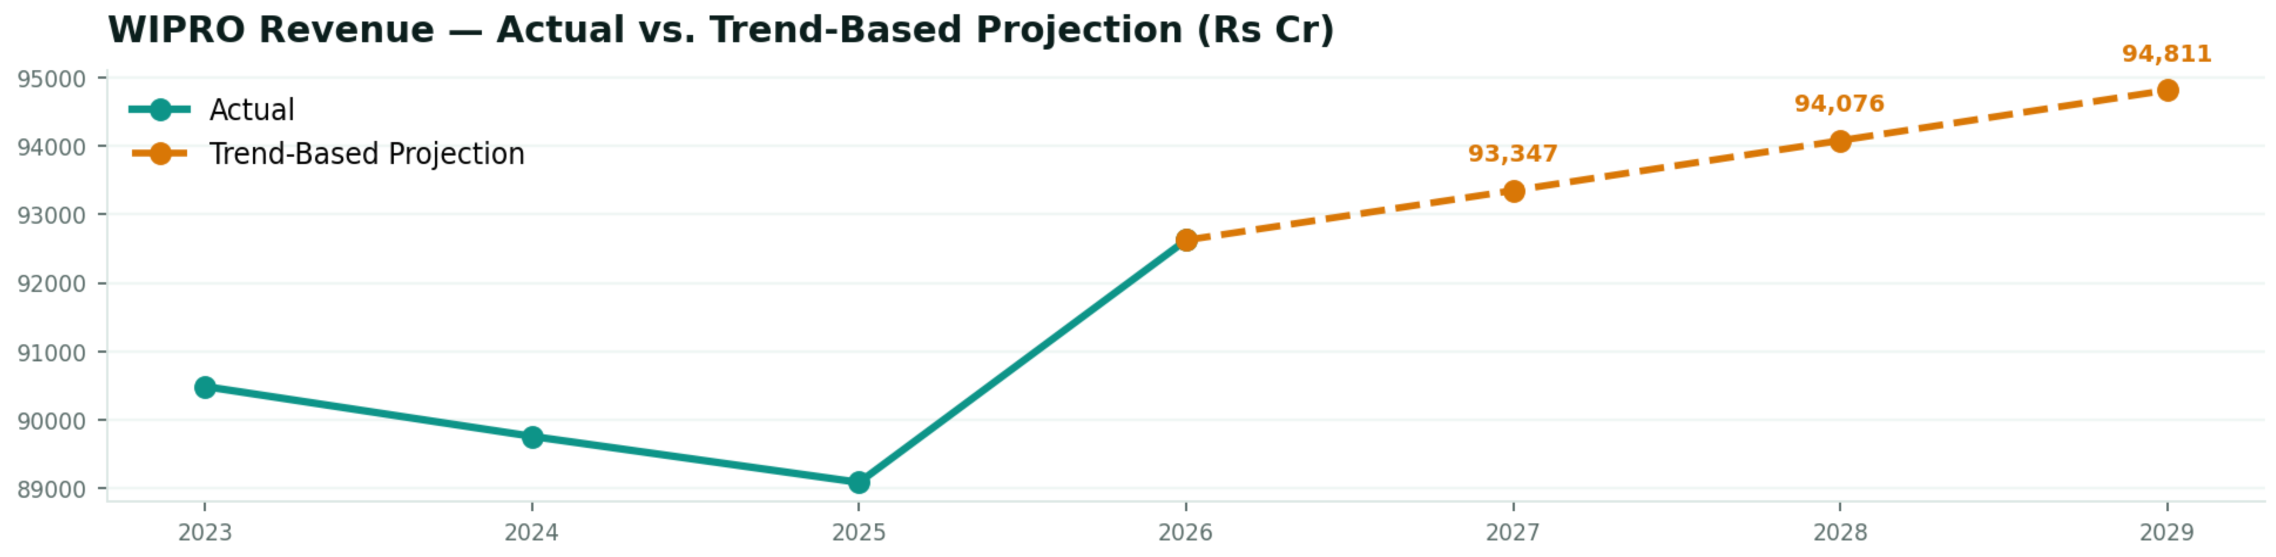
KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time WIPRO reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Metric (Rs Cr)	FY2026 (actual)	FY2027E	FY2028E	FY2029E
Revenue	92,624	93,347	94,076	94,811
Net Income	13,197	13,878	14,593	15,345



Based on a historical Revenue CAGR of +0.8% and Net Income CAGR of +5.2% over the last 3 years.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
CLEAR	**CLEAR**	**CLEAR**	**CLEAR**
Total Debt rising every year	Net margin declining every year	Most recent year negative	Debt-to-Equity above 1.5x

KEY TAKEAWAY › All 4 mechanical checks come back clear — no rising-debt, declining-margin, negative-FCF or elevated-leverage pattern detected. This is not a full risk assessment; always verify independently.

Free Cash Flow (Rs Cr)	11,577	16,571	15,439	13,371
Operating Cash Flow (Rs Cr)	13,060	17,622	16,943	14,932
Capital Expenditure (Rs Cr)	-1,483	-1,051	-1,504	-1,560
ROE	14.53%	14.73%	15.86%	14.91%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for WIPRO — Wipro Ltd..
