Executive Summary

LT — Larsen & Toubro Ltd.

Fairly valued vs peers (P/E, -19%)

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
82/100	Construction	—	Valuation is in line with its sector peers on this metric.

- Brokerage views are sharply split between bull and bear cases on this stock (see Analyst Perspectives in Section 5 for the specific points on each side).
- Revenue grew at a 16.1% CAGR over the last 3 years of available financial history (see Section 3).

This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

Key Statistics

Valuation Verdict: Fairly valued vs peers (P/E, -19%) · **Model Read:** Valuation is in line with its sector peers on this metric.

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Construction	Construction	Nifty 200	INE018A01030

Larsen & Toubro Ltd.

Founded 1938 (as a private engineering firm; incorporated as a public company in 1946) — India's largest engineering, procurement and construction (EPC) conglomerate, spanning infrastructure (roads, metros, buildings), heavy and power engineering, defence (shipbuilding, submarines), hydrocarbons, and IT services through listed subsidiaries LTIMindtree and L&T Technology Services. International projects (Middle East, Africa) now account for more than half of both revenue and order book..

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
88 years	Mumbai, Maharashtra, India	5	Nifty 200

OWNERSHIP

L&T has no promoter shareholder -- it is India's largest professionally-run engineering and construction conglomerate, with ownership spread across institutions and the public. As of June 2026, Foreign Institutional Investors hold roughly 19.1%, Mutual Funds ~20.1%, Insurance companies ~18.6%, and other Domestic Institutions ~4.6% -- domestic and foreign institutions together hold about 62%, with the remaining ~37.6% held by public/non-institutional investors, including a meaningful stake held via the L&T Employees' Trust.

OPERATIONS

India's largest engineering, procurement and construction (EPC) conglomerate, spanning infrastructure (roads, metros, buildings), heavy and power engineering, defence (shipbuilding, submarines), hydrocarbons, and IT services through listed subsidiaries LTIMindtree and L&T Technology Services. International projects (Middle East, Africa) now account for more than half of both revenue and order book.

Sources: Trendlyne — L&T Shareholding Pattern · MarketsMojo — L&T Shareholding

Shareholding Pattern

FII (Foreign Institutions)	19.1%
Mutual Funds	20.1%
Insurance Companies	18.6%
Other DII	4.6%
Public / Non-Institutional (incl. Employees' Trust)	37.6%
Promoter	0% — none; professionally-managed

Key Named Investors

Investor	Holding	Note
Life Insurance Corporation of India (LIC)	~significant single holder within Insurance	Consistently one of the largest domestic institutional holders of L&T
L&T Employees' Welfare Foundation / Trust	~14% (within "Any Others")	A large employee trust stake, unusual for a company this size — acts as a stable, non-trading holder

Sources: Trendlyne — L&T Shareholding Pattern · MarketsMojo — L&T Shareholding (Jun 2026)

KEY TAKEAWAY › Like ITC and ICICI Bank, L&T has no promoter or founding-family shareholder -- a rarity for a company of this scale in India, and a legacy of how it was built as a professionally-managed engineering house rather than a family conglomerate.

Industry Context

L&T's Q1 FY27 results (July 2026) showed consolidated net profit up 14% YoY to Rs 4,123 Cr on revenue of Rs 67,900 Cr (+7% YoY). The headline number for this stock, though, is the order book: Rs 7.79 lakh Cr, up 27% YoY and providing roughly three years of revenue visibility, with quarterly order inflows of Rs 1.08 lakh Cr (+14% YoY) led by offshore wind contracts from Europe and continued strength from the Middle East (42% of the quarter's inflows). International work now makes up 51% of revenue and 52% of the order book -- L&T is no longer primarily a domestic-infrastructure story. EBITDA margin, however, contracted to 9.0% from 9.9% a year earlier, a reminder that this is a low-margin, execution-heavy business even when growth is strong; net working capital did improve meaningfully, to 4.9% of revenue from 10.1%.

Sources: L&T Q1 FY27 Results — Business Standard · L&T Q1 FY27 Slides — Investing.com

KEY TAKEAWAY › The order book size (nearly 3 years of revenue) is what makes L&T's growth relatively predictable compared to most industrial companies -- the swing factor for the stock is margin, not top-line, since revenue is already largely locked in by contracts already won.

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. LT
BHEL	Power equipment & EPC (PSU)	Far smaller and more power-sector-concentrated than L&T's diversified conglomerate scale; L&T trades at a premium reflecting its scale, execution record, and international diversification.
Siemens India	Industrial automation, power & EPC	Higher-margin, more automation/electrification-focused business; less reliant on large fixed-price EPC contracts than L&T.
KEC International	Power transmission EPC	A much smaller, more narrowly-focused T&D EPC player -- useful as a read on EPC-sector margin pressure, since KEC operates in the same low-margin, working-capital-heavy model as L&T at a fraction of the scale.

Sources: Trendlyne — L&T Peer Comparison

KEY TAKEAWAY › L&T doesn't have a true like-for-like peer in India at its scale -- it competes more with global EPC majors on large international contracts than with any single listed Indian company.

BOARD & SENIOR MANAGEMENT ROSTER

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
32.9x	5.0x	14.7%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 4 years)

Metric (Rs Cr)	FY2023	FY2024	FY2025	FY2026
Total Revenue	181,661	219,116	254,209	284,225
Net Income	10,471	13,059	15,037	16,084
EBITDA	23,671	27,728	31,008	33,167
Total Debt	120,650	116,322	132,409	125,497
Stockholders Equity	89,326	86,359	97,656	109,290
Free Cash Flow	18,633	13,750	4,733	11,932
ROE	11.7%	15.1%	15.4%	14.7%

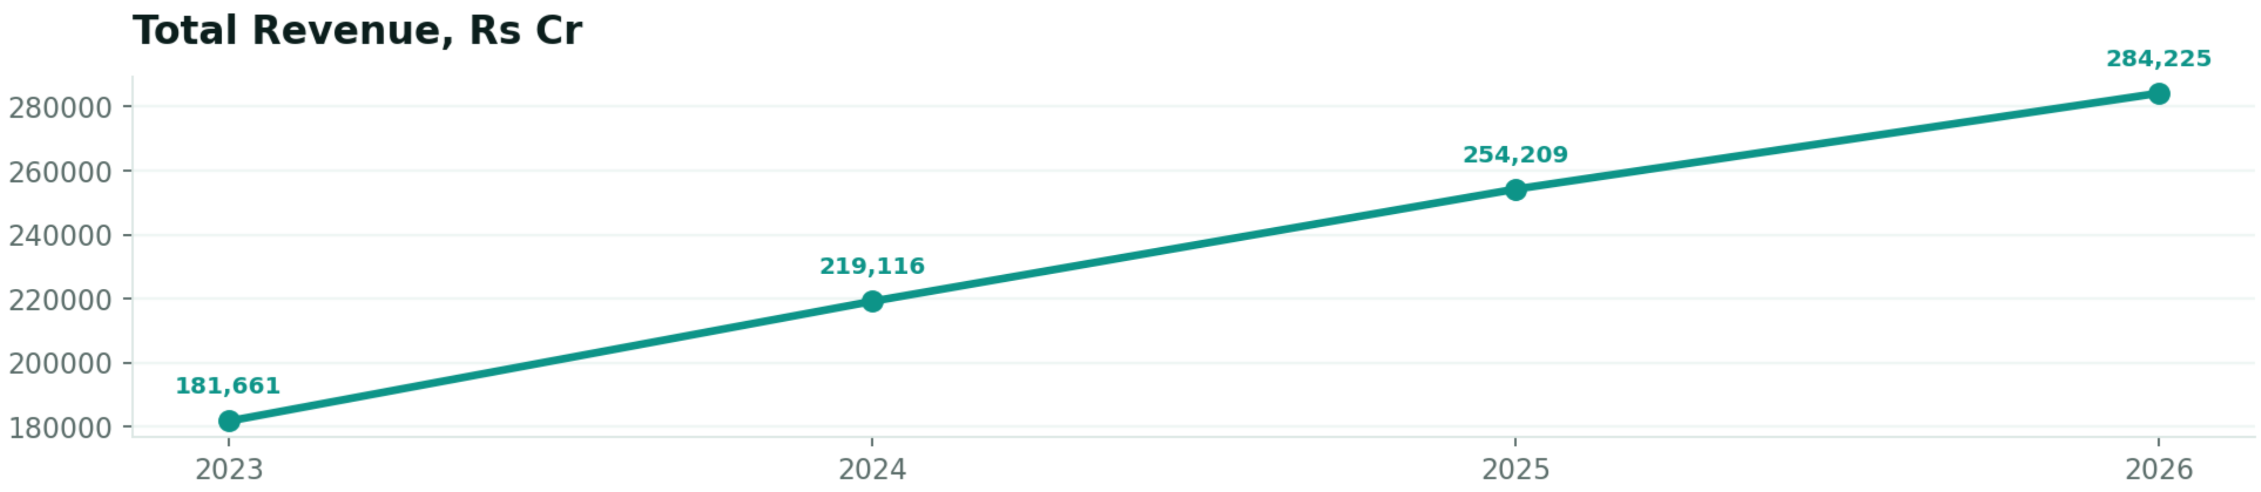
Year-over-year growth

YoY Growth	FY2024	FY2025	FY2026
Revenue Growth	+20.6%	+16.0%	+11.8%
Net Income Growth	+24.7%	+15.1%	+7.0%

KEY TAKEAWAY › Revenue grew at a 16.1% CAGR and Net Income at a 15.4% CAGR over the last 3 years of available data — revenue outpaced profit growth, suggesting margin pressure.

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

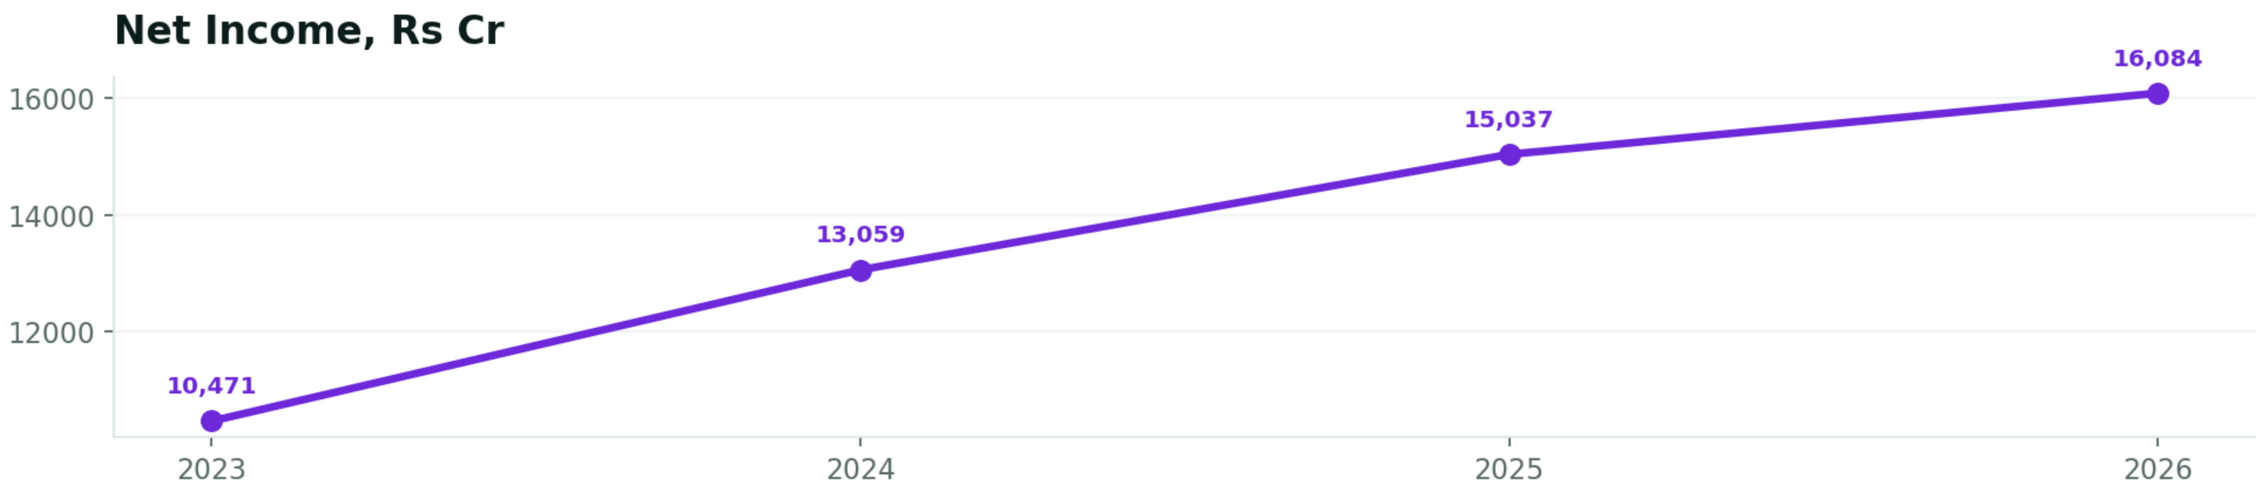


- Revenue grew 56% cumulatively from FY2023 to FY2026 (Rs 181,661 Cr → Rs 284,225 Cr), a 16.1% CAGR over 3 years.
- Growth has slowed every year — from +20.6% to +11.8% — worth checking whether that's a maturing base or a genuine demand slowdown.

KEY TAKEAWAY › LT's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

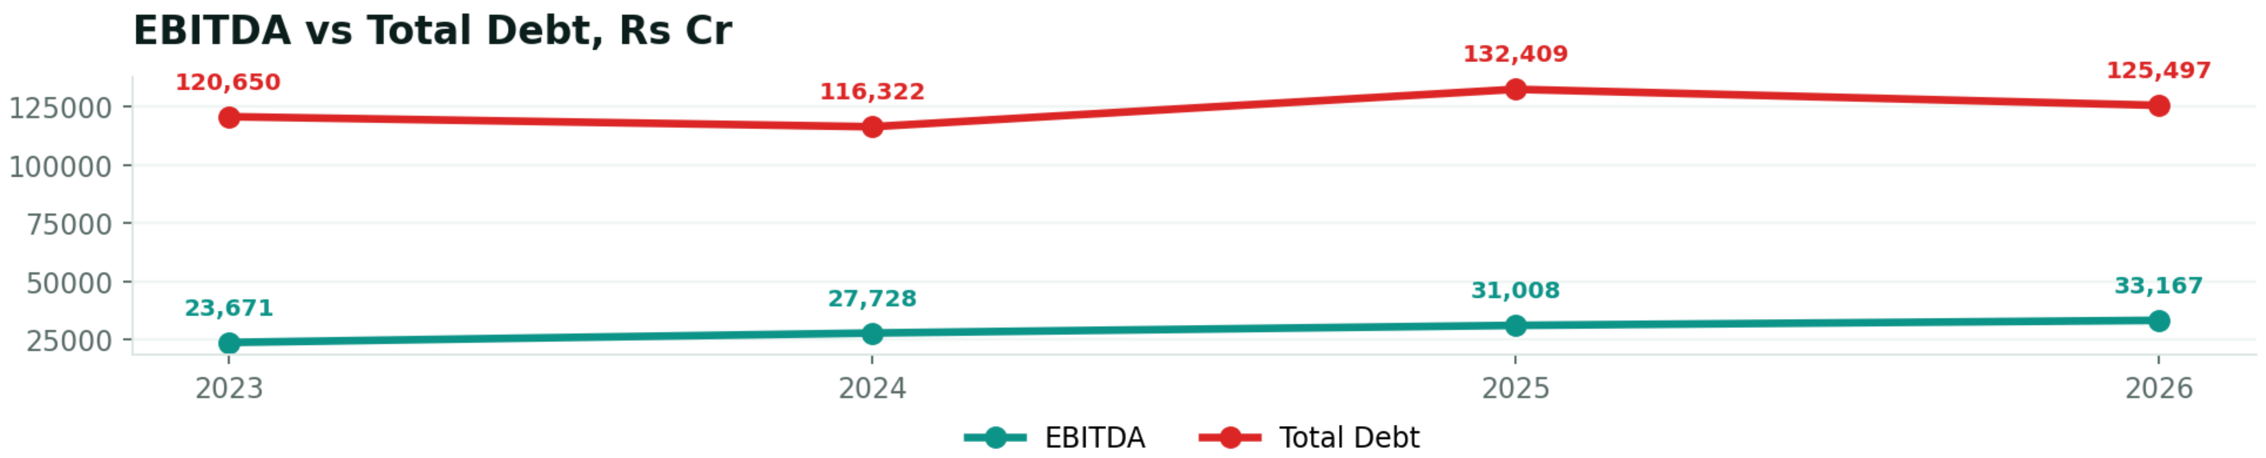


- Net margin moved from 5.8% in FY2023 to 5.7% in FY2026 — compressing profitability on each rupee of revenue.
- Net Income CAGR (15.4%) has lagged Revenue CAGR (16.1%) — revenue growth is not yet converting proportionally into bottom-line growth.

KEY TAKEAWAY › Net Income for LT across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

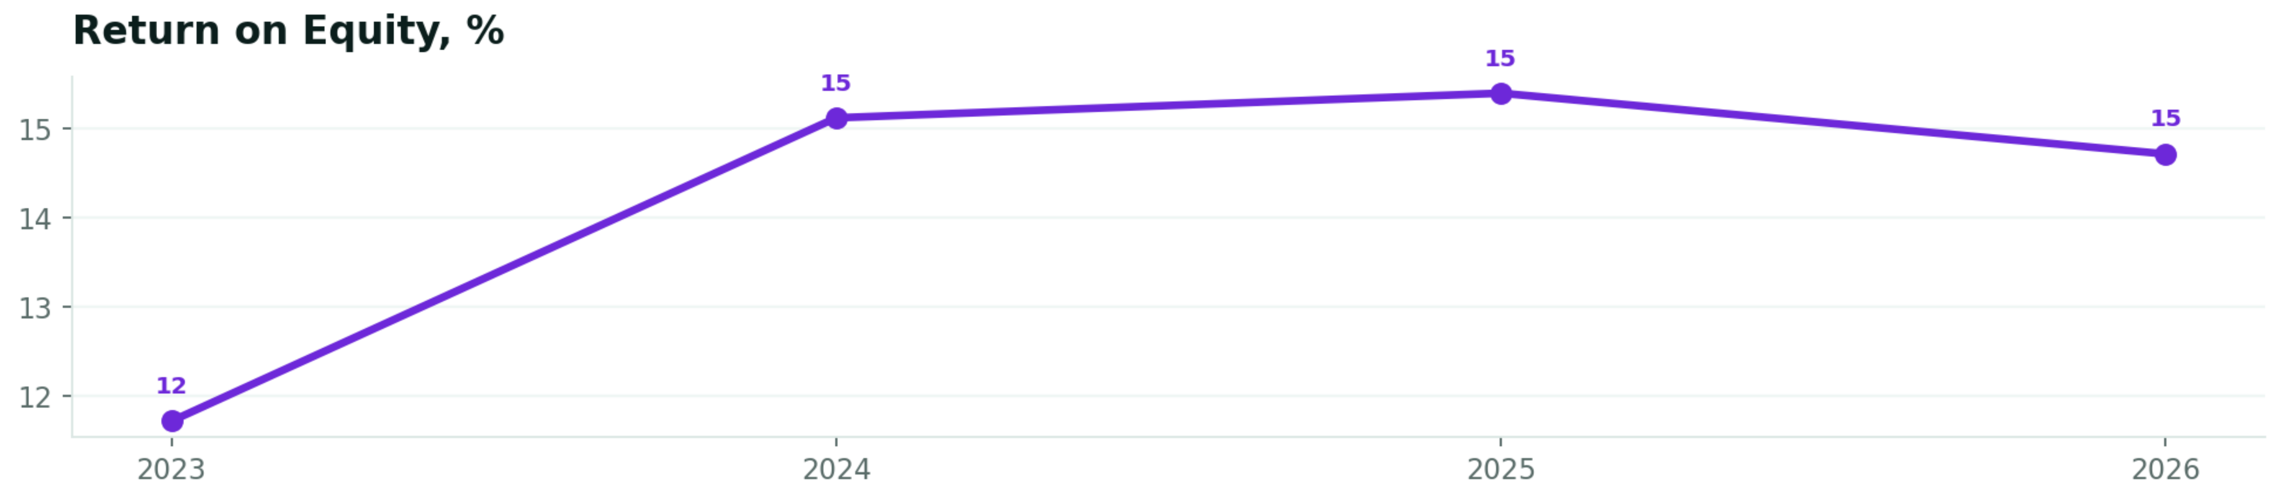


- EBITDA margin moved from 13.0% to 11.7% over the period — pressure on core operating efficiency, independent of one-off items.
- Total Debt has risen 4% over the period (Rs 120,650 Cr → Rs 125,497 Cr) while EBITDA grew — the operating profit base has kept pace with rising leverage.
- At the latest EBITDA of Rs 33,167 Cr against Rs 125,497 Cr of debt, it would take roughly 3.8 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for LT — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend



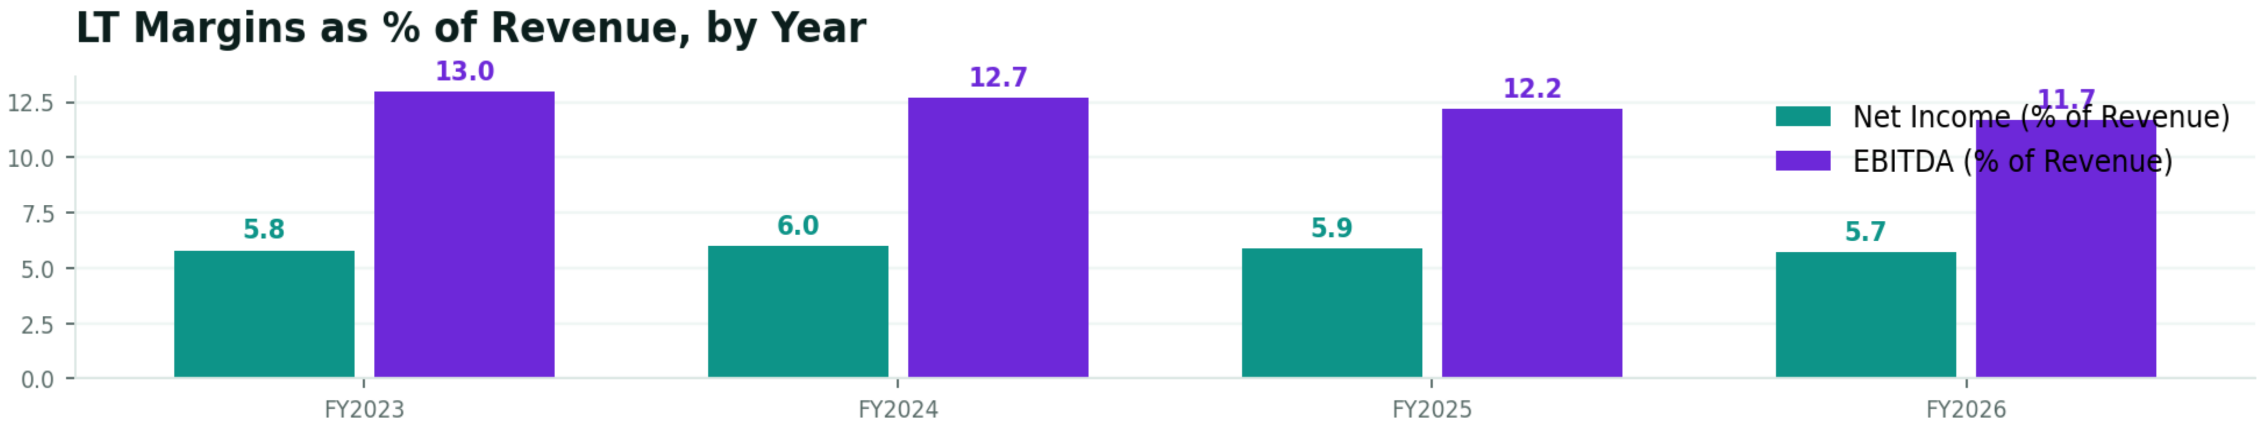
- ROE moved from 11.7% to 14.7% over FY2023-FY2026 — a meaningful improvement in how efficiently shareholder capital is being turned into profit.
- Shareholder Equity grew 22% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 14.2% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › LT's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.



KEY TAKEAWAY › EBITDA margin moved from 13.0% of revenue in FY2023 to 11.7% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2023	FY2024	FY2025	FY2026
Net Income	5.8%	6.0%	5.9%	5.7%
EBITDA	13.0%	12.7%	12.2%	11.7%
Total Debt	66.4%	53.1%	52.1%	44.2%
Stockholders Equity	49.2%	39.4%	38.4%	38.5%
Total Assets	181.9%	155.2%	149.3%	159.2%
Operating Cash Flow	12.5%	8.3%	3.6%	5.9%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

KEY TAKEAWAY › Total Debt moved from 66.4% of revenue to 44.2% over this period (-22.3 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

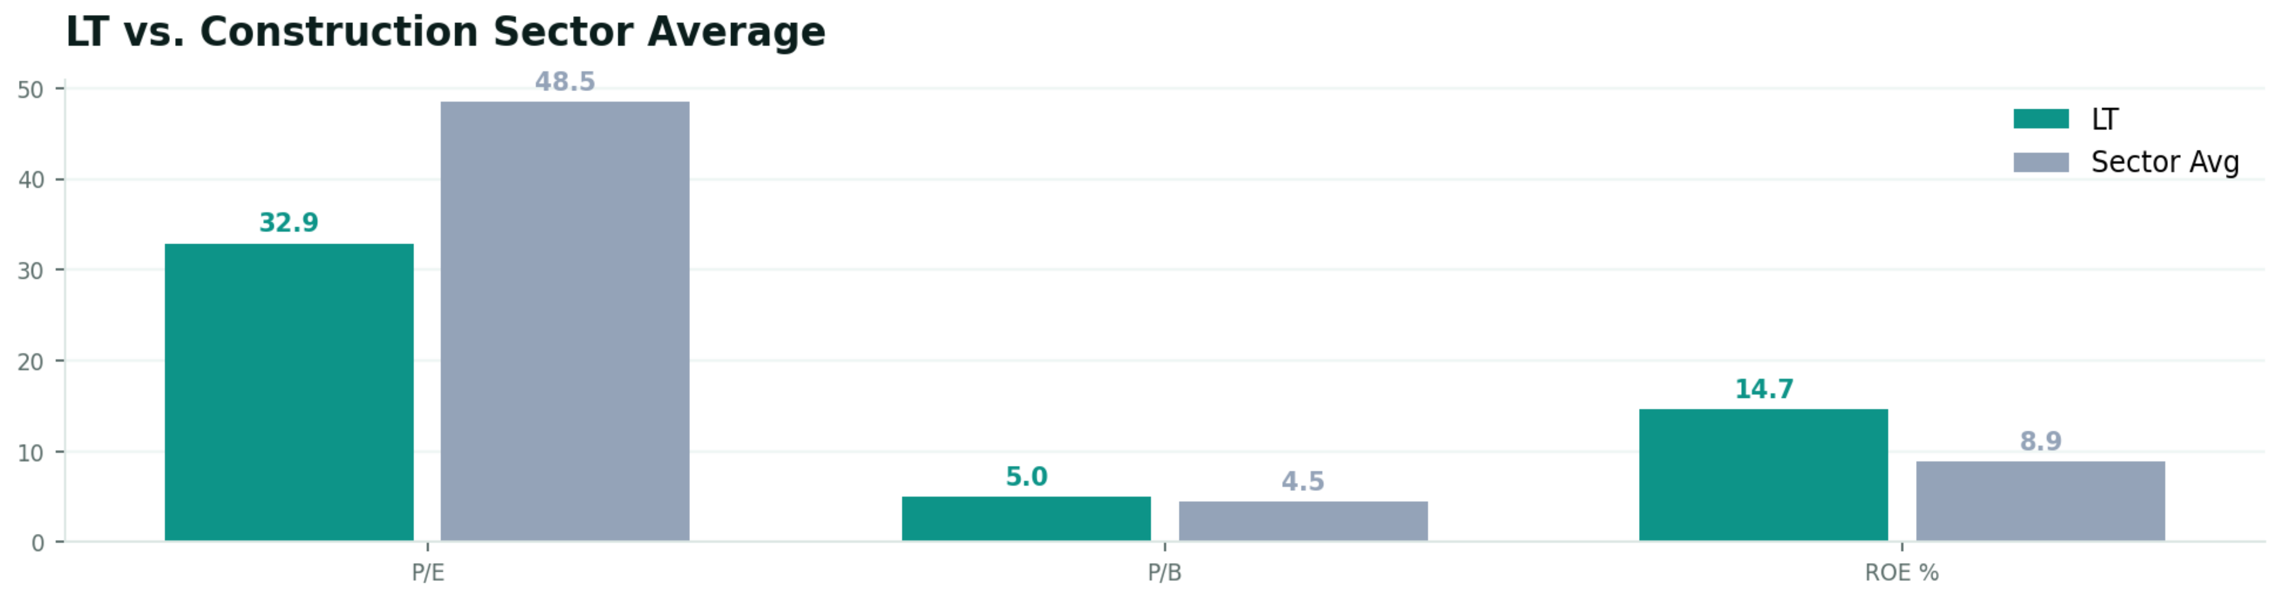
SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Construction



KEY TAKEAWAY › LT's P/E is 32% below its sector average — trading at a discount, which can mean overlooked value or a real, priced-in problem.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

Company	P/E	P/B	ROE	Mkt Cap (Cr)
LT (this stock)	32.9	5.0	14.7%	545,407
RVNL	48.5	4.5	8.9%	44,305

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 1 largest sector peers, RVNL has the highest ROE (8.9%) vs LT's 14.7% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

Peer Positioning Map

KEY TAKEAWAY › LT sits in the quadrant that is cheap and high-quality — often the most interesting quadrant, worth checking why the market hasn't re-rated it, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

KEY TAKEAWAY › Debt-to-Equity of 1.15x is above the ~1x watch level — leverage is a real factor to weigh here.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

STEP 1	STEP 2	STEP 3	STEP 4
STOCK'S OWN MULTIPLES	SECTOR PEER MEDIAN	PREMIUM / DISCOUNT	VERDICT
P/E 32.9x	P/E 48.5x	-32% vs peers	Fairly valued vs peers
From live market price ÷ trailing EPS	Median across 1 Nifty 200 Construction peers with live P/E	Stock's multiple vs. that peer median	Mechanical rule, not a subjective call

WHAT THIS DOES CAPTURE

- Whether the stock is priced richer or cheaper than same-sector peers right now
- A repeatable, mechanical comparison — same rule applied to all 200 stocks

WHAT THIS DOES NOT CAPTURE

- Whether the premium is justified by superior growth, order book, or moat
- The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › LT is flagged **Fairly valued vs peers (P/E, -19%)** because its current multiple sits -32% vs peers — a data comparison, not a judgement on whether that premium is deserved.

→

STEP 3
PEER RANKING
82/100

Estimated rank vs. sector peers, not a price target

→

STEP 4
COMBINED READ
Valuation is in line with its sector peers on this metric.

Insight Score + Valuation Verdict together

KEY TAKEAWAY › Valuation is in line with its sector peers on this metric. — a strong Insight Score combined with a valuation that's -32% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE

- Record order book (Rs 7.79 lakh Cr, ~3 years of revenue) gives unusually high visibility for an industrial stock.
- International order share (>50% of revenue and order book) reduces dependence on the Indian capex cycle alone.
- Defence (shipbuilding, submarines) and green energy (offshore wind) are newer, potentially higher-margin growth avenues.
- ROE has improved from ~11.7% (FY23) to the 14-15% range.

THE BEAR CASE

- EBITDA margin contracted YoY (9.0% vs 9.9%) -- order book growth doesn't automatically mean margin growth.
- Heavy exposure to Middle East order inflows (42% of the quarter) concentrates geopolitical and oil-price-cycle risk.
- US tariff announcements and global capital-goods demand uncertainty were flagged as bear-case risks by brokerages in 2026.
- Valuation (32.9x trailing P/E per this site's own data) is not obviously cheap for a structurally low-margin EPC business.

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
82/100	Fairly valued vs peers	1.15x	—

L&T's investment case rests on a genuinely rare combination for an Indian industrial company: a nearly three-year revenue backlog, a fully professionalized (no-promoter) ownership structure, and a growing international book that reduces reliance on any single country's capex cycle. The counterweight is that L&T's business is structurally low-margin and working-capital intensive -- revenue and order-book headlines can grow smoothly even while margins move the other way, as they did this quarter. This is a stock where the order book tells you about revenue 2-3 years out, but margin trend is the number that actually drives near-term earnings surprises.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
• Debt-to-Equity is worked down from its current 1.15x — meaningful deleveraging would remove the balance-sheet overhang.	• P/E re-rates further above the Construction sector average (48.5x) while ROE stays flat — that would mean the market is pricing in growth the numbers don't yet show. • Net Income growth reverses and turns negative for two consecutive years — the current growth trend is doing a lot of the work in this verdict.

KEY TAKEAWAY › 1 trigger on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

STEP 1	STEP 2	STEP 3	STEP 4
Next Results	**Re-Check**	**Verdict Holds**	**Verdict Updates**
Quarterly earnings / annual report	Walk through the triggers on the prior page, one by one	If nothing on the prior page has moved	If a trigger on the prior page has fired

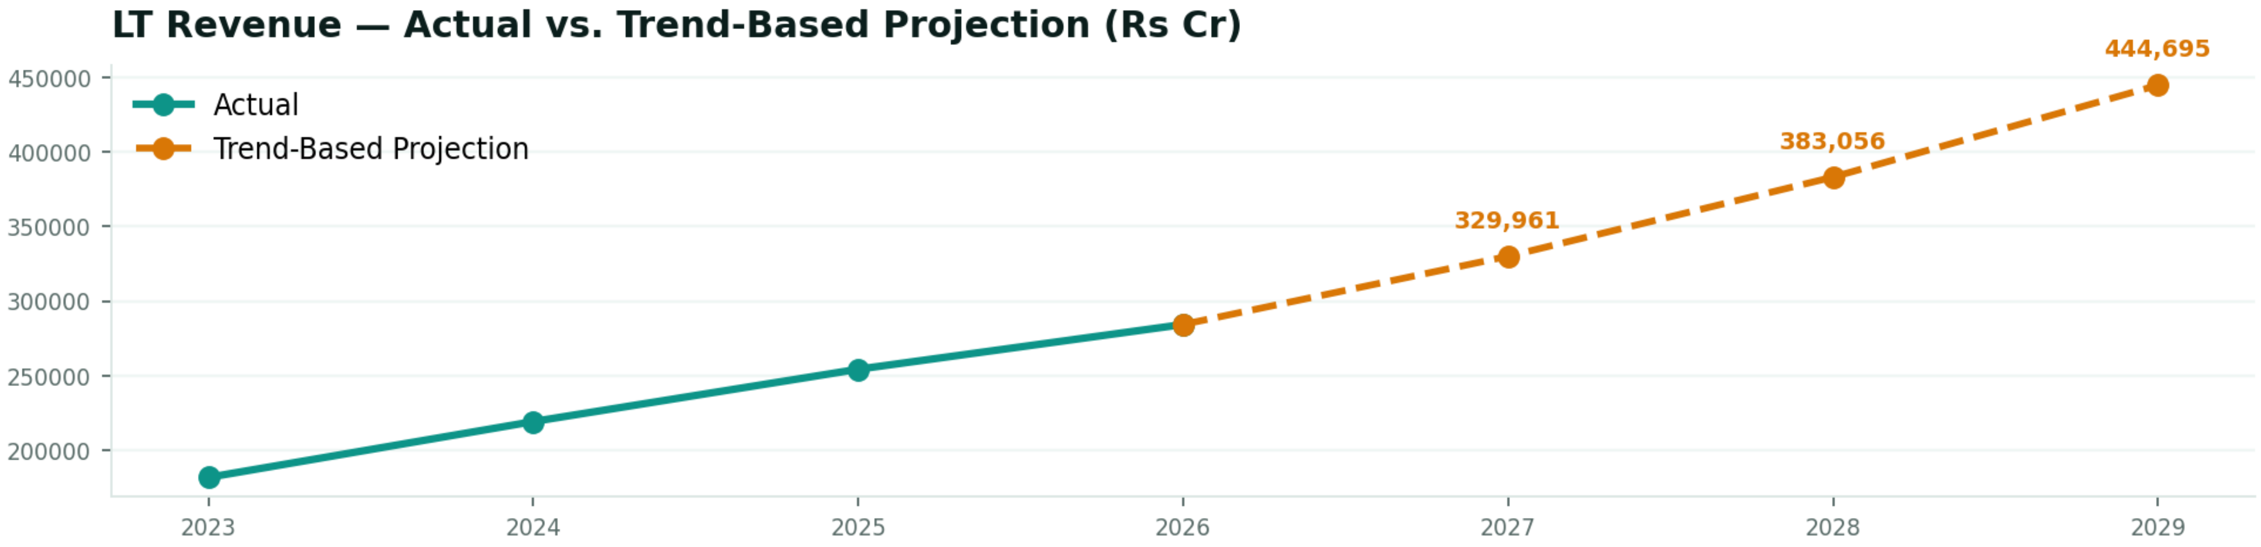
KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time LT reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Metric (Rs Cr)	FY2026 (actual)	FY2027E	FY2028E	FY2029E
Revenue	284,225	329,961	383,056	444,695
Net Income	16,084	18,558	21,413	24,706



Based on a historical Revenue CAGR of +16.1% and Net Income CAGR of +15.4% over the last 3 years.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
CLEAR	**CLEAR**	**CLEAR**	**CLEAR**
Total Debt rising every year	Net margin declining every year	Most recent year negative	Debt-to-Equity above 1.5x

KEY TAKEAWAY › All 4 mechanical checks come back clear — no rising-debt, declining-margin, negative-FCF or elevated-leverage pattern detected. This is not a full risk assessment; always verify independently.

Free Cash Flow (Rs Cr)	18,633	13,750	4,733	11,932
Operating Cash Flow (Rs Cr)	22,777	18,266	9,151	16,741
Capital Expenditure (Rs Cr)	-4,144	-4,517	-4,419	-4,809
ROE	11.72%	15.12%	15.40%	14.72%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for LT — Larsen & Toubro Ltd..
