THE ONE-PAGE READ

# Executive Summary

**TITAN** — Titan Company Ltd.

Expensive vs peers (P/E, +40%)

| INSIGHT SCORE | SECTOR | CURRENT PRICE | COMBINED READ |
|---|---|---|---|
| 46/100 | Consumer Durables | — | Strong profitability |

- 52.9% promoter ownership limits free float and gives the promoter group significant control over strategic decisions.
- Brokerage views are sharply split between bull and bear cases on this stock (see Analyst Perspectives in Section 5 for the specific points on each side).
- Revenue grew at a 29.2% CAGR over the last 3 years of available financial history (see Section 3).

This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

# Key Statistics

| CURRENT PRICE | REPORT DATE | INSIGHT SCORE | MARKET CAP |
|---|---|---|---|
| — | September 2026 | 46/100 | Rs 445,431 Cr |

**Valuation Verdict:** Expensive vs peers (P/E, +40%) · **Model Read:** Strong profitability (ROE), but priced above its sector's typical valuation.

## Titan Company Ltd.

Founded 1984 (a joint venture between the Tata Group and Tamil Nadu Industrial Development Corporation) — India's largest organized jewellery retailer through its Tanishq, Mia, and CaratLane brands, alongside a large watches and wearables business (Titan, Fastrack, Sonata) and a growing eyewear business (Titan Eye+). Jewellery is by far the largest and fastest-growing segment, benefiting from continued market-share gains from India's large unorganized (non-branded) jewellery sector..

- **Jewellery (Tanishq, Mia, CaratLane)**
- **Watches & Wearables**
- **Eyecare (Titan Eye+)**
- **Emerging Businesses (fragrances, sarees)**

A full company profile, shareholding pattern, segment breakdown and industry context follow in Section 2 of this report.

# Company Profile

| COMPANY AGE | HEADQUARTERS | BUSINESS SEGMENTS | INDEX MEMBERSHIP |
|---|---|---|---|
| 42 years | Bengaluru, Karnataka, India | 4 | Nifty 200 |

### OWNERSHIP

Tata Sons and related Tata Group entities hold a controlling promoter stake of roughly 52.9%, unchanged over the past several quarters. Foreign Institutional Investors hold about 15.4% (across 949 FIIs), Mutual Funds ~8.7%, Insurance companies ~4.5%, other Domestic Institutions ~2.1%, and non-institutional/public investors the remaining ~16.4% (over 732,000 individual shareholders). Veteran investor Rekha Jhunjhunwala holds the largest individual stake at roughly 4.24%.

### OPERATIONS

India's largest organized jewellery retailer through its Tanishq, Mia, and CaratLane brands, alongside a large watches and wearables business (Titan, Fastrack, Sonata) and a growing eyewear business (Titan Eye+). Jewellery is by far the largest and fastest-growing segment, benefiting from continued market-share gains from India's large unorganized (non-branded) jewellery sector.

Sources: MarketsMojo — Titan Company Shareholding (Jun 2026)

# Shareholding Pattern

| | |
|---|---|
| **Promoter (Tata Sons & related entities)** | 52.9% |
| **FII (Foreign Institutions)** | 15.4% |
| **Public / Non-Institutional** | 16.4% |
| **Mutual Funds** | 8.7% |
| **Insurance Companies** | 4.5% |
| **Other DII** | 2.1% |

Key Named Investors

| Investor | Holding | Note |
|---|---|---|
| Tata Sons & related Tata Group entities | ~52.9% combined | Controlling promoter stake, unchanged for several quarters |
| Rekha Jhunjhunwala | ~4.24% | Largest individual (non-promoter) shareholder, a long-time high-profile holder of the stock |

Sources: MarketsMojo — Titan Company Shareholding (Jun 2026)

**KEY TAKEAWAY ›** Titan's Tata Group backing is often cited by analysts as a governance and brand-trust advantage in jewellery retail specifically, where consumer trust in purity/quality is a bigger differentiator than in most other retail categories.

# Industry Context

Titan's Q1 FY27 results (reported August 2026) showed net profit up a sharp 62.9% YoY to Rs 1,777 Cr, well ahead of street estimates (~Rs 1,267 Cr), on revenue of Rs 21,356 Cr (+29.3% YoY, though down 20.7% sequentially due to seasonality). PBIDT grew 57% YoY to Rs 3,038 Cr. The jewellery business (excluding bullion and digital gold) grew a strong 43% YoY to Rs 18,253 Cr, while watches grew 21% to Rs 1,543 Cr and the eyecare business grew 21% to Rs 289 Cr. The company added 33 new stores in the quarter (including 4 Tanishq, 17 Mia, 1 beYon, and 11 CaratLane outlets domestically, plus 2 new Tanishq stores in the GCC region). Management highlighted 40% YoY growth in "consumer businesses" driven by innovation and design differentiation.

Sources: Titan Q1 FY27 Results — Business Standard

**KEY TAKEAWAY ›** The 43% jewellery growth is the number that matters most for this stock -- it's both Titan's largest segment and the one most exposed to gold price swings, since higher gold prices can inflate revenue growth even without matching growth in volume/grams sold.

COMPETITIVE LANDSCAPE

# Industry Context

| Player | Category | Position vs. TITAN |
|---|---|---|
| Kalyan Jewellers | Large organized jewellery retailer | A faster-growing but smaller-scale competitor in the organized jewellery segment; often compared to Titan on store-expansion pace and same-store-sales growth. |
| Malabar Gold & Diamonds | Large jewellery retailer (unlisted) | A major private competitor in the organized jewellery space, particularly strong in South India. |
| Local/unorganized jewellers | India's traditional jewellery trade | Collectively still control the majority of India's ~Rs 6 lakh crore jewellery market; Titan's core long-term growth thesis is continued share gains from this unorganized base, with Tanishq holding roughly 7-8% of the total market. |

Sources: Univest — Titan Company Share Price Target 2026

**KEY TAKEAWAY ›** Titan's real competitive story isn't primarily other listed jewellers -- it's the ongoing formalization of India's jewellery market, where organized players like Tanishq are still a small fraction of a very large, still mostly-unorganized industry.

BOARD & SENIOR MANAGEMENT ROSTER

# Leadership

| | |

SECTION 3

# Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

# Financial Snapshot

| P/E RATIO | P/B RATIO | RETURN ON EQUITY |
|---|---|---|
| 77.4x | 28.4x | 32.3% |

| | |
|---|---|
| **P/E Ratio** | Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone. |
| **P/B Ratio** | Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets. |
| **Return on Equity (ROE)** | How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business. |

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

# Financial History (last 4 years)

| Metric (Rs Cr) | FY2023 | FY2024 | FY2025 | FY2026 |
|---|---|---|---|---|
| Total Revenue | 40,447 | 50,936 | 60,298 | 87,305 |
| Net Income | 3,250 | 3,496 | 3,337 | 5,073 |
| EBITDA | 5,188 | 5,826 | 6,181 | 8,807 |
| Total Debt | 9,367 | 15,528 | 20,777 | 30,621 |
| Stockholders Equity | 11,851 | 9,393 | 11,624 | 15,703 |
| Free Cash Flow | 938 | 1,004 | -1,035 | 4,688 |
| ROE | 27.4% | 37.2% | 28.7% | 32.3% |

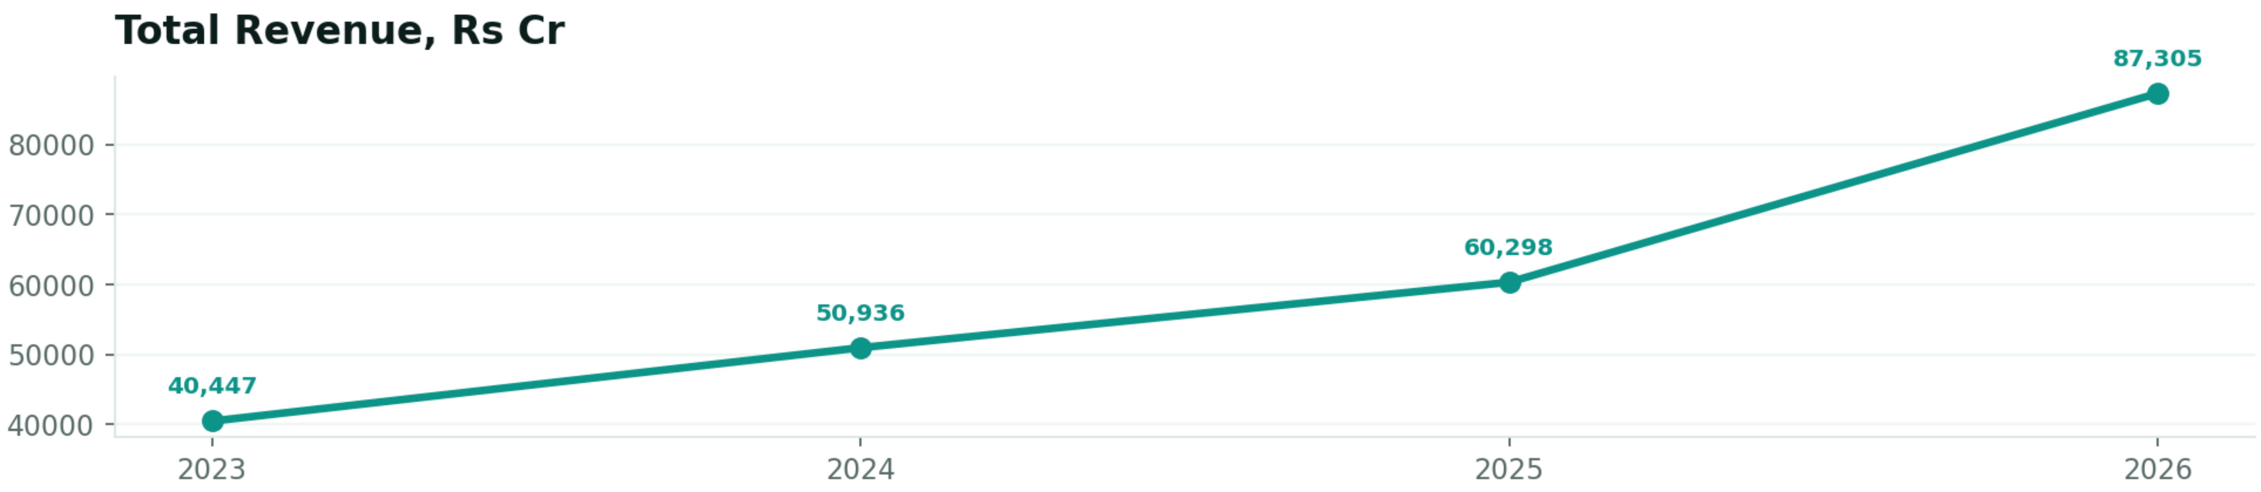
Year-over-year growth

| YoY Growth | FY2024 | FY2025 | FY2026 |
|---|---|---|---|
| Revenue Growth | +25.9% | +18.4% | +44.8% |
| Net Income Growth | +7.6% | -4.5% | +52.0% |

**KEY TAKEAWAY ›** Revenue grew at a 29.2% CAGR and Net Income at a 16.0% CAGR over the last 3 years of available data — revenue outpaced profit growth, suggesting margin pressure.

FINANCIAL TREND ANALYSIS 1 OF 4

# Revenue Trend

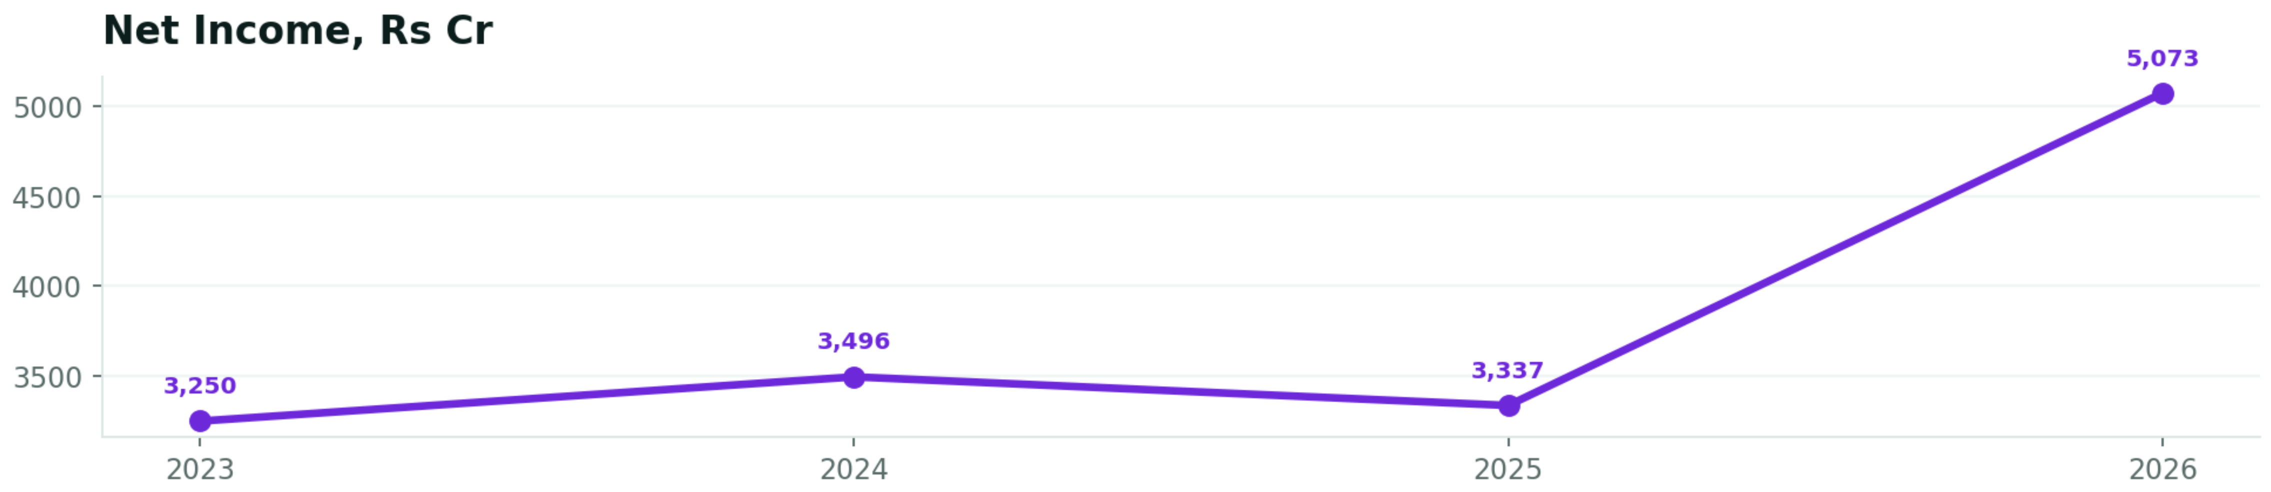


- Revenue grew 116% cumulatively from FY2023 to FY2026 (Rs 40,447 Cr → Rs 87,305 Cr), a 29.2% CAGR over 3 years.
- Growth has been uneven year to year (from +18.4% to +44.8%), rather than a smooth trend — consistent with lumpy, order-book-driven revenue recognition typical of capital-intensive project businesses.

**KEY TAKEAWAY ›** TITAN's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

# Profitability Trend

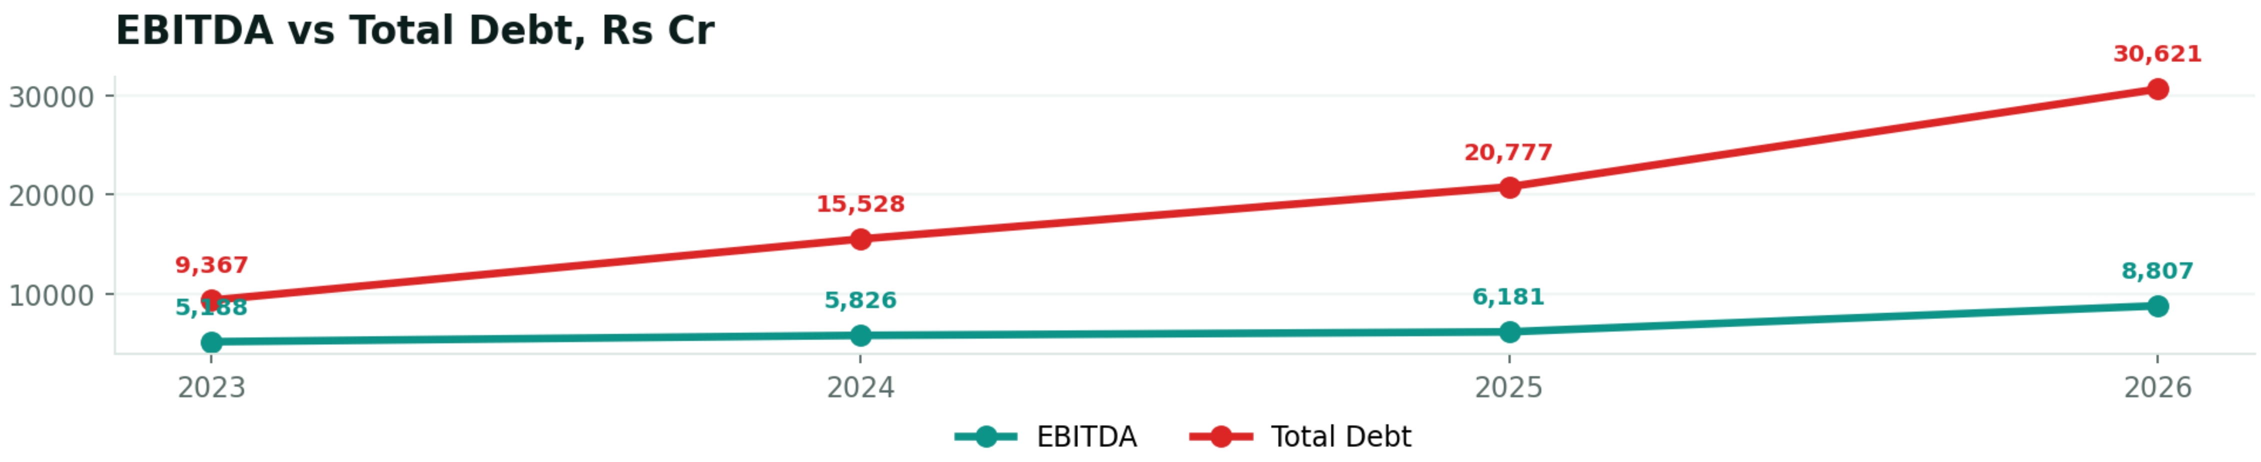


- Net margin moved from 8.0% in FY2023 to 5.8% in FY2026 — compressing profitability on each rupee of revenue.
- Net Income CAGR (16.0%) has lagged Revenue CAGR (29.2%) — revenue growth is not yet converting proportionally into bottom-line growth.

**KEY TAKEAWAY ›** Net Income for TITAN across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

# Operating Profit vs. Leverage



- EBITDA margin moved from 12.8% to 10.1% over the period — pressure on core operating efficiency, independent of one-off items.
- Total Debt has risen 227% over the period (Rs 9,367 Cr → Rs 30,621 Cr) while EBITDA grew — the operating profit base has kept pace with rising leverage.
- At the latest EBITDA of Rs 8,807 Cr against Rs 30,621 Cr of debt, it would take roughly 3.5 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

**KEY TAKEAWAY ›** EBITDA (operating profit) plotted against Total Debt for TITAN — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

# Return on Equity Trend

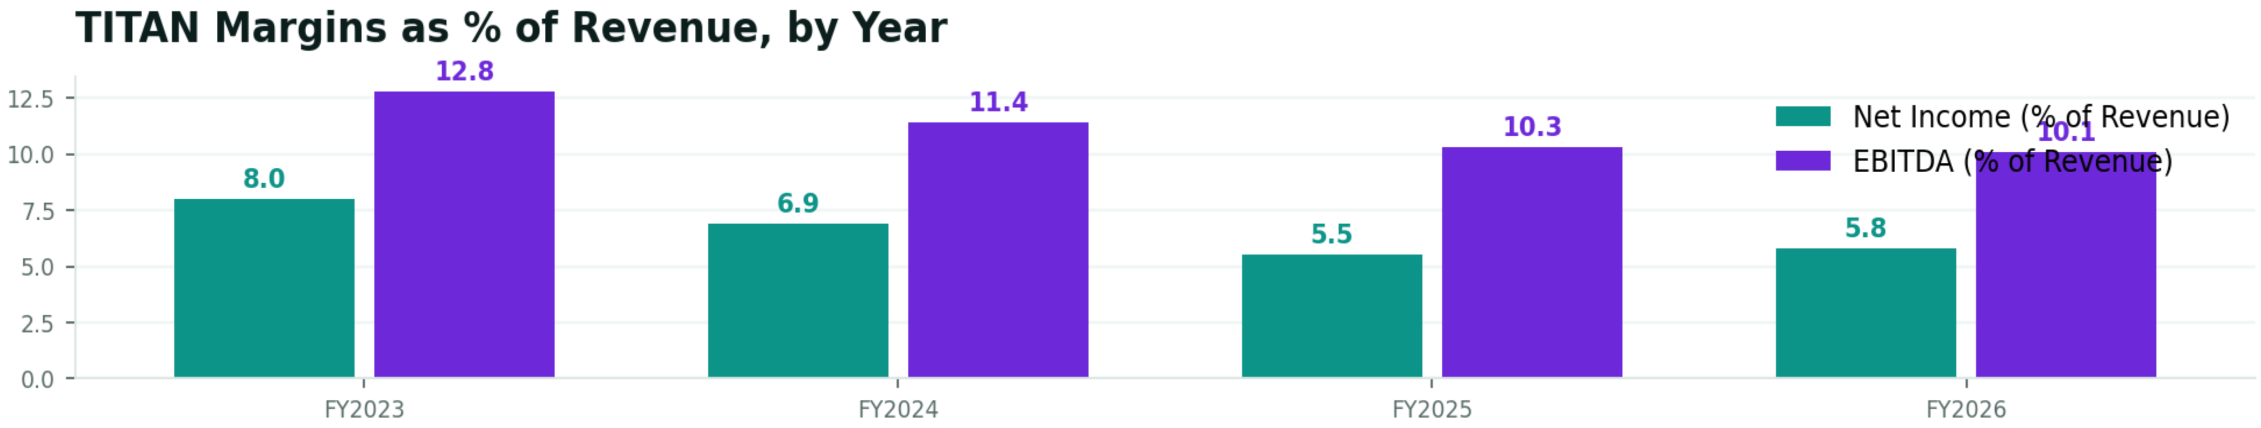
- ROE moved from 27.4% to 32.3% over FY2023-FY2026 — a meaningful improvement in how efficiently shareholder capital is being turned into profit.
- Shareholder Equity grew 33% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 31.4% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

**KEY TAKEAWAY ›** TITAN's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

# Common-Size Statement (% of Revenue) (1/2)

**What is this?** A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.



**KEY TAKEAWAY ›** EBITDA margin moved from 12.8% of revenue in FY2023 to 10.1% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

# Common-Size Statement (% of Revenue) (2/2)

| % of Revenue | FY2023 | FY2024 | FY2025 | FY2026 |
|---|---|---|---|---|
| Net Income | 8.0% | 6.9% | 5.5% | 5.8% |
| EBITDA | 12.8% | 11.4% | 10.3% | 10.1% |
| Total Debt | 23.2% | 30.5% | 34.5% | 35.1% |
| Stockholders Equity | 29.3% | 18.4% | 19.3% | 18.0% |
| Total Assets | 66.8% | 61.9% | 67.4% | 69.4% |
| Operating Cash Flow | 3.4% | 3.3% | -0.9% | 6.4% |

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

**KEY TAKEAWAY ›** Total Debt moved from 23.2% of revenue to 35.1% over this period (+11.9 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

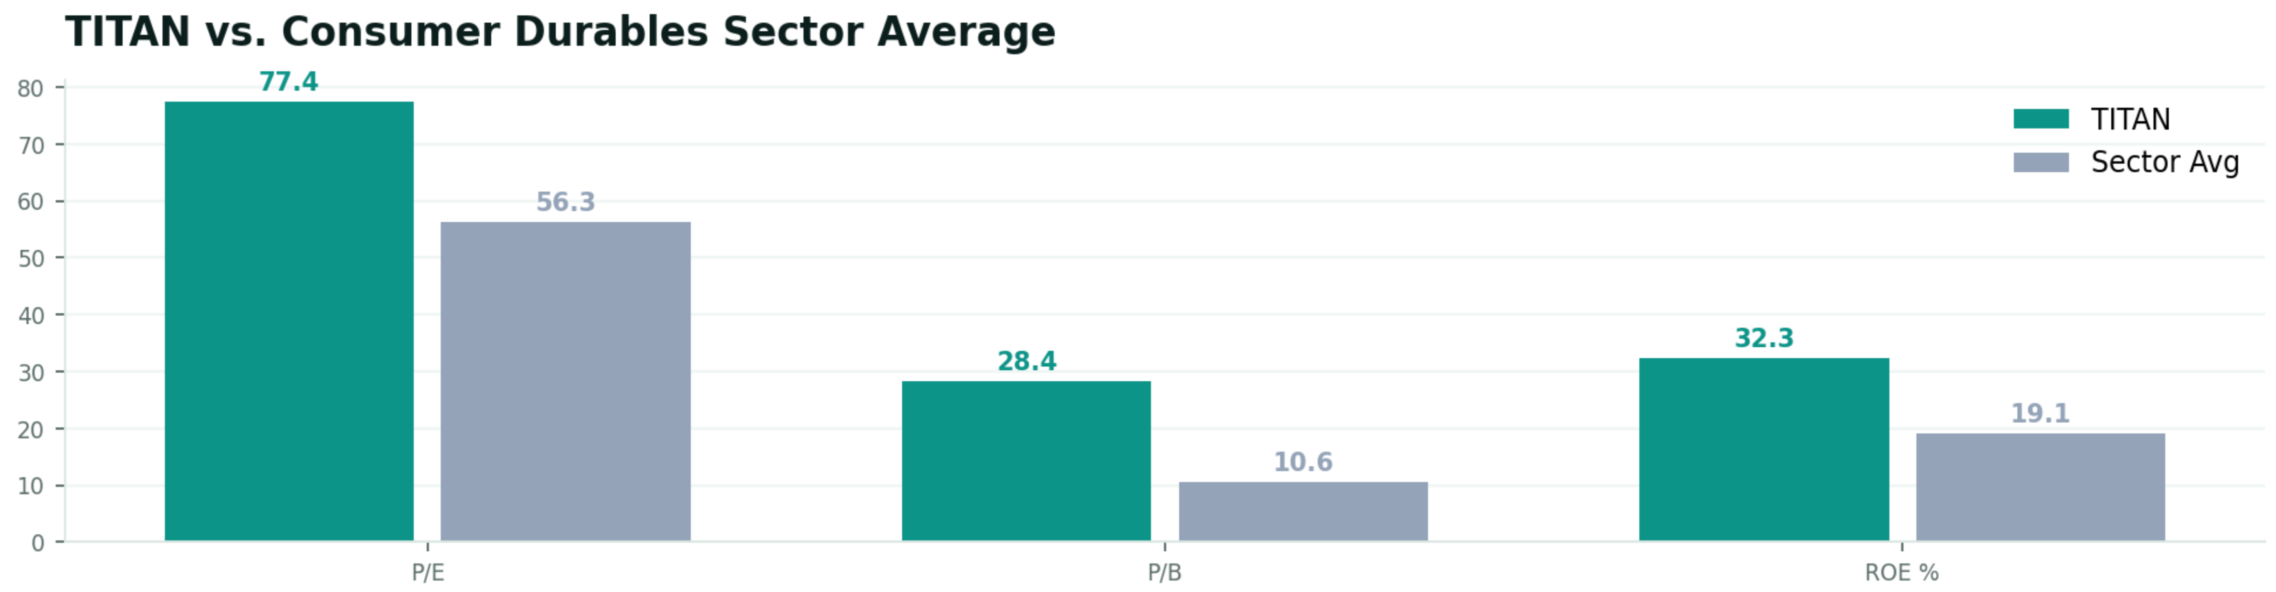
SECTION 4

# Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

# Sector Comparison — Consumer Durables



**KEY TAKEAWAY ›** TITAN's P/E is 37% above its sector average — trading at a premium the market is paying for something (growth, order book, quality) not yet visible in trailing ratios.

*Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.*

# Competitor Benchmark

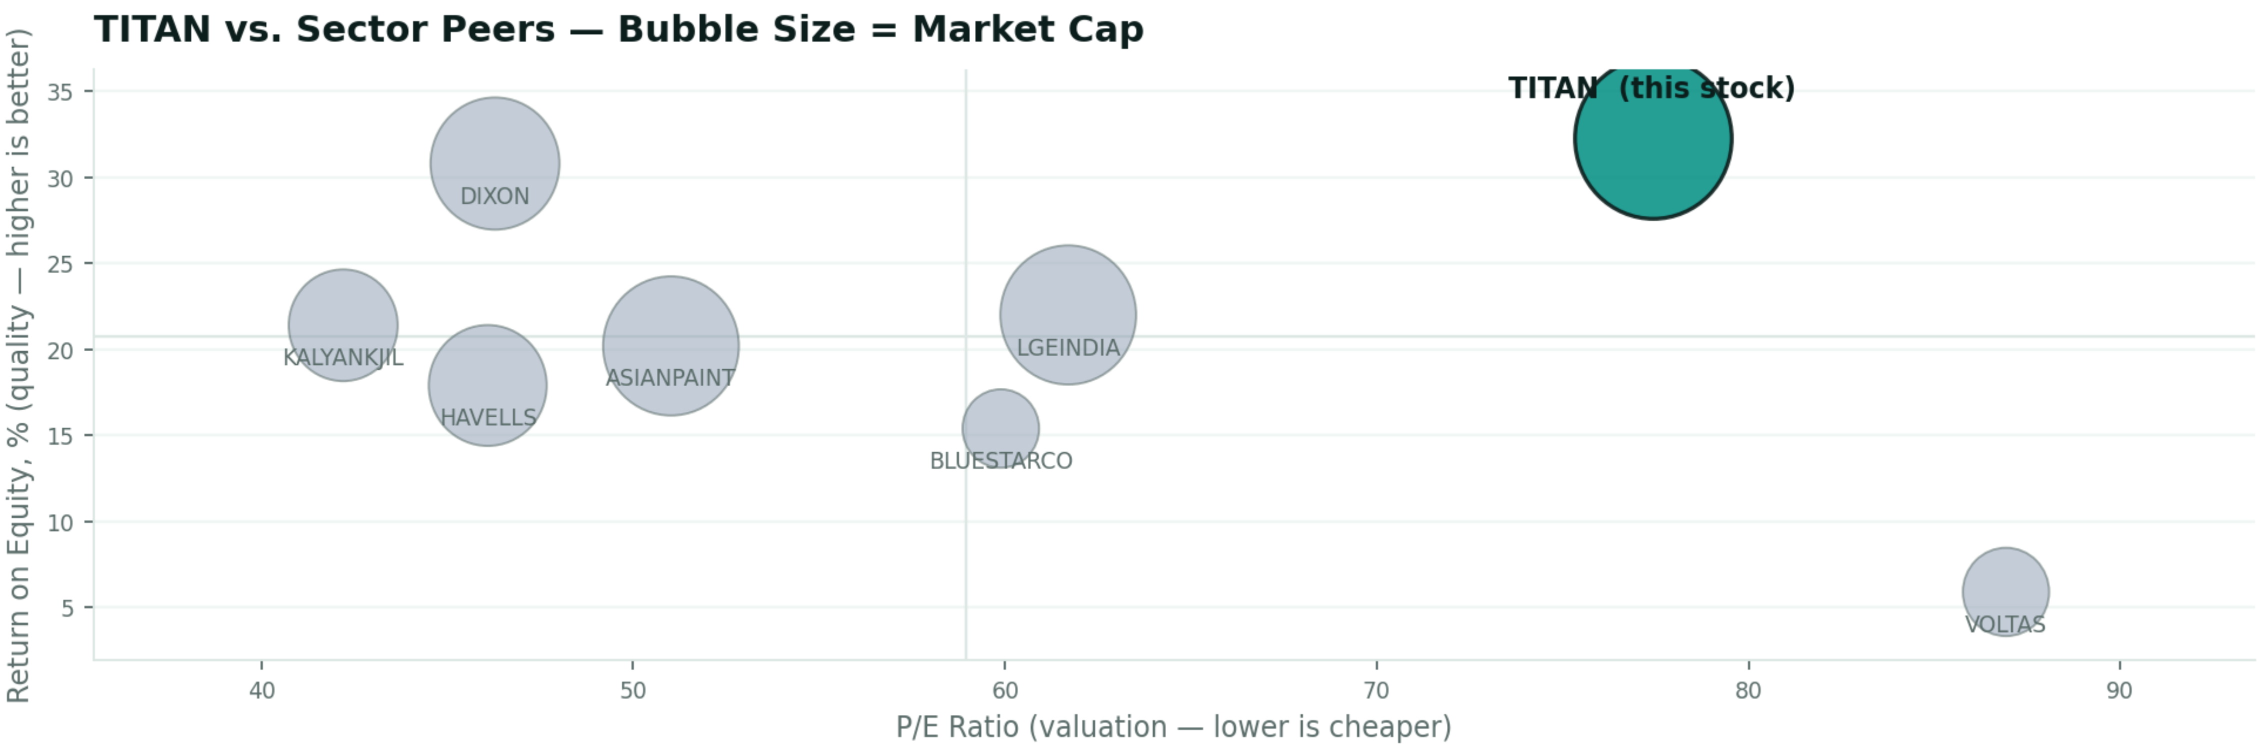
| Company | P/E | P/B | ROE | Mkt Cap (Cr) |
|---|---|---|---|---|
| **TITAN (this stock)** | 77.4 | 28.4 | 32.3% | 445,431 |
| ASIANPAINT | 51.0 | 11.3 | 20.2% | 242,278 |
| LGEINDIA | 61.7 | 14.5 | 22.0% | 111,319 |
| DIXON | 46.3 | 15.9 | 30.8% | 86,582 |
| HAVELLS | 46.1 | 7.7 | 17.9% | 72,421 |
| KALYANKJIL | 42.2 | 9.8 | 21.4% | 61,841 |
| VOLTAS | 86.9 | 6.1 | 5.9% | 38,714 |

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

**KEY TAKEAWAY ›** Among its 7 largest sector peers, DIXON has the highest ROE (30.8%) vs TITAN's 32.3% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

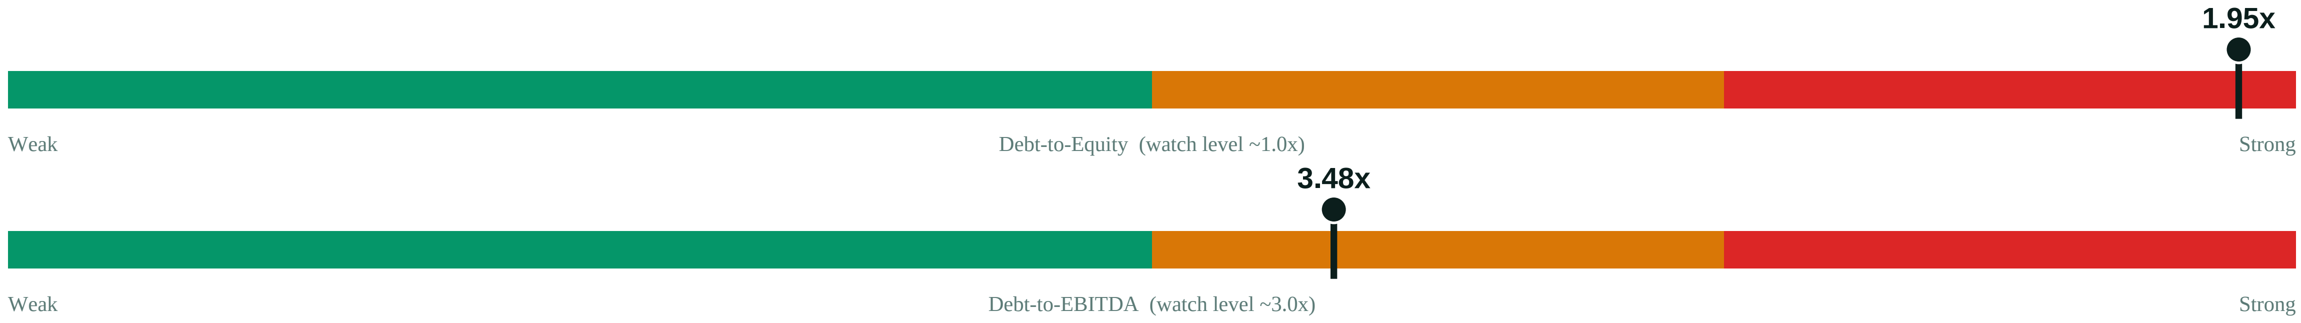
# Peer Positioning Map



**KEY TAKEAWAY ›** TITAN sits in the quadrant that is expensive and high-quality — the market is paying up for demonstrated returns, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

# Leverage & Solvency Ratios



Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

**KEY TAKEAWAY ›** Debt-to-Equity of 1.95x is above the ~1x watch level — leverage is a real factor to weigh here.

*Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.*

SECTION 5

# Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

# Valuation Detail

| STEP 1 | STEP 2 | STEP 3 | STEP 4 |
|---|---|---|---|
| STOCK'S OWN MULTIPLES | SECTOR PEER MEDIAN | PREMIUM / DISCOUNT | VERDICT |
| P/E 77.4x | P/E 56.3x | +37% vs peers | Expensive vs peers |
| From live market price ÷ trailing EPS | Median across 7 Nifty 200 Consumer Durables peers with live P/E | Stock's multiple vs. that peer median | Mechanical rule, not a subjective call |

## WHAT THIS DOES CAPTURE

- Whether the stock is priced richer or cheaper than same-sector peers right now
- A repeatable, mechanical comparison — same rule applied to all 200 stocks

## WHAT THIS DOES NOT CAPTURE

- Whether the premium is justified by superior growth, order book, or moat
- The company's own valuation history — only today's peer snapshot

**KEY TAKEAWAY ›** TITAN is flagged **Expensive vs peers (P/E, +40%)** because its current multiple sits +37% vs peers — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

# Why This Verdict

Weak — Insight Score (0 = Weakest, 100 = Strongest) — Strong

**STEP 1**
**INPUT FEATURES**
**Fundamentals**
Profitability, debt trend, capex pattern, growth

→

**STEP 2**
**ML MODEL**
**Trained on history**
Learns patterns in past company fundamentals

→

**STEP 3**
**PEER RANKING**
**46/100**
Estimated rank vs. sector peers, not a price target

→

**STEP 4**
**COMBINED READ**
**Strong profitability**
Insight Score + Valuation Verdict together

**KEY TAKEAWAY ›** Strong profitability (ROE), but priced above its sector's typical valuation. — a middling Insight Score combined with a valuation that's +37% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

# Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

## THE BULL CASE

- Jewellery growth (43% YoY) and a strong earnings beat show Tanishq and the broader jewellery portfolio continuing to gain share from unorganized players.
- CaratLane's digital-first model is reported to be growing 30%+ with over 250 stores, a meaningful growth engine layered on top of the core Tanishq business.
- Mia's women-focused, younger-skewing positioning targets a demographic that Tanishq alone doesn't fully capture.
- Tata Group backing supports consumer trust in a category (jewellery) where purity and authenticity concerns matter more than most retail segments.

## THE BEAR CASE

- Jewellery revenue growth is partly gold-price-driven -- a slowdown or correction in gold prices could flatter the comparison base and slow reported growth even if underlying volumes hold up.
- US reciprocal tariff announcements (26%, from April 2026) were flagged by analysts as a source of FII outflows and earnings estimate revision risk across large-caps including Titan.
- Persistent macro uncertainty could delay discretionary consumer spending on jewellery, which is a considered, big-ticket purchase for most Indian households.
- Competition from the still-large unorganized jewellery sector limits the pace at which Titan can gain further market share.

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

# Our Take

| INSIGHT SCORE | VALUATION | LEVERAGE (D/E) | ORDER BOOK |
| --- | --- | --- | --- |
| **46/100** | **Expensive vs peers** | **1.95x** | **—** |

Titan's Q1 FY27 beat expectations by a wide margin, powered mainly by jewellery, where growth is flattered somewhat by gold prices but still shows real momentum in store expansion and market-share gains from the unorganized sector. New MD Ajoy Chawla inherits a business performing well on paper, but the bear case (macro headwinds, tariff-driven uncertainty, gold-price sensitivity) is real and largely external to Titan's own execution. This is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

# What Would Change Our View (1/2)

| WOULD MAKE US MORE POSITIVE | WOULD MAKE US MORE CAUTIOUS |
|---|---|
| • P/E compresses toward the Consumer Durables sector average (currently 56.3x vs. TITAN's 77.4x) without a matching drop in earnings — the premium would then be paid for, not merely priced in.<br><br>• Debt-to-Equity is worked down from its current 1.95x — meaningful deleveraging would remove the balance-sheet overhang. | • Net Income growth reverses and turns negative for two consecutive years — the current growth trend is doing a lot of the work in this verdict. |

**KEY TAKEAWAY ›** 2 triggers on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

# What Would Change Our View (2/2)

| STEP 1 | STEP 2 | STEP 3 | STEP 4 |
|---|---|---|---|
| **Next Results** | **Re-Check** | **Verdict Holds** | **Verdict Updates** |
| Quarterly earnings / annual report | Walk through the triggers on the prior page, one by one | If nothing on the prior page has moved | If a trigger on the prior page has fired |

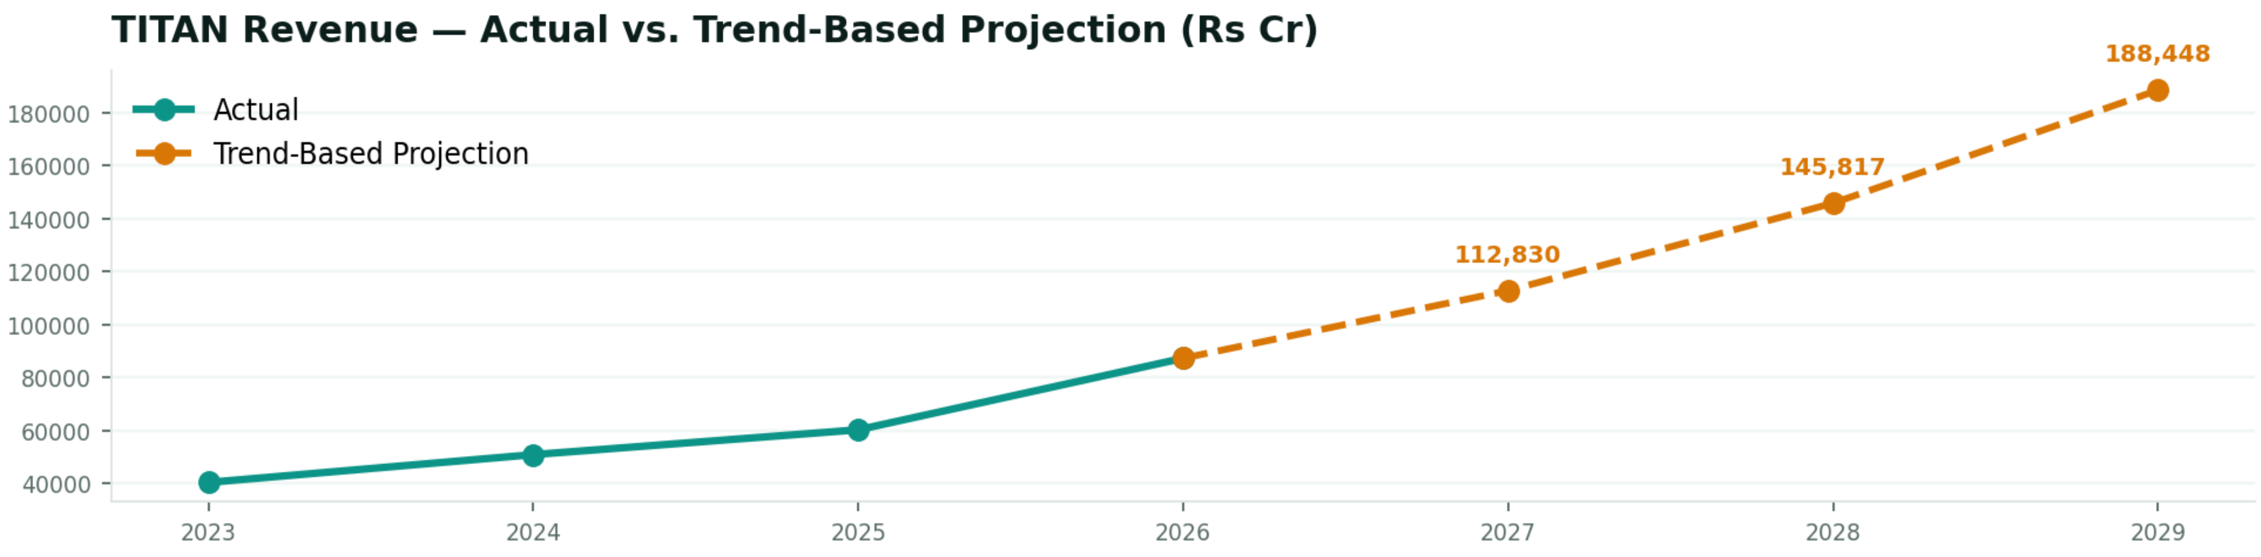
**KEY TAKEAWAY ›** None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time TITAN reports results.

# 3-Year Trend-Based Forecast

**This is not a professional forecast or a DCF model.** It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

| Metric (Rs Cr) | FY2026 (actual) | FY2027E | FY2028E | FY2029E |
|---|---|---|---|---|
| Revenue | 87,305 | 112,830 | 145,817 | 188,448 |
| Net Income | 5,073 | 5,885 | 6,826 | 7,919 |



Based on a historical Revenue CAGR of +29.2% and Net Income CAGR of +16.0% over the last 3 years.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

# Risk Flags

| DEBT TREND | MARGIN TREND | FREE CASH FLOW | LEVERAGE |
|---|---|---|---|
| **FLAGGED** | **CLEAR** | **CLEAR** | **FLAGGED** |
| Total Debt rising every year | Net margin declining every year | Most recent year negative | Debt-to-Equity above 1.5x |

- Total Debt has risen every year for the last 4 years of available data.
- Debt-to-Equity is elevated at 1.95x.

These are mechanical checks on the numbers above, not a professional risk assessment.

| Total Assets (Rs Cr) | 27,023 | 31,550 | 40,647 | 60,561 |
| Free Cash Flow (Rs Cr) | 938 | 1,004 | -1,035 | 4,688 |
| Operating Cash Flow (Rs Cr) | 1,370 | 1,695 | -541 | 5,590 |
| Capital Expenditure (Rs Cr) | -432 | -691 | -494 | -902 |
| ROE | 27.42% | 37.22% | 28.71% | 32.31% |

# Glossary & Methodology

**P/E Ratio** — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

**P/B Ratio** — Price-to-Book: share price divided by book value (net worth) per share.

**ROE** — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

**EBITDA** — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

**Free Cash Flow** — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

**Debt-to-Equity** — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

**Debt-to-EBITDA** — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

**CAGR** — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

**Common-Size Statement** — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

**Insight Score** — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

> **Data & methodology, in brief:** financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

# Thank you.

This concludes the ClearStocks Company Deck for TITAN — Titan Company Ltd..
