Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
—x	—x	—

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 4 years)

Metric (Rs Cr)	FY2023	FY2024	FY2025	FY2026
Total Revenue	53,134	42,599	46,262	51,303
Net Income	3,570	-1,200	897	1,922
EBITDA	10,681	4,054	6,811	9,254
Total Debt	23,939	29,754	25,099	23,576
Stockholders Equity	29,844	27,793	32,199	34,696
Free Cash Flow	5,391	326	8,456	5,449
ROE	12.0%	-4.3%	2.8%	5.5%

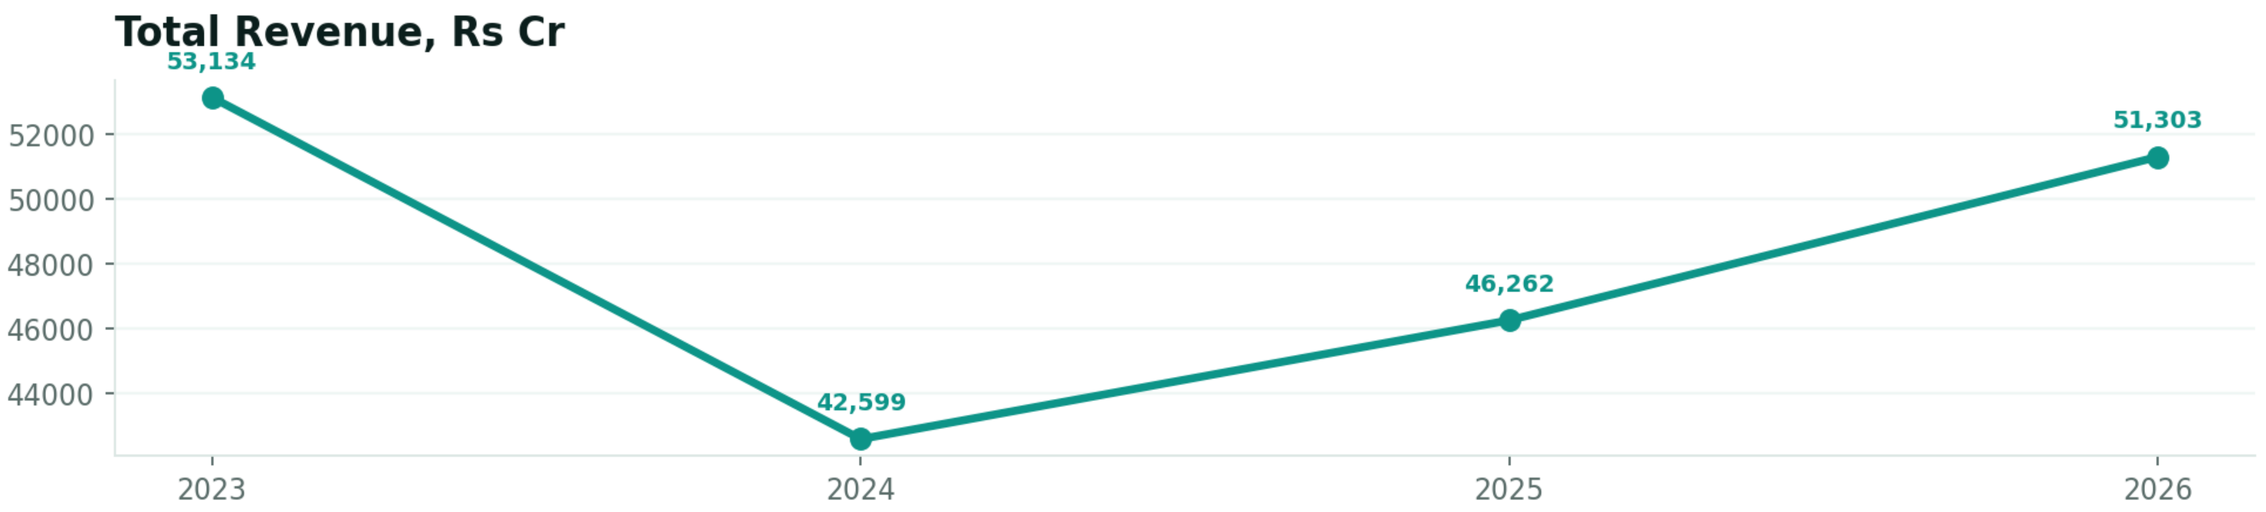
Year-over-year growth

YoY Growth	FY2024	FY2025	FY2026
Revenue Growth	-19.8%	+8.6%	+10.9%
Net Income Growth	-133.6%	+174.8%	+114.3%

KEY TAKEAWAY › Revenue grew at a -1.2% CAGR and Net Income at a -18.6% CAGR over the last 3 years of available data — revenue outpaced profit growth, suggesting margin pressure.

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

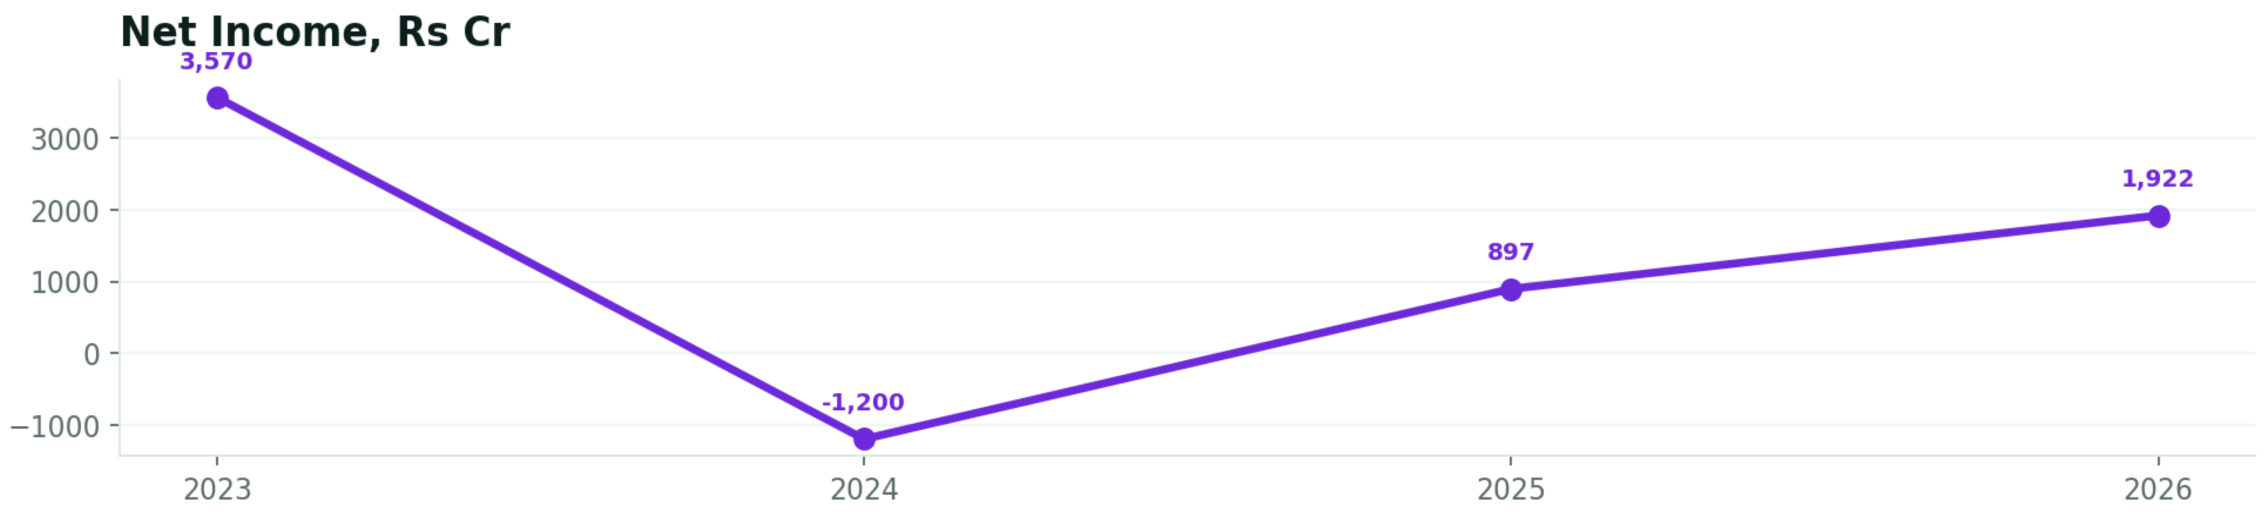


- Revenue grew -3% cumulatively from FY2023 to FY2026 (Rs 53,134 Cr → Rs 51,303 Cr), a -1.2% CAGR over 3 years.
- Growth has accelerated every year — FY2024 at -19.8% up to FY2026 at +10.9% — a sign of building, not fading, momentum.

KEY TAKEAWAY › UPL's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend



- Net margin moved from 6.7% in FY2023 to 3.7% in FY2026 — compressing profitability on each rupee of revenue.
- Net Income CAGR (-18.6%) has lagged Revenue CAGR (-1.2%) — revenue growth is not yet converting proportionally into bottom-line growth.
- Profit dipped in FY2024 (Rs -1,200 Cr) before recovering — a single weak year rather than a multi-year decline.

KEY TAKEAWAY › Net Income for UPL across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

- EBITDA margin moved from 20.1% to 18.0% over the period — pressure on core operating efficiency, independent of one-off items.
- Total Debt has fallen 2% over the period (Rs 23,939 Cr → Rs 23,576 Cr) while EBITDA shrank — the balance sheet is deleveraging in absolute terms.
- At the latest EBITDA of Rs 9,254 Cr against Rs 23,576 Cr of debt, it would take roughly 2.5 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for UPL — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

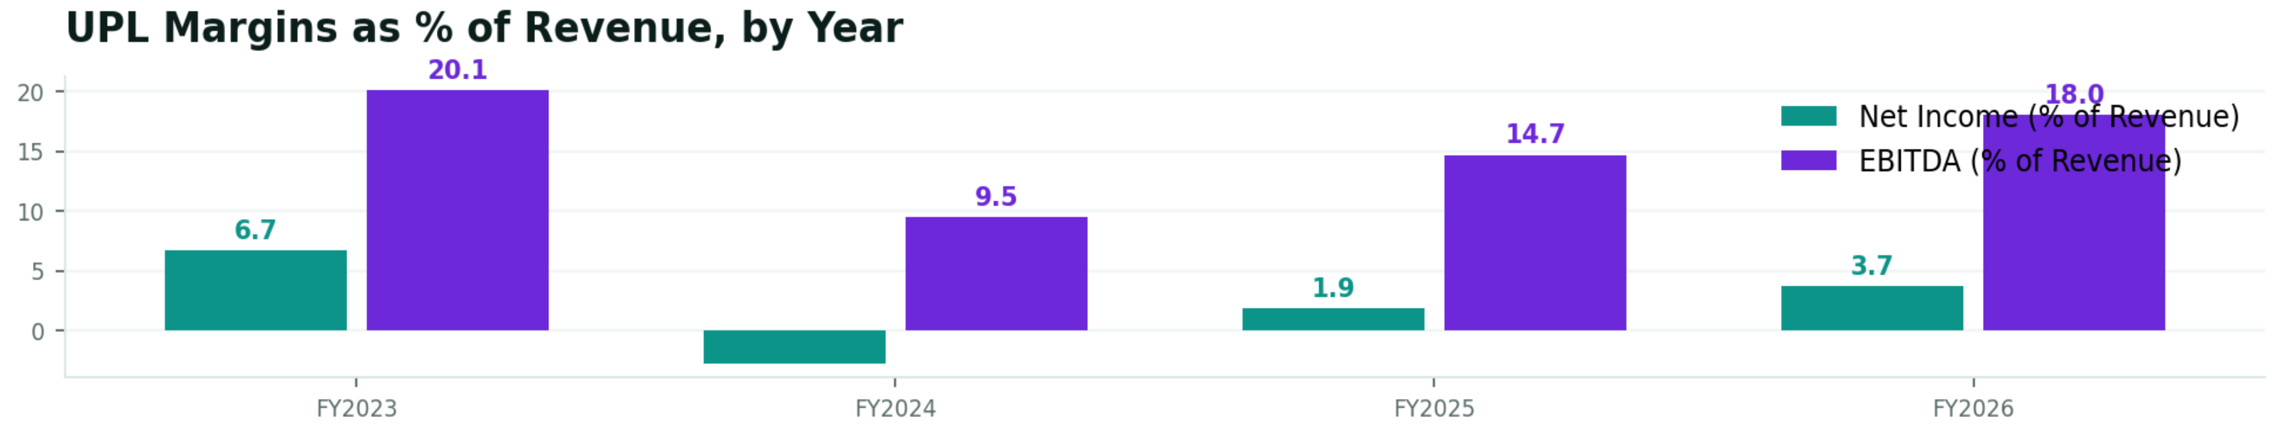
- ROE moved from 12.0% to 5.5% over FY2023-FY2026 — a decline in capital efficiency worth investigating alongside the margin trend.
- Shareholder Equity grew 16% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 4.0% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › UPL's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.



KEY TAKEAWAY › EBITDA margin moved from 20.1% of revenue in FY2023 to 18.0% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2023	FY2024	FY2025	FY2026
Net Income	6.7%	-2.8%	1.9%	3.7%
EBITDA	20.1%	9.5%	14.7%	18.0%
Total Debt	45.1%	69.8%	54.3%	46.0%
Stockholders Equity	56.2%	65.2%	69.6%	67.6%
Total Assets	166.7%	205.5%	190.2%	185.6%
Operating Cash Flow	14.6%	5.4%	21.9%	15.3%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

KEY TAKEAWAY › Total Debt moved from 45.1% of revenue to 46.0% over this period (+0.9 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

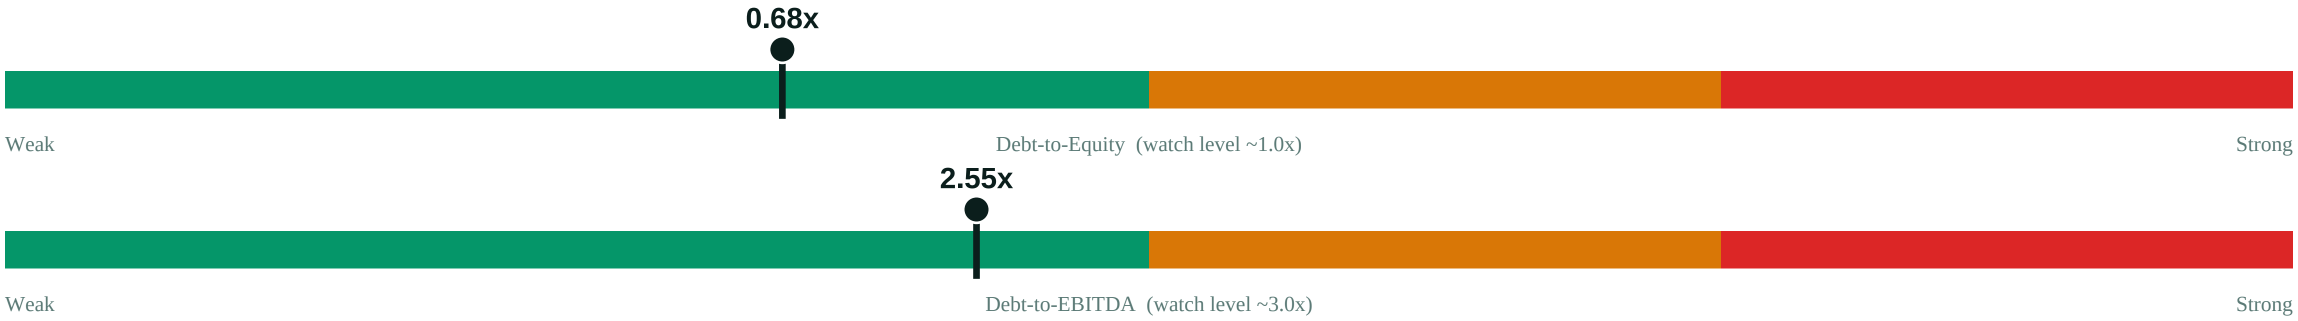
SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Leverage & Solvency Ratios

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios



Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

KEY TAKEAWAY › Debt-to-Equity of 0.68x is below the ~1x watch level — leverage looks manageable on this measure alone.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

STOCK'S OWN MULTIPLES	SECTOR PEER MEDIAN	PREMIUM / DISCOUNT	VERDICT
P/E —x	—	—	Not yet scored
From live market price ÷ trailing EPS	Median across 0 Nifty 200 Chemicals peers	Stock's multiple vs. that peer median	Mechanical rule, not a subjective call

WHAT THIS DOES CAPTURE

- Whether the stock is priced richer or cheaper than same-sector peers right now
- A repeatable, mechanical comparison — same rule applied to all 200 stocks

WHAT THIS DOES NOT CAPTURE

- Whether the premium is justified by superior growth, order book, or moat
- The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › UPL is flagged **Not yet scored** because its current multiple sits — — a data comparison, not a judgement on whether that premium is deserved.

Why This Verdict

STEP 1	STEP 2	STEP 3	STEP 4
INPUT FEATURES	ML MODEL	PEER RANKING	COMBINED READ
Fundamentals	Trained on history	—/100	Full valuation model not yet run for this stock
Profitability, debt trend, capex pattern, growth	Learns patterns in past company fundamentals	Estimated rank vs. sector peers, not a price target	Insight Score + Valuation Verdict together

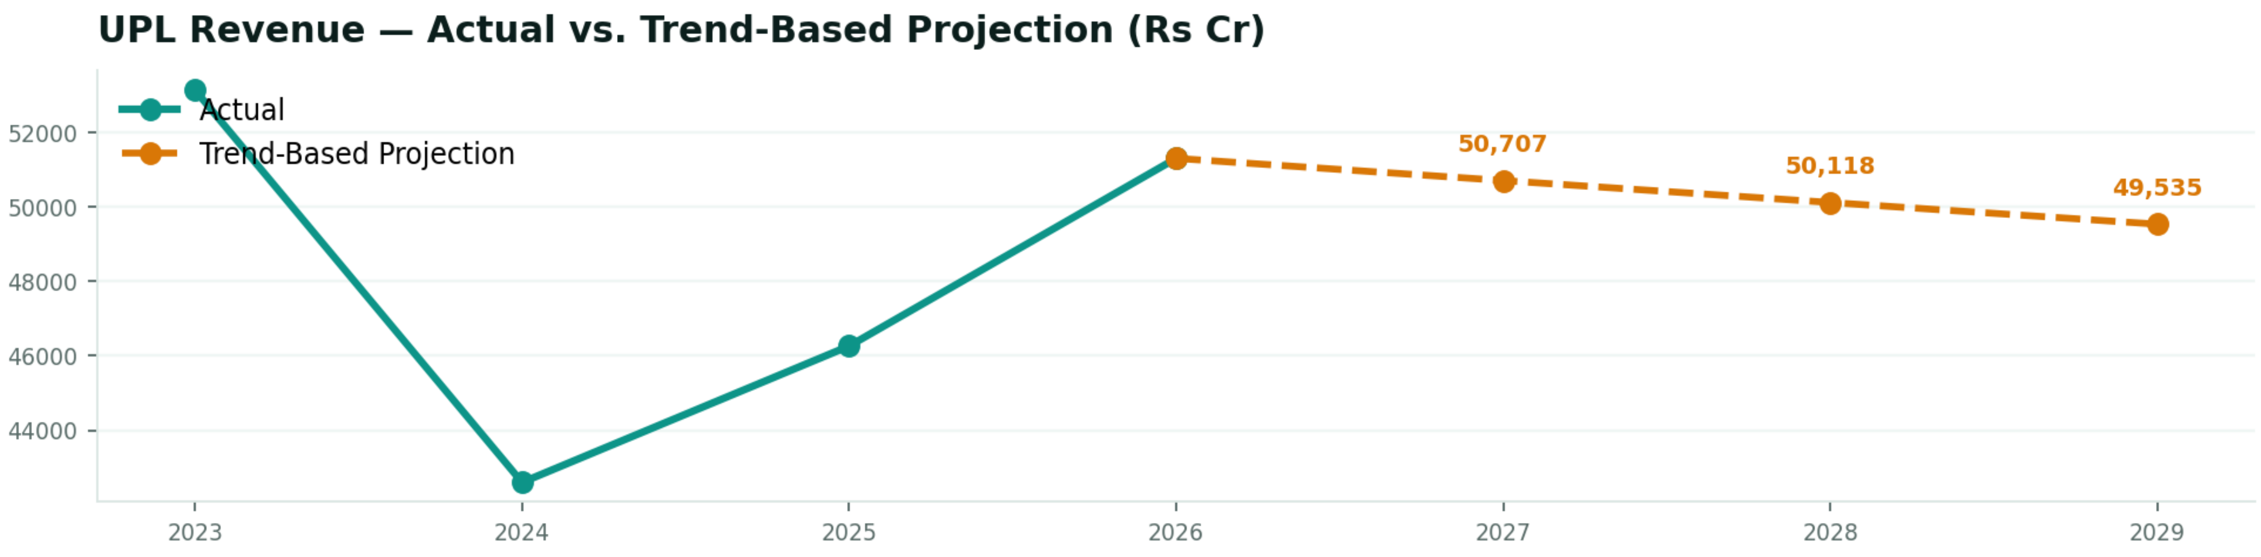
KEY TAKEAWAY › Full valuation model not yet run for this stock — a weak Insight Score combined with a valuation that's — is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Metric (Rs Cr)	FY2026 (actual)	FY2027E	FY2028E	FY2029E
Revenue	51,303	50,707	50,118	49,535
Net Income	1,922	1,564	1,272	1,035



Based on a historical Revenue CAGR of -1.2% and Net Income CAGR of -18.6% over the last 3 years.

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.
