Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Healthcare	Healthcare	Nifty 200	INE361B01024

Divi's Laboratories Ltd.

We show every factual field our data currently covers. We don't yet have a written business description, shareholding pattern, or segment breakdown for this company — rather than guess, that is left out until it's genuinely available from the pipeline.

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
—X	—X	—

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 4 years)

Metric (Rs Cr)	FY2023	FY2024	FY2025	FY2026
Total Revenue	7,665	7,796	9,325	10,476
Net Income	1,824	1,600	2,191	2,568
EBITDA	2,712	2,544	3,320	3,874
Total Debt	4	3	4	7
Stockholders Equity	12,767	13,571	14,969	16,761
Free Cash Flow	1,986	258	215	218
ROE	14.3%	11.8%	14.6%	15.3%
Year-over-year growth				
YoY Growth	FY2024	FY2025	FY2026	
Revenue Growth	+1.7%	+19.6%	+12.3%	
Net Income Growth	-12.3%	+36.9%	+17.2%	

KEY TAKEAWAY › Revenue grew at a 11.0% CAGR and Net Income at a 12.1% CAGR over the last 3 years of available data — profit growth outpaced revenue growth, suggesting improving margins.

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

- Revenue grew 37% cumulatively from FY2023 to FY2026 (Rs 7,665 Cr → Rs 10,476 Cr), a 11.0% CAGR over 3 years.
- Growth has been uneven year to year (from +1.7% to +19.6%), rather than a smooth trend — consistent with lumpy, order-book-driven revenue recognition typical of capital-intensive project businesses.

KEY TAKEAWAY › DIVISLAB's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

- Net margin moved from 23.8% in FY2023 to 24.5% in FY2026 — expanding profitability on each rupee of revenue.
- Net Income CAGR (12.1%) has outpaced Revenue CAGR (11.0%) — classic operating leverage: fixed costs are being spread over a larger revenue base.
- Profit dipped in FY2024 (Rs 1,600 Cr) before recovering — a single weak year rather than a multi-year decline.

KEY TAKEAWAY › Net Income for DIVISLAB across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

- EBITDA margin moved from 35.4% to 37.0% over the period — a genuine improvement in core operating efficiency.
- Total Debt has risen 75% over the period (Rs 4 Cr → Rs 7 Cr) while EBITDA grew — the operating profit base has kept pace with rising leverage.
- At the latest EBITDA of Rs 3,874 Cr against Rs 7 Cr of debt, it would take roughly 0.0 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for DIVISLAB — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 14.3% to 15.3% over FY2023-FY2026 — a meaningful improvement in how efficiently shareholder capital is being turned into profit.
- Shareholder Equity grew 31% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 14.0% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › DIVISLAB's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

KEY TAKEAWAY › EBITDA margin moved from 35.4% of revenue in FY2023 to 37.0% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2023	FY2024	FY2025	FY2026
Net Income	23.8%	20.5%	23.5%	24.5%
EBITDA	35.4%	32.6%	35.6%	37.0%
Total Debt	0.1%	0.0%	0.0%	0.1%
Stockholders Equity	166.6%	174.1%	160.5%	160.0%
Total Assets	188.4%	198.4%	181.6%	191.2%
Operating Cash Flow	32.1%	16.2%	17.7%	26.1%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

KEY TAKEAWAY › Total Debt moved from 0.1% of revenue to 0.1% over this period (+0.0 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Leverage & Solvency Ratios

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

KEY TAKEAWAY › Debt-to-Equity of 0.00x is below the ~1x watch level — leverage looks manageable on this measure alone.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
• Whether the stock is priced richer or cheaper than same-sector peers right now • A repeatable, mechanical comparison — same rule applied to all 200 stocks	• Whether the premium is justified by superior growth, order book, or moat • The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › DIVISLAB is flagged **Not yet scored** because its current multiple sits — — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

Why This Verdict

KEY TAKEAWAY › Full valuation model not yet run for this stock — a weak Insight Score combined with a valuation that's — is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Metric (Rs Cr)	FY2026 (actual)	FY2027E	FY2028E	FY2029E
Revenue	10,476	11,626	12,902	14,318
Net Income	2,568	2,878	3,226	3,615

Based on a historical Revenue CAGR of +11.0% and Net Income CAGR of +12.1% over the last 3 years.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
CLEAR Total Debt rising every year	CLEAR Net margin declining every year	CLEAR Most recent year negative	CLEAR Debt-to-Equity above 1.5x

KEY TAKEAWAY › All 4 mechanical checks come back clear — no rising-debt, declining-margin, negative-FCF or elevated-leverage pattern detected. This is not a full risk assessment; always verify independently.

SECTION 6

Appendix & Methodology

- Risks & Limitations
- Disclaimers
- Appendix — Raw Financial Data
- Glossary & Methodology

Risks & Limitations

- This deck is generated automatically from a statistical model and public data — it has not been reviewed by a financial analyst.
- Historical patterns the model relies on may not repeat in the future.
- Data may be delayed or contain provider errors; always verify key figures independently.
- The 3-year forecast above is a mechanical extrapolation of past growth, not a professional projection — it does not account for competition, macro conditions, or company-specific plans.
- This is not a substitute for professional financial advice.

Disclaimers

- 1. General: This document is produced by an independent, personal research project (ClearStocks) for educational purposes only.
- 2. Not Investment Advice: Nothing in this deck is financial, investment, legal or tax advice.
- 3. No Recommendation: The Insight Score and valuation verdict are model outputs, not a recommendation to buy, hold or sell.
- 4. Data Accuracy: Figures are sourced from public data providers and may contain errors, delays or omissions.
- 5. No Guarantee: Historical performance and model scores do not guarantee future results.
- 6. Liability: The creator of this deck accepts no liability for losses arising from its use.

EVERY NUMBER IN THIS DECK, TRACEABLE

Appendix — Raw Financial Data

Every figure used to build the tables, charts, ratios and forecast in this deck, exactly as recorded per fiscal year, converted to Rs Crore to match every other table above. Use this to verify any calculation independently.

Metric	2023-03-31	2024-03-31	2025-03-31	2026-03-31
Total Revenue (Rs Cr)	7,665	7,796	9,325	10,476
Net Income (Rs Cr)	1,824	1,600	2,191	2,568
EBIT (Rs Cr)	2,369	2,166	2,918	3,411
EBITDA (Rs Cr)	2,712	2,544	3,320	3,874
Total Debt (Rs Cr)	4	3	4	7
Stockholders Equity (Rs Cr)	12,767	13,571	14,969	16,761
Cash & Equivalents (Rs Cr)	170	363	415	128
Total Assets (Rs Cr)	14,439	15,470	16,932	20,033
Free Cash Flow (Rs Cr)	1,986	258	215	218
Operating Cash Flow (Rs Cr)	2,459	1,261	1,653	2,738
Capital Expenditure (Rs Cr)	-473	-1,003	-1,438	-2,520
ROE	14.29%	11.79%	14.64%	15.32%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for DIVISLAB — Divi's Laboratories Ltd..
