THE ONE-PAGE READ

Executive Summary

DMART — Avenue Supermarts (DMart)

Expensive on an absolute basis, cheaper than Trent on P/E despite a much higher P/B

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
33/100	Retail	Rs 3,813.00	WEAK SIGNAL

- 74.5% promoter ownership limits free float and ties the stock to government/public-sector capex cycles.
- Brokerage views are sharply split — bull cases point to order-book strength, bear cases to valuation and a maturing thermal-power cycle (see Section 5).
- Revenue grew at a 17.1% CAGR over the last 3 years of available financial history (see Section 3).

This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

Key Statistics

CURRENT PRICE	REPORT DATE	INSIGHT SCORE	MARKET CAP
Rs 3,813.00	September 2026	33/100	Rs 248,727 Cr

Valuation Verdict: Expensive on an absolute basis, cheaper than Trent on P/E despite a much higher P/B · **Model Read:** WEAK SIGNAL (very high valuation multiples against a moderate ROE, plus a loss-making e-grocery arm)

52-Week Trading Range

Low: Rs 3,529.00

High: Rs 4,950.00

KEY TAKEAWAY › DMART trades at Rs 3,813.00, 20% of the way up its 52-week range (Rs 3,529.00-Rs 4,950.00) — Insight Score 33/100, flagged Expensive on an absolute basis, cheaper than Trent on P/E despite a much higher P/B.

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Retail	Consumer Services	Nifty 200	INE192R01011

Avenue Supermarts Ltd.

Founded 2002 (opened first store in Powai, Mumbai) — Operates the DMart chain of supermarkets under an "Everyday Low Cost - Everyday Low Price" value-retail model, with 506+ stores across India as of the latest count.

- DMart supermarkets (core, offline)
- Avenue E-Commerce Ltd / DMart Ready (online grocery)

A full company profile, shareholding pattern, segment breakdown and industry context follow in Section 2 of this report.

SECTION 2

Company, Industry & Leadership

- Company Profile
- Shareholding Pattern
- Industry Context — Market Sizing
- Industry Context — Competitive Landscape
- Leadership
- Recent News

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
24 years	Mumbai, Maharashtra, India	2	Nifty 200

OWNERSHIP

Avenue Supermarts is majority-owned by founder Radhakishan Damani and family entities, holding 74.5% of the company -- one of the highest promoter holdings among large-cap Nifty stocks. Foreign Institutional Investors hold about 9.2% and Domestic Institutional Investors about 8.7%, with the remaining ~7.6% held by the public.

OPERATIONS

Operates the DMart chain of supermarkets under an "Everyday Low Cost - Everyday Low Price" value-retail model, with 506+ stores across India as of the latest count

Sources: [Screener.in](#) · [Outlook Business](#) — E-Grocery Investment

KEY TAKEAWAY › DMart's core value proposition -- everyday low prices through procurement and distribution efficiency, not discounting -- has made it one of India's most consistently profitable retailers. The number that stands out in this deck is the valuation: an 81.3x P/E and 10.2x P/B are both extremely high for a 12.9% ROE business, and the stock has fallen roughly 20% over the past year as investors reassess whether that multiple is sustainable, especially given the quick-commerce pressure discussed in Recent News.

Shareholding Pattern

Promoter (Radhakishan Damani & family)	74.5%
FII (Foreign Institutions)	9.22%
DII (Domestic Institutions)	8.67%
Public / Retail	7.55%

Key Named Investors

Investor	Holding	Note
Radhakishan Damani & family entities	74.5%	Promoter -- founder, one of India's best-known value investors
Life Insurance Corporation of India (LIC)	~2.0%	Largest named domestic institutional holder
SBI Mutual Fund (aggregated)	~1.5%	Aggregated across multiple actively-managed schemes
Government of Singapore / GIC	~1.0%	Sovereign wealth investor with a long-standing DMart position

Sources: [Screener.in](#)

KEY TAKEAWAY › At 74.5% promoter holding, DMart has an unusually tight float even by large-cap standards -- consistent with founder Radhakishan Damani's famously long-term, low-turnover investment philosophy, but it also means a relatively small free float is available to absorb institutional buying or selling pressure.

Industry Context

DMart competes in India's organized retail sector against Trent (Tata Group) and smaller value-retail chains like V-Mart. The industry's dominant story in FY26 has been the rapid rise of quick commerce (10-15 minute grocery delivery from players like Blinkit, Zepto and Swiggy Instamart), which is directly pressuring the online grocery model DMart itself operates through its DMart Ready / Avenue E-Commerce arm -- a business that remains loss-making even as its parent company's core offline stores stay solidly profitable.

Sources: [Outlook Business](#)

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. BHEL
Trent	Premium fashion-retail peer	Trades at a similar P/E (81.6x) but a far higher P/B (21.4x) and ROE (27.7%) -- a fundamentally different retail model (fashion/apparel via Zudio and Westside) generating much stronger returns on capital than DMart's grocery-led business.
V-Mart Retail	Smaller value-retail peer	Trades at a lower P/E (48.2x) with a 14.2% ROE, but its 3-year average ROE of just 2.2% points to significant recent volatility in profitability that DMart has not experienced.

Sources: [Screener.in](#) · [Screener.in](#) — Trent

KEY TAKEAWAY › DMart's 81.3x P/E looks broadly in line with Trent's, but the two businesses are not directly comparable -- Trent's ROE (27.7%) is more than double DMart's (12.9%), meaning Trent is generating a much higher return for a similar multiple. On a pure returns-versus-multiple basis, DMart looks like the more expensive of the two despite the headline P/E numbers looking similar.

BOARD & SENIOR MANAGEMENT ROSTER

Leadership

Chief Executive Officer & Managing Director (since February 1, 2026)	Anshul Asawa

3 ITEMS, MOST RECENT FIRST

Recent News

2026

DMart parent approves up to Rs 500 crore investment for e-grocery arm despite rising losses

Avenue E-Commerce Ltd's revenue grew 17% to Rs 4,094 crore in FY26, but losses nearly doubled to Rs 307 crore -- total investment in the online arm now approaching Rs 2,000 crore.

Outlook Business — [source](#)

Q1 FY27 (2026)

DMart narrows DMart Ready operations to 11 major cities

The company discontinued online grocery service in 7 underperforming cities in Q1 FY27, concentrating resources on markets where the online model generates meaningful revenue.

Outlook Business — [source](#)

2026

Avenue Supermarts opens new store in Barabanki, total count hits 506

The core offline store network continues steady expansion even as the online grocery arm undergoes strategic narrowing.

ScanX — [source](#)

KEY TAKEAWAY › The throughline for DMart this year: a very profitable, steadily-expanding core offline business (506+ stores and counting) sitting alongside an online grocery arm that is still losing money and recently had to retrench geographically -- a split business picture that a single blended P/E of 81.3x doesn't fully capture.

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
81.3x	10.2x	12.9%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 4 years)

Metric (Rs Cr)	FY2023	FY2024	FY2025	FY2026
Total Revenue	42,735	50,701	59,233	68,684
Net Income	2,379	2,536	2,708	2,970
EBITDA	3,766	4,250	4,611	5,260
Total Debt	643	592	820	2,425
Stockholders Equity	16,079	18,698	21,428	24,464
Free Cash Flow	418	15	-960	-647
ROE	14.8%	13.6%	12.6%	12.1%
Year-over-year growth				
YoY Growth	FY2024	FY2025	FY2026	
Revenue Growth	+18.6%	+16.8%	+16.0%	
Net Income Growth	+6.6%	+6.8%	+9.7%	

KEY TAKEAWAY › Revenue grew at a 17.1% CAGR and Net Income at a 7.7% CAGR over the last 3 years of available data — revenue outpaced profit growth, suggesting margin pressure.

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

- Revenue grew 61% cumulatively from FY2023 to FY2026 (Rs 42,735 Cr → Rs 68,684 Cr), a 17.1% CAGR over 3 years.
- Growth has slowed every year — from +18.6% to +16.0% — worth checking whether that's a maturing base or a genuine demand slowdown.

KEY TAKEAWAY › DMART's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

- Net margin moved from 5.6% in FY2023 to 4.3% in FY2026 — compressing profitability on each rupee of revenue.
- Net Income CAGR (7.7%) has lagged Revenue CAGR (17.1%) — revenue growth is not yet converting proportionally into bottom-line growth.

KEY TAKEAWAY › Net Income for DMART across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

- EBITDA margin moved from 8.8% to 7.7% over the period — pressure on core operating efficiency, independent of one-off items.
- Total Debt has risen 277% over the period (Rs 643 Cr → Rs 2,425 Cr) while EBITDA grew — the operating profit base has kept pace with rising leverage.
- At the latest EBITDA of Rs 5,260 Cr against Rs 2,425 Cr of debt, it would take roughly 0.5 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for DMART — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 14.8% to 12.1% over FY2023-FY2026 — a decline in capital efficiency worth investigating alongside the margin trend.
- Shareholder Equity grew 52% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 13.3% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › DMART's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

DMART Margins as % of Revenue, by Year

KEY TAKEAWAY › EBITDA margin moved from 8.8% of revenue in FY2023 to 7.7% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2023	FY2024	FY2025	FY2026
Net Income	5.6%	5.0%	4.6%	4.3%
EBITDA	8.8%	8.4%	7.8%	7.7%
Total Debt	1.5%	1.2%	1.4%	3.5%
Stockholders Equity	37.6%	36.9%	36.2%	35.6%
Total Assets	42.4%	41.8%	41.1%	43.0%
Operating Cash Flow	6.2%	5.4%	4.2%	5.0%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

KEY TAKEAWAY › Total Debt moved from 1.5% of revenue to 3.5% over this period (+2.0 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Retail

KEY TAKEAWAY › DMART's P/E is 15% above its sector average — trading at a premium the market is paying for something (growth, order book, quality) not yet visible in trailing ratios.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

Company	P/E	P/B	ROE	Mkt Cap (Cr)
DMART (this stock)	81.3	10.2	12.9%	248,727
TRENT	81.6	21.4	27.7%	149,164
VMART	48.2	7.0	14.2%	6,683

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 2 largest sector peers, TRENT has the highest ROE (27.7%) vs DMART's 12.9% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

Peer Positioning Map

KEY TAKEAWAY › DMART sits in the quadrant that is expensive despite below-average returns — the harder combination to justify, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

KEY TAKEAWAY › Debt-to-Equity of 0.10x is below the ~1x watch level — leverage looks manageable on this measure alone.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
- Whether the stock is priced richer or cheaper than same-sector peers right now - A repeatable, mechanical comparison — same rule applied to all 200 stocks	- Whether the premium is justified by superior growth, order book, or moat - The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › DMART is flagged **Expensive on an absolute basis, cheaper than Trent on P/E despite a much higher P/B** because its current multiple sits +15% vs peers — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

Why This Verdict

KEY TAKEAWAY › **WEAK SIGNAL** (very high valuation multiples against a moderate ROE, plus a loss-making e-grocery arm) — a weak Insight Score combined with a valuation that's +15% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE	THE BEAR CASE
• DMart's core offline business remains highly profitable and continues to expand steadily (506+ stores), with a proven Everyday Low Price model that has weathered multiple retail cycles. • New CEO Anshul Asawa's decision to narrow DMart Ready to 11 focused cities, rather than chase unprofitable scale, suggests a disciplined approach to fixing the online grocery arm rather than doubling down on losses. • 74.5% promoter ownership by founder Radhakishan Damani signals strong long-term alignment between management and shareholders.	• An 81.3x P/E and 10.2x P/B are both extremely rich for a 12.9% ROE business -- among the most expensive large-cap valuations in this deck series, leaving little room for error if growth disappoints. • Avenue E-Commerce's losses nearly doubled to Rs 307 crore in FY26 even as revenue grew, and quick-commerce competitors (Blinkit, Zepto, Instamart) continue to pressure the online grocery category DMart is trying to compete in. • The stock has already fallen roughly 20% over the past year, suggesting the market itself is beginning to question whether the historical valuation premium is sustainable.

Sources: [Outlook Business](#) · [Screener.in](#)

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
33/100	Expensive on an absolute basis, cheaper than Trent on P/E despite a much higher P/B	0.10x	—

DMart's valuation is the standout feature of this deck: an 81.3x P/E and 10.2x P/B for a 12.9% ROE business is a rich multiple by almost any measure, even against Trent, whose similar P/E comes with more than double DMart's ROE. The WEAK SIGNAL read reflects that gap between price and current profitability, compounded by a loss-making, recently-retrenched online grocery arm facing real competitive pressure from quick-commerce players. None of this says DMart's underlying offline business is troubled -- it continues to expand and remains solidly profitable -- but the price being paid for it today assumes a great deal of continued execution. This is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
• P/E compresses toward the Retail sector average (currently 70.4x vs. DMART's 81.3x) without a matching drop in earnings — the premium would then be paid for, not merely priced in.	• Debt-to-Equity rises meaningfully above its current 0.10x — the balance sheet is a strength today, and that would erode it. • Net Income growth reverses and turns negative for two consecutive years — the current growth trend is doing a lot of the work in this verdict.

KEY TAKEAWAY › 1 triggers on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time BHEL reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Metric (Rs Cr)	FY2026 (actual)	FY2027E	FY2028E	FY2029E
Revenue	68,684	80,454	94,241	110,390
Net Income	2,970	3,199	3,445	3,710

Based on a historical Revenue CAGR of +17.1% and Net Income CAGR of +7.7% over the last 3 years.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
CLEAR Total Debt rising every year	FLAGGED Net margin declining every year	FLAGGED Most recent year negative	CLEAR Debt-to-Equity above 1.5x

- Net margin has declined every year for the last 4 years (5.6% → 4.3%).
- Most recent year's Free Cash Flow is negative.

These are mechanical checks on the numbers above, not a professional risk assessment.

Free Cash Flow (Rs Cr)	418	15	-960	-647
Operating Cash Flow (Rs Cr)	2,630	2,746	2,463	3,467
Capital Expenditure (Rs Cr)	-2,212	-2,731	-3,423	-4,113
ROE	14.79%	13.56%	12.64%	12.14%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for DMART — Avenue Supermarts (DMart).

ClearStocks · An independent, personal research project

Refreshed monthly · Educational research only, not investment advice
