THE ONE-PAGE READ

Executive Summary

HDFCBANK — HDFC Bank

Cheap vs peers (P/E, -25% vs sector)

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
58/100	Financial Services	Rs 701.00	MIXED SIGNAL

- 0% (none -- see note) promoter ownership limits free float and ties the stock to government/public-sector capex cycles.
- Brokerage views are sharply split — bull cases point to order-book strength, bear cases to valuation and a maturing thermal-power cycle (see Section 5).

This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

Key Statistics

CURRENT PRICE	REPORT DATE	INSIGHT SCORE	MARKET CAP
Rs 701.00	September 2026	58/100	Rs 1,080,226 Cr

Valuation Verdict: Cheap vs peers (P/E, -25% vs sector) · **Model Read:** MIXED SIGNAL (average model score + cheap valuation)

52-Week Trading Range

KEY TAKEAWAY › HDFCBANK trades at Rs 701.00, 1% of the way up its 52-week range (Rs 698.00-Rs 1,020.00) — Insight Score 58/100, flagged Cheap vs peers (P/E, -25% vs sector).

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Financial Services	Financial Services	Nifty 200	INE040A01034

HDFC Bank Ltd.

Founded 1994 — Operates 9,545 branches and 21,417 ATMs across India, with roughly 214,500 employees (FY25).

Consumer/Retail Banking
Commercial & Wholesale Banking
Treasury Operations
Insurance, Credit Cards & Investment Banking (subsidiaries)

A full company profile, shareholding pattern, segment breakdown and industry context follow in Section 2 of this report.

SECTION 2

Company, Industry & Leadership

- Company Profile
- Shareholding Pattern
- Industry Context — Market Sizing
- Industry Context — Competitive Landscape
- Leadership
- Recent News

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
32 years	Mumbai, Maharashtra, India	4	Nifty 200

OWNERSHIP

No single promoter group -- HDFC Bank has been widely held by institutions and the public since its 2023 merger with parent Housing Development Finance Corporation (HDFC Ltd). As of the latest filing, Foreign Institutional Investors hold roughly 44-49% and Domestic Institutional Investors roughly 35-40%, making HDFC Bank effectively institution-owned rather than promoter-controlled.

OPERATIONS

Operates 9,545 branches and 21,417 ATMs across India, with roughly 214,500 employees (FY25)

Sources: [Wikipedia](#) · [Trendlyne Shareholding](#)

KEY TAKEAWAY › HDFC Bank is India's largest private-sector bank by assets, a position cemented by the 2023 merger with HDFC Ltd -- India's largest-ever M&A; deal, which folded a giant mortgage book onto the bank's balance sheet and pushed total assets past Rs 52 lakh crore. That scale is the core of the bull case. The flip side: absorbing HDFC Ltd's lower-yielding mortgage book is a structural drag on margins, and it shows up directly in the Net Interest Margin trend later in this deck.

Shareholding Pattern

Promoter	0% (none -- see note)
FII (Foreign Institutions)	49.2%
DII (Domestic Institutions)	34.6%
Public / Retail	16.2%

Key Named Investors

Investor	Holding	Note
Life Insurance Corporation of India (LIC)	5.48%	Largest single named domestic institutional holder
SBI Nifty 50 ETF	6.87%	Passive index-tracking vehicle, not an active conviction bet
ICICI Prudential Bluechip Fund	3.02%	Large actively-managed domestic mutual fund
Government of Singapore	2.63%	Sovereign wealth investor, a common signal of long-horizon foreign conviction

Sources: [Trendlyne](#)

KEY TAKEAWAY › With no promoter group, HDFC Bank's ownership is a genuine institutional consensus rather than a single controlling shareholder's bet -- FII holding above 49% also means the stock is unusually exposed to foreign-flow-driven selling in a risk-off environment, independent of the bank's own operating performance.

Industry Context

HDFC Bank operates in India's private banking sector, competing directly with ICICI Bank, Axis Bank, Kotak Mahindra Bank and public-sector leader State Bank of India. FY26/27 has been a margin-compression cycle across the sector as deposit costs stayed sticky while loan repricing lagged, compounded for HDFC Bank specifically by digesting the lower-yielding HDFC Ltd mortgage book onto its balance sheet. Sector-wide credit growth has moderated from the double-digit pace of FY23-24 as the Reserve Bank of India has kept a close watch on unsecured retail lending growth.

Sources: [IBEF Banking](#) · [Business Standard 2026 Banking Outlook](#)

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. BHEL
ICICI Bank	Fastest-growing large peer	Loan growth of 19.6% vs HDFC Bank's 15.4%, Net NPA of just 0.35%, and profit growth of 15.9% YoY in Q1 FY27 -- currently outperforming HDFC Bank on nearly every growth and asset-quality metric.
State Bank of India	Scale leader, cheaper valuation	India's largest bank by assets overall (public sector); trades at a P/E of just 11.2x, the cheapest of the large banks, reflecting its PSU-ownership discount rather than weaker fundamentals.
Axis Bank	Mid-scale private peer	Smaller market cap (~Rs 3.9 lakh Cr vs HDFC Bank's ~Rs 10.8 lakh Cr) with comparable ROE (13.1%) but a notably low promoter holding of its own (7.87%) and large contingent liabilities.
Kotak Mahindra Bank	Premium-valuation peer	Trades at the highest P/E of the group (21.1x) despite a lower current ROE (11.4%) -- the market paying up for perceived underwriting discipline and a conservative balance sheet.

Sources: [Equentis](#) — ICICI vs HDFC 2026

KEY TAKEAWAY › HDFC Bank's edge has always been sheer scale and deposit franchise strength, not being the fastest grower in any given year -- and FY26/27 is a year where that shows clearly: ICICI Bank is out-growing it on loans while running a tighter asset-quality book. HDFC Bank's cheap P/E (13.7x, versus ICICI's 18.3x and Kotak's 21.1x) is the market's way of pricing in exactly that growth gap, on top of the leadership-transition uncertainty covered in the Leadership section of this deck.

BOARD & SENIOR MANAGEMENT ROSTER

Leadership

Managing Director & CEO (retiring Oct 26, 2026)	Sashidhar Jagdishan
---	---------------------

We show only board/leadership roles that are officially disclosed; we do not have shareholding cap-table detail beyond what's publicly filed.

HDFC Bank Q1 FY27 results: Net profit rises 5% to Rs 19,060 crore, NII grows 7%

Net Interest Margin narrowed to 3.26% from 3.38% in Q4 FY26 -- described as its lowest level on record. Gross advances grew 15.4% YoY, deposits grew 14.7%.

Business Standard — [source](#)

4 ITEMS, MOST RECENT FIRST

Recent News (2/2)

2026

ICICI Bank outperforms HDFC, SBI, Axis, Kotak in 2026

ICICI posted 19.6% loan growth and a 0.35% net NPA ratio, distinguishing it from peers -- including HDFC Bank -- facing margin pressure this year.

Equentis — [source](#)

KEY TAKEAWAY › Read together: this is a year where HDFC Bank's problems are largely self-inflicted and leadership-level (CEO exit, governance-related litigation) rather than a broad operating breakdown -- deposit growth, loan growth and asset quality all remain reasonable in absolute terms, even as they trail ICICI Bank's pace. The stock's roughly 26% decline over the past year looks like it is pricing uncertainty and headline risk at least as much as it is pricing the underlying banking business.

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
13.7x	1.8x	13.6%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 5 years)

Metric (Rs Cr)	FY2022	FY2023	FY2024	FY2025	FY2026
Total Revenue	—	120,538	160,497	183,864	192,567
Net Income	—	49,545	62,266	67,351	70,479
EBITDA	—	—	—	—	—
Total Debt	—	315,179	809,355	732,611	664,364
Stockholders Equity	—	291,220	694,733	767,689	816,740
Free Cash Flow	—	43,358	96,848	112,922	106,578
ROE	—	17.0%	9.0%	8.8%	8.6%

Year-over-year growth

YoY Growth	FY2023	FY2024	FY2025	FY2026
Revenue Growth	—	+33.2%	+14.6%	+4.7%
Net Income Growth	—	+25.7%	+8.2%	+4.6%

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

KEY TAKEAWAY › HDFCBANK's revenue trend over FY2022-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

- Net margin moved from 41.1% in FY2022 to 36.6% in FY2026 — compressing profitability on each rupee of revenue.
- Profit dipped in FY2023 (Rs 49,545 Cr) before recovering — a single weak year rather than a multi-year decline.

KEY TAKEAWAY › Net Income for HDFCBANK across FY2022-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for HDFCBANK — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 17.0% to 8.6% over FY2022-FY2026 — a decline in capital efficiency worth investigating alongside the margin trend.
- Average ROE across the 4 years shown was 10.8% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › HDFCBANK's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2022	FY2023	FY2024	FY2025	FY2026
Net Income	—	41.1%	38.8%	36.6%	36.6%
EBITDA	—	—	—	—	—
Total Debt	—	261.5%	504.3%	398.5%	345.0%
Stockholders Equity	—	241.6%	432.9%	417.5%	424.1%
Total Assets	—	2136.7%	2748.9%	2620.8%	2732.6%
Operating Cash Flow	—	39.6%	63.7%	65.0%	58.1%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Financial Services

KEY TAKEAWAY › HDFCBANK's P/E is 13% below its sector average — trading at a discount, which can mean overlooked value or a real, priced-in problem.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

Company	P/E	P/B	ROE	Mkt Cap (Cr)
HDFCBANK (this stock)	13.7	1.8	13.6%	1,080,226
ICICIBANK	18.3	2.7	15.9%	1,025,265
SBIN	11.2	1.5	15.4%	944,800
KOTAKBANK	21.1	2.3	11.4%	420,786
AXISBANK	14.0	1.8	13.1%	389,745

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 4 largest sector peers, ICICIBANK has the highest ROE (15.9%) vs HDFCBANK's 13.6% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

Peer Positioning Map

KEY TAKEAWAY › HDFCBANK sits in the quadrant that is cheap with below-average returns — cheap for a reason until proven otherwise, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Not enough financial-history data available to compute this yet.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
• Whether the stock is priced richer or cheaper than same-sector peers right now • A repeatable, mechanical comparison — same rule applied to all 200 stocks	• Whether the premium is justified by superior growth, order book, or moat • The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › HDFCBANK is flagged **Cheap vs peers (P/E, -25% vs sector)** because its current multiple sits -13% vs peers — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

Why This Verdict

KEY TAKEAWAY › **MIXED SIGNAL** (average model score + cheap valuation) — a middling Insight Score combined with a valuation that's -13% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE	THE BEAR CASE
• At 13.7x trailing earnings, HDFC Bank trades near the bottom of its own 10-year valuation range, well below ICICI Bank (18.3x) and Kotak Mahindra Bank (21.1x) despite comparable or better absolute scale. • The 2023 HDFC Ltd merger is still working through its integration curve -- as the acquired mortgage book reprices and cross-sell of insurance/investment products to the combined customer base ramps up, margin pressure is expected by several brokerages to ease from FY28 onward. • Asset quality remains solid in absolute terms (Gross NPA 1.17%, Net NPA 0.41%) even during a leadership-transition year -- there is no credit-quality crisis underlying the stock's decline.	• Net Interest Margin at 3.26% is the lowest on record for the bank, and management has not given clear guidance on when merger-related margin drag fully normalizes. • An unplanned CEO exit with no named successor is a real governance overhang heading into FY28, at the exact moment a US class-action lawsuit is scrutinizing the bank's internal governance practices. • ICICI Bank is out-growing HDFC Bank on loans (19.6% vs 15.4%) while running tighter asset quality (0.35% vs 0.41% Net NPA) -- the market may be re-rating ICICI as the new sector leader at HDFC Bank's expense.

Sources: [Equentis](#) · [Business Standard](#)

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
58/100	Cheap vs peers	—	—

HDFC Bank screens statistically cheap -- a 13.7x P/E and 1.8x P/B are both well below its own historical range and below ICICI Bank's and Kotak Mahindra Bank's current multiples. The model's MIXED SIGNAL read reflects that cheapness sitting alongside a genuinely weaker growth picture this year: Net Interest Margin at a record-low 3.26%, loan growth trailing ICICI Bank's, and a leadership transition with no named successor landing at the same time as a US shareholder lawsuit referencing internal governance findings. None of this shows up in the trailing P/E or P/B ratios a simple valuation screen looks at -- which is exactly why this deck exists: the numbers say cheap, the current events say proceed with your eyes open. This is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
A sustained re-rating of the sector as a whole, independent of this company's own numbers.	P/E re-rates further above the Financial Services sector average (15.7x) while ROE stays flat — that would mean the market is pricing in growth the numbers don't yet show.

KEY TAKEAWAY › 1 triggers on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time BHEL reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 4 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Not enough clean historical data to extrapolate a forecast for this stock.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
CLEAR Total Debt rising every year	CLEAR Net margin declining every year	CLEAR Most recent year negative	CLEAR Debt-to-Equity above 1.5x

KEY TAKEAWAY › All 4 mechanical checks come back clear — no rising-debt, declining-margin, negative-FCF or elevated-leverage pattern detected. This is not a full risk assessment; always verify independently.

SECTION 6

Capital Expenditure (Rs Cr)	—	-4,362	-5,384	-6,640	-5,278
ROE	—	17.01%	8.96%	8.77%	8.63%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for HDFCBANK — HDFC Bank.

ClearStocks · An independent, personal research project

Refreshed monthly · Educational research only, not investment advice
