THE ONE-PAGE READ

Executive Summary

HINDUNILVR — Hindustan Unilever

Expensive vs ITC and Dabur (P/E premium for brand strength & low debt)

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
39/100	FMCG	Rs 1,956.00	MIXED SIGNAL

- 61.90% promoter ownership limits free float and ties the stock to government/public-sector capex cycles.
- Brokerage views are sharply split — bull cases point to order-book strength, bear cases to valuation and a maturing thermal-power cycle (see Section 5).

This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

Key Statistics

CURRENT PRICE	REPORT DATE	INSIGHT SCORE	MARKET CAP
Rs 1,956.00	September 2026	39/100	Rs 459,383 Cr

Valuation Verdict: Expensive vs ITC and Dabur (P/E premium for brand strength & low debt) · **Model Read:** MIXED SIGNAL (strong ROE, but weak 5-yr sales growth and a recent demerger complicates comparability)

52-Week Trading Range

Low: Rs 1,956.00

High: Rs 2,660.00

Now: Rs 1,956.00 (0%)

KEY TAKEAWAY › HINDUNILVR trades at Rs 1,956.00, 0% of the way up its 52-week range (Rs 1,956.00-Rs 2,660.00) — Insight Score 39/100, flagged Expensive vs ITC and Dabur (P/E premium for brand strength & low debt).

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
FMCG	Fast Moving Consumer Goods	Nifty 200	INE030A01027

Hindustan Unilever Ltd.

Founded 1933 (as Hindustan Vanaspati Manufacturing Co.; became Hindustan Unilever in 2007) — India's largest FMCG company, with a portfolio of 50+ brands across 16 categories, sold through one of the country's deepest rural and urban distribution networks.

Home Care
Beauty & Personal Care
Foods & Refreshment

A full company profile, shareholding pattern, segment breakdown and industry context follow in Section 2 of this report.

SECTION 2

Company, Industry & Leadership

- Company Profile
- Shareholding Pattern
- Industry Context — Market Sizing
- Industry Context — Competitive Landscape
- Leadership
- Recent News

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
93 years	Mumbai, Maharashtra, India	3	Nifty 200

OWNERSHIP

Hindustan Unilever is majority-owned by Unilever PLC, its UK/Netherlands-based parent, through promoter holdings of roughly 61.9%. Foreign Institutional Investors hold about 9.5% and Domestic Institutional Investors about 16.9%, with the remaining ~11.6% held by the public.

OPERATIONS

India's largest FMCG company, with a portfolio of 50+ brands across 16 categories, sold through one of the country's deepest rural and urban distribution networks

Sources: [Screener.in](#)

KEY TAKEAWAY › HUL is the benchmark FMCG franchise in India -- strong brands (Lux, Surf Excel, Dove, Lifebuoy, Horlicks), near-zero debt, and a distribution reach few competitors can match. What this deck's numbers show clearly is the cost of that quality: HUL's 41.7x P/E is more than double ITC's 16.7x, priced for consistency rather than growth -- and recent 5-year sales growth of just 6.5% suggests the market may be paying a premium for stability that isn't translating into much topline expansion.

Shareholding Pattern

Promoter (Unilever PLC)	61.90%
FII (Foreign Institutions)	9.50%
DII (Domestic Institutions)	16.92%
Public / Retail	11.60%

Key Named Investors		
Investor	Holding	Note
Unilever PLC	61.90%	Promoter -- UK/Netherlands-based global parent
Life Insurance Corporation of India (LIC)	~5.5%	Largest named domestic institutional holder
SBI Mutual Fund (aggregated)	~2.0%	Aggregated across multiple actively-managed schemes
Government of Singapore / GIC	~0.9%	Sovereign wealth investor with a long-standing HUL position

Sources: [Screener.in](#)

KEY TAKEAWAY › At 61.9% promoter holding by its global parent Unilever PLC, HUL has one of the tightest and most stable ownership structures among Indian FMCG majors -- limiting takeover risk but also meaning capital allocation strategy is set with a global parent's priorities in view, as seen in the recent Kwality Wall's demerger (see Recent News).

Industry Context

HUL operates in India's FMCG sector, competing with ITC's FMCG division, Nestle India, and Dabur, among others. FY25/26 has been a mixed year for the sector -- Nestle India has posted the strongest ROE by far (74.2%) on premium packaged foods, while ITC and Dabur have both seen their stock prices fall over 30% amid slower rural demand recovery and margin pressure. HUL itself completed a major structural change this year, demerging its ice-cream business (Kwality Wall's) into a separately listed entity.

Sources: [Groww](#) — [Kwality Wall's Demerger](#)

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. BHEL
ITC	Diversified, cheapest large peer	Trades at just 16.7x P/E versus HUL's 41.7x, though ITC's FMCG business sits alongside cigarettes, hotels and agri-business, making it a less direct comparison.
Nestle India	Premium packaged-foods peer	Commands the group's highest P/E (73.8x) and by far its highest ROE (74.2%) -- a much smaller, more narrowly-focused premium foods portfolio than HUL's broad 16-category footprint.
Dabur India	Ayurveda/wellness-focused peer	Down 30.4% over the past year and trading at 33.9x P/E with a lower 17.0% ROE -- illustrates that even HUL's closer FMCG peers have had a rough year.

Sources: [Screener.in](#)

KEY TAKEAWAY › HUL's valuation sits in the middle of this peer group -- cheaper than Nestle India's packaged-foods premium, but far pricier than ITC's conglomerate discount. The comparison is imperfect either way: ITC isn't a pure FMCG play, and Nestle India's scale and category mix aren't directly comparable to HUL's much broader 16-category portfolio.

BOARD & SENIOR MANAGEMENT ROSTER

Leadership

3 ITEMS, MOST RECENT FIRST

Recent News

December 5, 2025

HUL completes demerger of Kquality Wall's ice cream business

Ice cream business spun off into a separately listed entity (Kquality Wall's India Ltd) with a 1:1 share ratio for existing HUL shareholders; record date December 5, 2025.

Groww / Kotak Neo — [source](#)

December 2025

Kquality Wall's shares list at 26% discount after HUL demerger

The newly-listed ice cream entity opened well below its implied valuation, a weak debut that has drawn analyst attention to how the market is separately pricing the spun-off business.

JM Financial Services — [source](#)

January 22, 2026

HUL Q3 results: PAT rises 18.9% to Rs 2,984 crore, volume growth remains flat

Profit growth outpaced volume growth, partly reflecting margin gains and the early effects of the ice-cream demerger on the reported consolidated base.

Business Standard — [source](#)

KEY TAKEAWAY › The weak Kquality Wall's listing (26% below implied value) is a useful data point for judging how much of HUL's premium P/E was genuinely about the core business versus how much credit the market was giving the combined entity before the split -- an early signal, though not yet conclusive, that investors should watch as more post-demerger quarters are reported.

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
41.7x	9.4x	31.0%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 5 years)

Metric (Rs Cr)	FY2022	FY2023	FY2024	FY2025	FY2026
Total Revenue	—	59,549	60,966	60,573	63,763
Net Income	—	10,120	10,277	10,649	15,040
EBITDA	—	14,610	15,476	16,172	15,658
Total Debt	—	1,219	1,484	1,648	1,478
Stockholders Equity	—	50,304	51,218	49,402	48,738
Free Cash Flow	—	8,799	13,992	10,611	9,638
ROE	—	20.1%	20.1%	21.6%	30.9%
Year-over-year growth					
YoY Growth	FY2023	FY2024	FY2025	FY2026	
Revenue Growth	—	+2.4%	-0.6%	+5.3%	
Net Income Growth	—	+1.6%	+3.6%	+41.2%	

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

KEY TAKEAWAY › HINDUNILVR's revenue trend over FY2022-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

- Net margin moved from 17.0% in FY2022 to 23.6% in FY2026 — expanding profitability on each rupee of revenue.
- Profit dipped in FY2023 (Rs 10,120 Cr) before recovering — a single weak year rather than a multi-year decline.

KEY TAKEAWAY › Net Income for HINDUNILVR across FY2022-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

- EBITDA margin moved from 24.5% to 24.6% over the period — a genuine improvement in core operating efficiency.
- At the latest EBITDA of Rs 15,658 Cr against Rs 1,478 Cr of debt, it would take roughly 0.1 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for HINDUNILVR — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 20.1% to 30.9% over FY2022-FY2026 — a meaningful improvement in how efficiently shareholder capital is being turned into profit.
- Average ROE across the 4 years shown was 23.1% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › HINDUNILVR's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2022	FY2023	FY2024	FY2025	FY2026
Net Income	—	17.0%	16.9%	17.6%	23.6%
EBITDA	—	24.5%	25.4%	26.7%	24.6%
Total Debt	—	2.0%	2.4%	2.7%	2.3%
Stockholders Equity	—	84.5%	84.0%	81.6%	76.4%
Total Assets	—	122.7%	128.8%	131.9%	125.1%
Operating Cash Flow	—	16.8%	25.4%	19.6%	17.2%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — FMCG

KEY TAKEAWAY › HINDUNILVR's P/E is 0% above its sector average — trading at a premium the market is paying for something (growth, order book, quality) not yet visible in trailing ratios.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

Company	P/E	P/B	ROE	Mkt Cap (Cr)
HINDUNILVR (this stock)	41.7	9.4	31.0%	459,383
ITC	16.7	4.5	29.3%	329,286
NESTLEIND	73.8	53.0	74.2%	273,433
DABUR	33.9	5.9	17.0%	67,180

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 3 largest sector peers, NESTLEIND has the highest ROE (74.2%) vs HINDUNILVR's 31.0% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

Peer Positioning Map

KEY TAKEAWAY › HINDUNILVR sits in the quadrant that is expensive despite below-average returns — the harder combination to justify, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

KEY TAKEAWAY › Debt-to-Equity of 0.03x is below the ~1x watch level — leverage looks manageable on this measure alone.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
• Whether the stock is priced richer or cheaper than same-sector peers right now • A repeatable, mechanical comparison — same rule applied to all 200 stocks	• Whether the premium is justified by superior growth, order book, or moat • The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › HINDUNILVR is flagged **Expensive vs ITC and Dabur (P/E premium for brand strength & low debt)** because its current multiple sits +0% vs peers — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

Why This Verdict

KEY TAKEAWAY › MIXED SIGNAL (strong ROE, but weak 5-yr sales growth and a recent demerger complicates comparability) — a weak Insight Score combined with a valuation that's +0% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE	THE BEAR CASE
• Near-zero debt, a 50+ brand portfolio, and India's deepest FMCG distribution network give HUL structural durability that peers like Dabur (down 30% over the past year) currently lack. • The Kwality Wall's demerger lets investors value HUL's higher-margin home care and beauty/personal care core without the drag of the lower-margin, seasonal ice cream business. • A 31.0% ROE remains well above ITC's diversified-conglomerate return profile on a comparable basis, reflecting genuine capital efficiency in HUL's core FMCG operations.	• 5-year sales growth of just 6.5% is weak for a stock trading at 41.7x earnings -- more than double ITC's multiple for growth that hasn't been meaningfully faster. • Kwality Wall's shares listed 26% below their implied value after the demerger, a signal the market may not have been crediting the spun-off business as much value as HUL's pre-demerger price suggested. • At 9.43x P/B, HUL trades far above tangible book value -- leaving limited margin of safety if brand strength or distribution advantages erode against increasingly well-funded regional and D2C competitors.

Sources: [Groww](#) · [JM Financial Services](#)

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
39/100	Expensive vs ITC and Dabur	0.03x	—

HUL's 41.7x P/E is a clear premium to ITC (16.7x) and Dabur (33.9x), and its 31.0% ROE, while strong in absolute terms, doesn't match Nestle India's 74.2%. The MIXED SIGNAL read reflects a business with excellent brand quality and balance-sheet strength trading at a valuation that assumes both continue indefinitely, against a backdrop of weak 5-year sales growth (6.5%) and a still-fresh corporate restructuring (the Kwality Wall's demerger) that makes year-over-year comparisons trickier than usual this cycle. This is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
• P/E compresses toward the FMCG sector average (currently 41.5x vs. HINDUNILVR's 41.7x) without a matching drop in earnings — the premium would then be paid for, not merely priced in.	• Debt-to-Equity rises meaningfully above its current 0.03x — the balance sheet is a strength today, and that would erode it.

KEY TAKEAWAY › 1 triggers on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time BHEL reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 4 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Not enough clean historical data to extrapolate a forecast for this stock.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
CLEAR Total Debt rising every year	CLEAR Net margin declining every year	CLEAR Most recent year negative	CLEAR Debt-to-Equity above 1.5x

KEY TAKEAWAY › All 4 mechanical checks come back clear — no rising-debt, declining-margin, negative-FCF or elevated-leverage pattern detected. This is not a full risk assessment; always verify independently.

EVERY NUMBER IN THIS DECK, TRACEABLE

Appendix — Raw Financial Data

Every figure used to build the tables, charts, ratios and forecast in this deck, exactly as recorded per fiscal year, converted to Rs Crore to match every other table above. Use this to verify any calculation independently.

Metric	2022-03-31	2023-03-31	2024-03-31	2025-03-31	2026-03-31
Total Revenue (Rs Cr)	—	59,549	60,966	60,573	63,763
Net Income (Rs Cr)	—	10,120	10,277	10,649	15,040
EBIT (Rs Cr)	—	13,458	14,260	14,809	14,222
EBITDA (Rs Cr)	—	14,610	15,476	16,172	15,658
Total Debt (Rs Cr)	—	1,219	1,484	1,648	1,478
Stockholders Equity (Rs Cr)	—	50,304	51,218	49,402	48,738
Cash & Equivalents (Rs Cr)	—	714	825	6,071	2,583
Total Assets (Rs Cr)	—	73,087	78,499	79,880	79,752
Free Cash Flow (Rs Cr)	—	8,799	13,992	10,611	9,638
Operating Cash Flow (Rs Cr)	—	9,991	15,469	11,886	10,999
Capital Expenditure (Rs Cr)	—	-1,192	-1,477	-1,275	-1,361
ROE	—	20.12%	20.07%	21.56%	30.86%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for HINDUNILVR — Hindustan Unilever.

ClearStocks · An independent, personal research project
