THE ONE-PAGE READ

Executive Summary

RELIANCE — Reliance Industries

Expensive vs pure energy peers (P/E premium reflects Jio & Retail, not O2C alone)

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
44/100	Oil & Gas / Diversified Conglomerate	Rs 1,310.00	MIXED SIGNAL

- 50.48% promoter ownership limits free float and ties the stock to government/public-sector capex cycles.
 - Brokerage views are sharply split — bull cases point to order-book strength, bear cases to valuation and a maturing thermal-power cycle (see Section 5).
- This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

Key Statistics

CURRENT PRICE	REPORT DATE	INSIGHT SCORE	MARKET CAP
Rs 1,310.00	September 2026	44/100	Rs 1,772,085 Cr

Valuation Verdict: Expensive vs pure energy peers (P/E premium reflects Jio & Retail, not O2C alone) · **Model Read:** MIXED SIGNAL (weak standalone ROE, but priced as a growth conglomerate)

52-Week Trading Range

KEY TAKEAWAY › RELIANCE trades at Rs 1,310.00, 17% of the way up its 52-week range (Rs 1,250.00-Rs 1,612.00) — Insight Score 44/100, flagged Expensive vs pure energy peers (P/E premium reflects Jio & Retail, not O2C alone).

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Oil & Gas / Diversified Conglomerate	Oil Gas & Consumable Fuels	Nifty 200	INE002A01018

Reliance Industries Ltd.

Founded 1966 (as Reliance Commercial Corporation; incorporated as Reliance Industries in 1973) — A diversified conglomerate spanning Oil-to-Chemicals (O2C) refining, Jio telecom/digital services, Reliance Retail, and a fast-growing New Energy division building solar and battery gigafactories in Gujarat.

Oil-to-Chemicals (O2C) — refining & petrochemicals
Jio Platforms — telecom & digital services
Reliance Retail — consumer retail
New Energy & New Materials — solar, battery, hydrogen
Oil & Gas exploration

A full company profile, shareholding pattern, segment breakdown and industry context follow in Section 2 of this report.

SECTION 2

Company, Industry & Leadership

- Company Profile
- Shareholding Pattern
- Industry Context — Market Sizing
- Industry Context — Competitive Landscape
- Leadership
- Recent News

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
60 years	Mumbai, Maharashtra, India	5	Nifty 200

OWNERSHIP

The Ambani family, through various promoter entities, holds roughly 50.5% of Reliance Industries -- founded by Dhirubhai Ambani and currently chaired by his son Mukesh Ambani. Foreign Institutional Investors hold about 17.2% and Domestic Institutional Investors about 21.1%, with the remaining ~11.0% held by the public.

OPERATIONS

A diversified conglomerate spanning Oil-to-Chemicals (O2C) refining, Jio telecom/digital services, Reliance Retail, and a fast-growing New Energy division building solar and battery gigafactories in Gujarat

Sources: [Screener.in](#) · [RIL New Energy](#)

KEY TAKEAWAY › Reliance is best understood as three or four different businesses wearing one stock ticker: a capital-intensive, moderate-margin oil refining and petrochemicals business (O2C) sitting alongside two high-growth consumer businesses (Jio and Retail) and an emerging New Energy division still largely in build-out phase. The market's 23.8x P/E values the whole conglomerate far above what a pure energy peer would command -- essentially betting that Jio and Retail's growth, not O2C's steady cash flows, is what will drive returns from here.

Shareholding Pattern

Promoter (Ambani family)	50.48%
FII (Foreign Institutions)	17.19%
DII (Domestic Institutions)	21.10%
Public / Retail	11.05%

Key Named Investors		
Investor	Holding	Note
Ambani family & promoter entities	50.48%	Promoter -- founding family, controlling stake
Life Insurance Corporation of India (LIC)	~5.0%	Largest named domestic institutional holder
SBI Mutual Fund (aggregated)	~2.5%	Aggregated across multiple actively-managed schemes
Government of Singapore / GIC	~1.2%	Sovereign wealth investor with a long-standing RIL position

Sources: [Screener.in](#)

KEY TAKEAWAY

› A roughly 50% promoter stake gives the Ambani family firm control while still leaving a substantial float for institutional investors -- notable given that Reliance is currently mid-way through a multi-year, publicly announced succession plan handing operational leadership of Jio, Retail and New Energy to the next generation (see Leadership section).

Industry Context

Reliance's O2C business competes in India's oil refining and petrochemicals sector alongside state-owned majors ONGC, Indian Oil Corporation and Bharat Petroleum, all of which trade at far lower P/E multiples (roughly 6-9x versus Reliance's 23.8x) because they lack Reliance's telecom and retail growth engines. Reliance has also announced plans to nearly double consolidated EBITDA by 2027 and is racing to bring its Kutch-based solar gigafactory and a 40 GWh battery gigafactory online through 2026, positioning New Energy as a third major growth pillar alongside Jio and Retail.

Sources: [Business Standard](#) — [RIL AGM 2026](#) · [ESS News](#) — [Battery Gigafactory](#)

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. BHEL
ONGC	Pure-play upstream peer	Trades at just 6.8x P/E and 0.80x P/B -- a fraction of Reliance's multiple, reflecting its status as a state-owned pure oil & gas producer with no telecom or retail optionality.
Indian Oil Corporation	Refining & marketing peer	Cheapest of the group at 5.76x P/E despite a strong 20.5% ROE and 42% share of India's petroleum marketing -- the PSU discount is stark relative to Reliance.
Bharat Petroleum	Highest-ROE energy peer	Delivers the group's best ROE (28.8%) at a still-modest 8.95x P/E, underscoring how differently the market treats energy-only businesses versus Reliance's diversified structure.

Sources: [Screener.in](#)

KEY TAKEAWAY › This comparison is somewhat apples-to-oranges by design: Reliance's P/E premium over its energy peers isn't a mispricing of the O2C business specifically -- it's the market valuing Jio, Retail, and New Energy growth prospects that ONGC, IOC and BPCL simply don't have. Whether that premium is justified depends entirely on execution in the non-energy segments, which this deck's financials (drawn from consolidated numbers) cannot separate out cleanly.

BOARD & SENIOR MANAGEMENT ROSTER

Leadership

Chairman & Managing Director	Mukesh Ambani

Recent News (2/2)

October 17, 2025

Reliance Q2 FY26: Net profit up 9.7% on energy, telecom and digital growth

Broad-based growth across O2C, Jio and Retail segments, continuing a multi-quarter trend of consolidated profit growth led by the non-energy businesses.

Business Standard — [source](#)

KEY TAKEAWAY › Two structural catalysts dominate this year's Reliance news: the long-delayed Jio IPO finally has a 2026 target, and the New Energy business is moving from announcement to actual gigafactory launches. Both would, if delivered, give the market cleaner visibility into the parts of Reliance that currently justify its conglomerate premium -- a Jio listing in particular would let investors value that business directly rather than inferring its worth from the consolidated numbers this deck is built on.

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
23.8x	2.0x	8.91%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 5 years)

Metric (Rs Cr)	FY2022	FY2023	FY2024	FY2025	FY2026
Total Revenue	—	877,835	901,064	964,693	1,057,219
Net Income	—	66,702	69,621	69,648	80,775
EBITDA	—	153,307	176,944	181,274	204,906
Total Debt	—	334,392	346,142	369,575	398,000
Stockholders Equity	—	715,872	793,481	843,200	904,030
Free Cash Flow	—	-25,956	5,905	38,736	69,197
ROE	—	9.3%	8.8%	8.3%	8.9%

Year-over-year growth

YoY Growth	FY2023	FY2024	FY2025	FY2026
Revenue Growth	—	+2.6%	+7.1%	+9.6%
Net Income Growth	—	+4.4%	+0.0%	+16.0%

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

KEY TAKEAWAY › RELIANCE's revenue trend over FY2022-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

- Net margin moved from 7.6% in FY2022 to 7.6% in FY2026 — expanding profitability on each rupee of revenue.
- Profit dipped in FY2023 (Rs 66,702 Cr) before recovering — a single weak year rather than a multi-year decline.

KEY TAKEAWAY › Net Income for RELIANCE across FY2022-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

- EBITDA margin moved from 17.5% to 19.4% over the period — a genuine improvement in core operating efficiency.
- At the latest EBITDA of Rs 204,906 Cr against Rs 398,000 Cr of debt, it would take roughly 1.9 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for RELIANCE — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 9.3% to 8.9% over FY2022-FY2026 — a decline in capital efficiency worth investigating alongside the margin trend.
- Average ROE across the 4 years shown was 8.8% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › RELIANCE's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2022	FY2023	FY2024	FY2025	FY2026
Net Income	—	7.6%	7.7%	7.2%	7.6%
EBITDA	—	17.5%	19.6%	18.8%	19.4%
Total Debt	—	38.1%	38.4%	38.3%	37.6%
Stockholders Equity	—	81.5%	88.1%	87.4%	85.5%
Total Assets	—	183.1%	194.9%	202.1%	206.0%
Operating Cash Flow	—	13.1%	17.6%	18.5%	18.2%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Oil & Gas / Diversified Conglomerate

KEY TAKEAWAY › RELIANCE's P/E is 111% above its sector average — trading at a premium the market is paying for something (growth, order book, quality) not yet visible in trailing ratios.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

Company	P/E	P/B	ROE	Mkt Cap (Cr)
RELIANCE (this stock)	23.8	2.0	8.91%	1,772,085
ONGC	6.8	0.8	11.6%	297,521
IOC	5.8	0.9	20.5%	193,883
BPCL	8.9	1.4	28.8%	138,659

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 3 largest sector peers, BPCL has the highest ROE (28.8%) vs RELIANCE's 8.91% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

Peer Positioning Map

KEY TAKEAWAY › RELIANCE sits in the quadrant that is expensive despite below-average returns — the harder combination to justify, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

KEY TAKEAWAY › Debt-to-Equity of 0.44x is below the ~1x watch level — leverage looks manageable on this measure alone.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
• Whether the stock is priced richer or cheaper than same-sector peers right now • A repeatable, mechanical comparison — same rule applied to all 200 stocks	• Whether the premium is justified by superior growth, order book, or moat • The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › RELIANCE is flagged **Expensive vs pure energy peers** (P/E premium reflects Jio & Retail, not O2C alone) because its current multiple sits +111% vs peers — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

Why This Verdict

KEY TAKEAWAY › **MIXED SIGNAL** (weak standalone ROE, but priced as a growth conglomerate) — a middling Insight Score combined with a valuation that's +111% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE	THE BEAR CASE
• A 2026-targeted Jio IPO could unlock significant value by letting the market price the telecom/digital business separately from the lower-multiple O2C segment it currently sits alongside. • New Energy gigafactories (solar and 40 GWh battery capacity) moving from construction to commercial launch in 2026 add a third major growth vertical beyond Jio and Retail. • Management has publicly targeted doubling consolidated EBITDA by 2027 -- an aggressive but explicit growth target giving investors a benchmark to hold the company to.	• Standalone ROE of 8.91% is well below what a stock trading at 23.8x P/E would typically need to justify that multiple on fundamentals alone, especially versus energy peers earning 20%+ ROE at a fraction of the P/E. • The Jio IPO has been repeatedly delayed since it was first floated roughly seven years ago -- 2026 is a target, not a certainty, and further delay would remove a key re-rating catalyst. • New Energy is capital-intensive and still pre-commercial in most segments -- gigafactory launches carry real execution risk, and the payback timeline on this investment remains largely unproven.

Sources: [Business Standard](#) · [Screener.in](#)

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
44/100	Expensive vs pure energy peers	0.44x	—

Reliance's 23.8x P/E and 8.91% ROE look, in isolation, like an expensive stock generating a mediocre return on equity -- roughly 3-4x the P/E of ONGC, IOC or BPCL, energy peers with comparable or better ROE. But that comparison undersells what the market is actually pricing: Jio and Retail growth, plus optionality on a New Energy business now moving toward commercial launch. The MIXED SIGNAL read reflects that tension -- statistically expensive against pure energy peers, but potentially reasonably priced as a diversified growth conglomerate, and a pending Jio IPO could resolve this ambiguity by letting the market value that business on its own. This is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
• P/E compresses toward the Oil & Gas / Diversified Conglomerate sector average (currently 11.3x vs. RELIANCE's 23.8x) without a matching drop in earnings — the premium would then be paid for, not merely priced in.	• Debt-to-Equity rises meaningfully above its current 0.44x — the balance sheet is a strength today, and that would erode it.

KEY TAKEAWAY › 1 triggers on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time BHEL reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 4 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Not enough clean historical data to extrapolate a forecast for this stock.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
CLEAR Total Debt rising every year	CLEAR Net margin declining every year	CLEAR Most recent year negative	CLEAR Debt-to-Equity above 1.5x

KEY TAKEAWAY › All 4 mechanical checks come back clear — no rising-debt, declining-margin, negative-FCF or elevated-leverage pattern detected. This is not a full risk assessment; always verify independently.

ROE	—	9.32%	8.77%	8.26%	8.93%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for RELIANCE — Reliance Industries.

ClearStocks · An independent, personal research project

Refreshed monthly · Educational research only, not investment advice
