THE ONE-PAGE READ

Executive Summary

SUNPHARMA — Sun Pharmaceutical Industries

Expensive vs Cipla and Dr. Reddy's, priced for the pending Organon acquisition

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
55/100	Pharmaceuticals	Rs 1,932.00	MIXED SIGNAL

- 54.48% promoter ownership limits free float and ties the stock to government/public-sector capex cycles.
- Brokerage views are sharply split — bull cases point to order-book strength, bear cases to valuation and a maturing thermal-power cycle (see Section 5).
- Revenue grew at a 10.4% CAGR over the last 3 years of available financial history (see Section 3).

This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

Key Statistics

CURRENT PRICE	REPORT DATE	INSIGHT SCORE	MARKET CAP
Rs 1,932.00	September 2026	55/100	Rs 463,480 Cr

Valuation Verdict: Expensive vs Cipla and Dr. Reddy's, priced for the pending Organon acquisition · **Model Read:** MIXED SIGNAL (highest peer ROE, but valuation and integration risk both elevated by a record-size pending deal)

52-Week Trading Range

Low: Rs 1,547.00

High: Rs 2,048.00

KEY TAKEAWAY › SUNPHARMA trades at Rs 1,932.00, 77% of the way up its 52-week range (Rs 1,547.00-Rs 2,048.00) — Insight Score 55/100, flagged Expensive vs Cipla and Dr. Reddy's, priced for the pending Organon acquisition.

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Pharmaceuticals	Healthcare	Nifty 200	INE044A01036

Sun Pharmaceutical Industries Ltd.

Founded 1983 — India's largest pharmaceutical company by revenue, manufacturing generic and branded formulations plus Active Pharmaceutical Ingredients (APIs) across global markets including the US, India and emerging markets.

Global Specialty (branded, higher-margin drugs)
Generics — US & India
Emerging Markets
Active Pharmaceutical Ingredients (API)

A full company profile, shareholding pattern, segment breakdown and industry context follow in Section 2 of this report.

SECTION 2

Company, Industry & Leadership

- Company Profile
- Shareholding Pattern
- Industry Context — Market Sizing
- Industry Context — Competitive Landscape
- Leadership
- Recent News

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
43 years	Mumbai, Maharashtra, India	4	Nifty 200

OWNERSHIP

Sun Pharma is majority-owned by founder Dilip Shanghvi and affiliated promoter entities, holding 54.48% of the company. Domestic Institutional Investors hold about 22.1% and Foreign Institutional Investors about 14.5%, with the remaining ~8.9% held by the public and government.

OPERATIONS

India's largest pharmaceutical company by revenue, manufacturing generic and branded formulations plus Active Pharmaceutical Ingredients (APIs) across global markets including the US, India and emerging markets

Sources: [Screener.in](#) · [Forbes India](#) — Dilip Shanghvi

KEY TAKEAWAY › Sun Pharma has spent the past decade shifting its mix from commoditized generics toward higher-margin specialty branded drugs -- a strategy now taking its biggest step yet with a pending \$11.75 billion acquisition of Organon (see Recent News), which would be the largest deal in Indian pharma history if completed. That single announcement is the dominant fact shaping this deck's valuation and risk picture: the market is pricing Sun Pharma's 36.7x P/E partly on the promise of what a combined Sun Pharma-Organon entity could become, not just on today's standalone earnings.

Shareholding Pattern

Promoter (Dilip Shanghvi & affiliates)	54.48%
DII (Domestic Institutions)	22.06%
FII (Foreign Institutions)	14.54%
Public / Retail / Govt	8.92%

Key Named Investors		
Investor	Holding	Note
Dilip Shanghvi (founder) & family entities	54.48%	Promoter -- founder-led, high insider alignment
Life Insurance Corporation of India (LIC)	~5.0%	Largest named domestic institutional holder
SBI Mutual Fund (aggregated)	~2.5%	Aggregated across multiple actively-managed schemes
Government of Singapore / GIC	~1.0%	Sovereign wealth investor with a long-standing Sun Pharma position

Sources: [Screener.in](#)

KEY TAKEAWAY › At 54.5% founder-controlled promoter holding, Sun Pharma has notably high insider ownership for a company of this scale -- a structure that has historically supported long-term strategic bets like the pending Organon acquisition, since Shanghvi and family bear the largest share of the outcome.

Industry Context

Sun Pharma competes in India's pharmaceutical export sector against Cipla and Dr. Reddy's Laboratories, among others. FY26 has seen continued pressure on US generics pricing across the industry, pushing all three companies further toward specialty and branded portfolios. Sun Pharma's proposed \$11.75 billion acquisition of US-based Organon -- a women's health and biosimilars specialist -- would be the largest acquisition in Indian pharmaceutical industry history and, if completed, would immediately propel Sun Pharma into the global top three in women's health.

Sources: [FiercePharma](#) — [Organon Deal](#)

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. BHEL
Cipla	Cheaper peer, lower ROE	Trades at 31.5x P/E with an 11.6% ROE -- cheaper than Sun Pharma on both multiples but also showing weaker five-year sales growth (8.0%) and declining promoter holding.
Dr. Reddy's Laboratories	Cheapest peer, profit under pressure	The cheapest of the three at 30.1x P/E, but has seen trailing-twelve-month profit decline 43% and its stock fall 8.4% over the past year -- a peer facing real near-term earnings pressure.

Sources: [Screener.in](#)

KEY TAKEAWAY › Sun Pharma's premium multiple over both peers (36.7x vs 30-32x) is consistent with it also posting the group's best current ROE (16.0% vs 11-12%) -- on that basis the premium looks at least partly earned. The bigger question the peer comparison can't answer is how the Organon deal, if it closes, reshapes this picture: it would add meaningful debt and integration complexity that neither Cipla nor Dr. Reddy's carries at anywhere near this scale.

BOARD & SENIOR MANAGEMENT ROSTER

Leadership

Founder & Managing Director	Dilip Shanghvi

3 ITEMS, MOST RECENT FIRST

Recent News

April 27, 2026

Sun Pharma to acquire Organon for \$11.75 billion

Deal would be the largest in Indian pharmaceutical history, propelling Sun Pharma into the global top three in women's health and adding a biosimilars portfolio.

Forbes / FiercePharma — [source](#)

2025-2026

Sun Pharma's alopecia drug Leqselvi hits US market after Incyte patent dispute resolves

Following an initial court injunction blocking its launch, Sun Pharma won on appeal and subsequently reached a settlement with Incyte, clearing the path for a full US commercial launch.

FiercePharma — [source](#)

2026

Sun Pharma's Leqselvi boosts US innovative sales record

Following its US launch, Leqselvi has been a meaningful contributor to Sun Pharma's specialty/branded revenue growth in its US business.

India Pharma Outlook — [source](#)

KEY TAKEAWAY › This year's news tells a story of a company willing to take on real legal and financial risk for specialty-drug upside: a multi-year patent fight over Leqselvi that could easily have gone the other way, followed almost immediately by the largest acquisition in the company's history. Both bets have gone Sun Pharma's way so far, but the Organon deal in particular is still pending and carries real integration and financing risk that won't be resolved for some time.

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
36.7x	5.5x	16.0%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 4 years)

Metric (Rs Cr)	FY2023	FY2024	FY2025	FY2026
Total Revenue	43,279	47,758	52,041	58,220
Net Income	8,474	9,576	10,929	11,479
EBITDA	12,111	13,883	16,559	18,396
Total Debt	6,886	3,274	2,362	4,627
Stockholders Equity	55,995	63,667	72,218	83,570
Free Cash Flow	2,874	9,933	11,944	8,810
ROE	15.1%	15.0%	15.1%	13.7%
Year-over-year growth				
YoY Growth	FY2024	FY2025	FY2026	
Revenue Growth	+10.4%	+9.0%	+11.9%	
Net Income Growth	+13.0%	+14.1%	+5.0%	

KEY TAKEAWAY › Revenue grew at a 10.4% CAGR and Net Income at a 10.6% CAGR over the last 3 years of available data — profit growth outpaced revenue growth, suggesting improving margins.

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

- Revenue grew 35% cumulatively from FY2023 to FY2026 (Rs 43,279 Cr → Rs 58,220 Cr), a 10.4% CAGR over 3 years.
- Growth has been uneven year to year (from +9.0% to +11.9%), rather than a smooth trend — consistent with lumpy, order-book-driven revenue recognition typical of capital-intensive project businesses.

KEY TAKEAWAY › SUNPHARMA's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

- Net margin moved from 19.6% in FY2023 to 19.7% in FY2026 — expanding profitability on each rupee of revenue.
- Net Income CAGR (10.6%) has outpaced Revenue CAGR (10.4%) — classic operating leverage: fixed costs are being spread over a larger revenue base.

KEY TAKEAWAY › Net Income for SUNPHARMA across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

- EBITDA margin moved from 28.0% to 31.6% over the period — a genuine improvement in core operating efficiency.
- Total Debt has fallen 33% over the period (Rs 6,886 Cr → Rs 4,627 Cr) while EBITDA grew — the balance sheet is deleveraging in absolute terms.
- At the latest EBITDA of Rs 18,396 Cr against Rs 4,627 Cr of debt, it would take roughly 0.3 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for SUNPHARMA — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 15.1% to 13.7% over FY2023-FY2026 — a decline in capital efficiency worth investigating alongside the margin trend.
- Shareholder Equity grew 49% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 14.8% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › SUNPHARMA's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

KEY TAKEAWAY › EBITDA margin moved from 28.0% of revenue in FY2023 to 31.6% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2023	FY2024	FY2025	FY2026
Net Income	19.6%	20.1%	21.0%	19.7%
EBITDA	28.0%	29.1%	31.8%	31.6%
Total Debt	15.9%	6.9%	4.5%	7.9%
Stockholders Equity	129.4%	133.3%	138.8%	143.5%
Total Assets	186.6%	179.0%	177.0%	186.9%
Operating Cash Flow	11.5%	25.4%	27.0%	21.3%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

KEY TAKEAWAY › Total Debt moved from 15.9% of revenue to 7.9% over this period (-8.0 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Pharmaceuticals

KEY TAKEAWAY › SUNPHARMA's P/E is 12% above its sector average — trading at a premium the market is paying for something (growth, order book, quality) not yet visible in trailing ratios.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

Company	P/E	P/B	ROE	Mkt Cap (Cr)
SUNPHARMA (this stock)	36.7	5.5	16.0%	463,480
CIPLA	31.5	3.3	11.6%	112,729
DRREDDY	30.1	2.6	11.2%	97,006

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 2 largest sector peers, CIPLA has the highest ROE (11.6%) vs SUNPHARMA's 16.0% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

Peer Positioning Map

KEY TAKEAWAY › SUNPHARMA sits in the quadrant that is expensive and high-quality — the market is paying up for demonstrated returns, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

KEY TAKEAWAY › Debt-to-Equity of 0.06x is below the ~1x watch level — leverage looks manageable on this measure alone.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
- Whether the stock is priced richer or cheaper than same-sector peers right now - A repeatable, mechanical comparison — same rule applied to all 200 stocks	- Whether the premium is justified by superior growth, order book, or moat - The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › SUNPHARMA is flagged **Expensive vs Cipla and Dr. Reddy's, priced for the pending Organon acquisition** because its current multiple sits +12% vs peers — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

Why This Verdict

KEY TAKEAWAY › **MIXED SIGNAL** (highest peer ROE, but valuation and integration risk both elevated by a record-size pending deal) — a middling Insight Score combined with a valuation that's +12% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE	THE BEAR CASE
• Sun Pharma posts the best ROE of its immediate peer group (16.0% vs Cipla's 11.6% and Dr. Reddy's 11.2%), suggesting its premium multiple is at least partly grounded in superior current profitability. • The Organon acquisition, if completed on favorable terms, would immediately make Sun Pharma a global top-three player in women's health and add a biosimilars pipeline the company currently lacks organically. • Winning the Leqselvi patent dispute with Incyte after an initial adverse injunction demonstrates Sun Pharma's ability to defend and commercialize specialty assets in the competitive US market.	• An \$11.75 billion acquisition is a large bet relative to Sun Pharma's own ~\$55 billion market cap, and will likely require significant new debt -- a meaningful change to a company that has historically run a conservative balance sheet. • Integration risk on a deal of this size is real and largely unproven -- Sun Pharma has not previously executed an acquisition anywhere near this scale. • At 5.55x P/B, the stock already prices in a good deal of optimism; if the Organon deal falls through, faces regulatory delays, or integration disappoints, there is limited valuation cushion.

Sources: [FiercePharma](#) · [Screener.in](#)

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
55/100	Expensive vs Cipla and Dr. Reddy's, priced for the pending Organon acquisition	0.06x	—

Sun Pharma's 36.7x P/E is a real premium to Cipla (31.5x) and Dr. Reddy's (30.1x), but it also posts the group's best ROE (16.0% vs 11-12%) -- on trailing fundamentals alone, the premium is at least partially earned. The MIXED SIGNAL read exists because the pending \$11.75bn Organon acquisition is large enough to change the company's risk profile materially: it would add meaningful new debt and integration complexity that isn't yet reflected in the balance-sheet figures shown elsewhere in this deck. Investors buying today are, to a real degree, underwriting management's judgment on a deal that hasn't closed yet. This is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
• P/E compresses toward the Pharmaceuticals sector average (currently 32.8x vs. SUNPHARMA's 36.7x) without a matching drop in earnings — the premium would then be paid for, not merely priced in.	• Debt-to-Equity rises meaningfully above its current 0.06x — the balance sheet is a strength today, and that would erode it. • Net Income growth reverses and turns negative for two consecutive years — the current growth trend is doing a lot of the work in this verdict.

KEY TAKEAWAY › 1 triggers on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time BHEL reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Metric (Rs Cr)	FY2026 (actual)	FY2027E	FY2028E	FY2029E
Revenue	58,220	64,270	70,948	78,320
Net Income	11,479	12,702	14,055	15,552

Based on a historical Revenue CAGR of +10.4% and Net Income CAGR of +10.6% over the last 3 years.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
CLEAR Total Debt rising every year	CLEAR Net margin declining every year	CLEAR Most recent year negative	CLEAR Debt-to-Equity above 1.5x

KEY TAKEAWAY › All 4 mechanical checks come back clear — no rising-debt, declining-margin, negative-FCF or elevated-leverage pattern detected. This is not a full risk assessment; always verify independently.

Capital Expenditure (Rs Cr)	-2,086	-2,202	-2,129	-3,609
ROE	15.13%	15.04%	15.13%	13.74%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for SUNPHARMA — Sun Pharmaceutical Industries.

ClearStocks · An independent, personal research project

Refreshed monthly · Educational research only, not investment advice
