- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

# Financial Snapshot

| P/E RATIO | P/B RATIO | RETURN ON EQUITY |
|-----------|-----------|------------------|
| —X        | —X        | —                |

|                        |                                                                                                                                                                                                    |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| P/E Ratio              | Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone. |
| P/B Ratio              | Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.                               |
| Return on Equity (ROE) | How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.                      |

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

# Financial History (last 5 years)

| Metric (Rs Cr)        | FY2022 | FY2023 | FY2024 | FY2025 | FY2026 |
|-----------------------|--------|--------|--------|--------|--------|
| Total Revenue         | —      | 13,660 | 15,099 | 17,508 | 20,171 |
| Net Income            | —      | 1,204  | 1,150  | 1,278  | 1,542  |
| EBITDA                | —      | 2,185  | 2,203  | 2,667  | 2,936  |
| Total Debt            | —      | 1,600  | 3,477  | 2,393  | 2,820  |
| Stockholders Equity   | —      | 16,277 | 16,057 | 20,001 | 21,788 |
| Free Cash Flow        | —      | 1,150  | 1,602  | 1,597  | 1,973  |
| ROE                   | —      | 7.4%   | 7.2%   | 6.4%   | 7.1%   |
| Year-over-year growth |        |        |        |        |        |
| YoY Growth            | FY2023 | FY2024 | FY2025 | FY2026 |        |
| Revenue Growth        | —      | +10.5% | +16.0% | +15.2% |        |
| Net Income Growth     | —      | -4.4%  | +11.1% | +20.6% |        |

FINANCIAL TREND ANALYSIS 1 OF 4

# Revenue Trend

**KEY TAKEAWAY** › TATACONSUM's revenue trend over FY2022-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

# Profitability Trend

- Net margin moved from 8.8% in FY2022 to 7.6% in FY2026 — compressing profitability on each rupee of revenue.
- Profit dipped in FY2024 (Rs 1,150 Cr) before recovering — a single weak year rather than a multi-year decline.

**KEY TAKEAWAY** › Net Income for TATACONSUM across FY2022-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

## FINANCIAL TREND ANALYSIS 3 OF 4

## Operating Profit vs. Leverage

- EBITDA margin moved from 16.0% to 14.6% over the period — pressure on core operating efficiency, independent of one-off items.
- At the latest EBITDA of Rs 2,936 Cr against Rs 2,820 Cr of debt, it would take roughly 1.0 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

**KEY TAKEAWAY** › EBITDA (operating profit) plotted against Total Debt for TATACONSUM — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

# Return on Equity Trend

- ROE moved from 7.4% to 7.1% over FY2022-FY2026 — a decline in capital efficiency worth investigating alongside the margin trend.
- Average ROE across the 4 years shown was 7.0% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

**KEY TAKEAWAY** › TATACONSUM's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

# Common-Size Statement (% of Revenue) (1/2)

**What is this?** A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

FULL TABLE, EVERY LINE ITEM

# Common-Size Statement (% of Revenue) (2/2)

| % of Revenue        | FY2022 | FY2023 | FY2024 | FY2025 | FY2026 |
|---------------------|--------|--------|--------|--------|--------|
| Net Income          | —      | 8.8%   | 7.6%   | 7.3%   | 7.6%   |
| EBITDA              | —      | 16.0%  | 14.6%  | 15.2%  | 14.6%  |
| Total Debt          | —      | 11.7%  | 23.0%  | 13.7%  | 14.0%  |
| Stockholders Equity | —      | 119.2% | 106.3% | 114.2% | 108.0% |
| Total Assets        | —      | 167.0% | 185.6% | 182.6% | 170.8% |
| Operating Cash Flow | —      | 10.7%  | 12.8%  | 11.7%  | 12.0%  |

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

## SECTION 4

# Peer & Sector Benchmarking

---

- Sector Comparison
- Leverage & Solvency Ratios

BALANCE-SHEET RISK, VISUALIZED

# Leverage & Solvency Ratios

Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

**KEY TAKEAWAY** › Debt-to-Equity of 0.13x is below the ~1x watch level — leverage looks manageable on this measure alone.

*Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.*

## SECTION 5

# Valuation, Risk & Outlook

- Why This Verdict
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

# Valuation Detail

| WHAT THIS DOES CAPTURE                                                                                                                                                                                               | WHAT THIS DOES NOT CAPTURE                                                                                                                                                                            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"><li>• Whether the stock is priced richer or cheaper than same-sector peers right now</li><li>• A repeatable, mechanical comparison — same rule applied to all 200 stocks</li></ul> | <ul style="list-style-type: none"><li>• Whether the premium is justified by superior growth, order book, or moat</li><li>• The company's own valuation history — only today's peer snapshot</li></ul> |

**KEY TAKEAWAY** › TATACONSUM is flagged **Not yet scored** because its current multiple sits — — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

# Why This Verdict

**KEY TAKEAWAY** › Full valuation model not yet run for this stock — a weak Insight Score combined with a valuation that's — is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

## 3-Year Trend-Based Forecast

---

**This is not a professional forecast or a DCF model.** It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 4 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Not enough clean historical data to extrapolate a forecast for this stock.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

# Risk Flags

| DEBT TREND                                               | MARGIN TREND                                                | FREE CASH FLOW                                        | LEVERAGE                                              |
|----------------------------------------------------------|-------------------------------------------------------------|-------------------------------------------------------|-------------------------------------------------------|
| <div>CLEAR</div> <div>Total Debt rising every year</div> | <div>CLEAR</div> <div>Net margin declining every year</div> | <div>CLEAR</div> <div>Most recent year negative</div> | <div>CLEAR</div> <div>Debt-to-Equity above 1.5x</div> |

**KEY TAKEAWAY** › All 4 mechanical checks come back clear — no rising-debt, declining-margin, negative-FCF or elevated-leverage pattern detected. This is not a full risk assessment; always verify independently.

## SECTION 6

# Appendix & Methodology

---

- Risks & Limitations
- Disclaimers
- Appendix — Raw Financial Data
- Glossary & Methodology

# Risks & Limitations

---

- This deck is generated automatically from a statistical model and public data — it has not been reviewed by a financial analyst.
- Historical patterns the model relies on may not repeat in the future.
- Data may be delayed or contain provider errors; always verify key figures independently.
- The 3-year forecast above is a mechanical extrapolation of past growth, not a professional projection — it does not account for competition, macro conditions, or company-specific plans.
- This is not a substitute for professional financial advice.

# Disclaimers

# Glossary & Methodology

---

**P/E Ratio** — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

**P/B Ratio** — Price-to-Book: share price divided by book value (net worth) per share.

**ROE** — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

**EBITDA** — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

**Free Cash Flow** — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

**Debt-to-Equity** — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

**Debt-to-EBITDA** — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

**CAGR** — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

**Common-Size Statement** — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

**Insight Score** — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

**Data & methodology, in brief:** financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

# Thank you.

This concludes the ClearStocks Company Deck for TATACONSUM — Tata Consumer Products Ltd..
