THE ONE-PAGE READ

Executive Summary

TCS — Tata Consultancy Services

Cheap vs peers (P/E, -1% vs sector, but sector itself is depressed)

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
61/100	Information Technology	Rs 2,320.00	MIXED SIGNAL

- 71.77% promoter ownership limits free float and ties the stock to government/public-sector capex cycles.
- Brokerage views are sharply split — bull cases point to order-book strength, bear cases to valuation and a maturing thermal-power cycle (see Section 5).
- Revenue grew at a 5.8% CAGR over the last 3 years of available financial history (see Section 3).

This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

Key Statistics

CURRENT PRICE	REPORT DATE	INSIGHT SCORE	MARKET CAP
Rs 2,320.00	September 2026	61/100	Rs 840,506 Cr

Valuation Verdict: Cheap vs peers (P/E, -1% vs sector, but sector itself is depressed) · **Model Read:** MIXED SIGNAL (strong ROE + sector-wide IT demand slowdown)

52-Week Trading Range

KEY TAKEAWAY › TCS trades at Rs 2,320.00, 25% of the way up its 52-week range (Rs 1,976.00-Rs 3,350.00) — Insight Score 61/100, flagged Cheap vs peers (P/E, -1% vs sector, but sector itself is depressed).

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN

SECTION 2

Company, Industry & Leadership

- Company Profile
- Shareholding Pattern
- Industry Context — Market Sizing
- Industry Context — Competitive Landscape
- Leadership
- Recent News

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
58 years	Mumbai, Maharashtra, India	5	Nifty 200

OWNERSHIP

TCS is majority-owned by Tata Sons, the holding company of the Tata Group, which holds roughly 71.8% of the company -- among the highest promoter holdings of any large-cap IT company in India. Foreign Institutional Investors hold about 9.1% and Domestic Institutional Investors about 13.4%, with the remaining ~5.7% held by the public.

OPERATIONS

Over 600,000 employees globally as of FY26, serving clients across 55+ countries from delivery centres concentrated in India

Sources: [Screener.in](#) · [TCS Investor Relations](#)

KEY TAKEAWAY › TCS is the flagship company of the Tata Group and India's largest IT services exporter by revenue and market cap. Its scale (over 600,000 employees, ~\$30bn+ in annual revenue) and Tata-group backing have historically commanded a valuation premium over peers -- what stands out this year is that the premium has compressed: TCS's 15.6x P/E is now barely above Infosys's 14.7x, despite TCS carrying a far higher ROE (51.8% vs 31.9%). The gap between fundamentals and the multiple the market is willing to pay is the core valuation story in this deck.

Shareholding Pattern

Promoter (Tata Sons)	71.77%
FII (Foreign Institutions)	9.07%
DII (Domestic Institutions)	13.41%
Public / Retail	5.69%

Key Named Investors		
Investor	Holding	Note
Tata Sons Pvt Ltd	71.77%	Promoter -- Tata Group holding company, by far the dominant shareholder
Life Insurance Corporation of India (LIC)	~3.5%	Largest named domestic institutional holder
SBI Mutual Fund (various schemes)	~1.2%	Aggregated across multiple actively-managed schemes
Government of Singapore	~0.9%	Sovereign wealth investor, long-horizon foreign holding

Sources: [Screener.in](#)

KEY TAKEAWAY › At 71.8% promoter holding, TCS has one of the tightest floats among Nifty 50 stocks -- this concentrates control firmly with Tata Sons and limits the free float available for institutional accumulation, which can amplify price moves on days of heavy FII buying or selling relative to lower-promoter-holding peers like Infosys.

Industry Context

TCS operates in India's IT services export industry, competing directly with Infosys, Wipro and HCL Technologies. FY26/27 has been a year of AI-driven restructuring across the sector: all four major players have been reshaping headcount and skill mix as clients shift IT budgets from traditional staff-augmentation work toward AI-enabled delivery, even as AI-linked revenue itself is growing fast -- TCS alone reported an AI revenue run-rate of roughly \$2.6 billion in Q1 FY27. Client budgets in the sector's largest vertical, BFSI, have also been more cautious through the year amid global rate and growth uncertainty.

Sources: [Eastern Herald — India IT Sector Q1 FY27](#)

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. BHEL
Infosys	Second-largest peer, under pressure	Stock down roughly 23% over the past year; still posts a strong 31.9% ROE, and trades at a slightly cheaper 14.7x P/E than TCS despite the recent share-price weakness.
Wipro	Weakest growth of the group	Delivered just 8.38% sales growth over the past five years -- the slowest of the four majors -- but offers the highest dividend yield (6.26%) and trades at the cheapest P/E (13.2x).
HCL Technologies	Premium multiple, strongest margins	Trades at the richest P/E of the peer group (19.6x) and carries the least debt of the four, reflecting the market rewarding its more diversified product-and-services mix (including HCLSoftware).

Sources: [Eastern Herald](#) — TCS AI Revenue Run Rate

KEY TAKEAWAY › The IT services pecking order by valuation has scrambled this year: TCS's traditional scale-and-quality premium over Infosys has nearly disappeared (15.6x vs 14.7x), while HCL Technologies -- historically the value pick of the group -- now commands the group's highest multiple. That reordering suggests the market is pricing AI-transition execution and diversification more than brand or scale alone this cycle.

BOARD & SENIOR MANAGEMENT ROSTER

4 ITEMS, MOST RECENT FIRST

Recent News (2/2)

August 28, 2026

TCS hits \$2.6bn AI revenue run-rate as Wipro posts flat profit in a divided Q1 FY27 for Indian IT

TCS and HCL Tech outperformed Infosys and Wipro in the latest quarter, widening the performance gap within the sector.

Eastern Herald — [source](#)

KEY TAKEAWAY › The throughline across this year's news for TCS is a company executing well operationally (steady double-digit revenue growth, a fast-growing AI business) while managing real reputational friction on the workforce side -- layoffs paired with a CEO pay rise is the kind of headline that doesn't move a quarterly P&L; but can matter for talent retention and public perception over a longer horizon.

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
15.6x	7.8x	51.8%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 4 years)

Metric (Rs Cr)	FY2023	FY2024	FY2025	FY2026
Total Revenue	225,458	240,893	255,324	267,021
Net Income	42,147	45,908	48,553	49,210
EBITDA	62,708	67,760	71,369	72,274
Total Debt	7,688	8,021	9,392	11,283
Stockholders Equity	90,424	90,489	94,756	107,240
Free Cash Flow	38,865	41,664	44,971	47,948
ROE	46.6%	50.7%	51.2%	45.9%
Year-over-year growth				
YoY Growth	FY2024	FY2025	FY2026	
Revenue Growth	+6.8%	+6.0%	+4.6%	
Net Income Growth	+8.9%	+5.8%	+1.4%	

KEY TAKEAWAY › Revenue grew at a 5.8% CAGR and Net Income at a 5.3% CAGR over the last 3 years of available data — revenue outpaced profit growth, suggesting margin pressure.

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

- Revenue grew 18% cumulatively from FY2023 to FY2026 (Rs 225,458 Cr → Rs 267,021 Cr), a 5.8% CAGR over 3 years.
- Growth has slowed every year — from +6.8% to +4.6% — worth checking whether that's a maturing base or a genuine demand slowdown.

KEY TAKEAWAY › TCS's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

- Net margin moved from 18.7% in FY2023 to 18.4% in FY2026 — compressing profitability on each rupee of revenue.
- Net Income CAGR (5.3%) has lagged Revenue CAGR (5.8%) — revenue growth is not yet converting proportionally into bottom-line growth.

KEY TAKEAWAY › Net Income for TCS across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

- EBITDA margin moved from 27.8% to 27.1% over the period — pressure on core operating efficiency, independent of one-off items.
- Total Debt has risen 47% over the period (Rs 7,688 Cr → Rs 11,283 Cr) while EBITDA grew — debt is being taken on faster than the operating profit base that would service it.
- At the latest EBITDA of Rs 72,274 Cr against Rs 11,283 Cr of debt, it would take roughly 0.2 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for TCS — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 46.6% to 45.9% over FY2023-FY2026 — a decline in capital efficiency worth investigating alongside the margin trend.
- Shareholder Equity grew 19% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 48.6% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › TCS's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

TCS Margins as % of Revenue, by Year

KEY TAKEAWAY › EBITDA margin moved from 27.8% of revenue in FY2023 to 27.1% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2023	FY2024	FY2025	FY2026
Net Income	18.7%	19.1%	19.0%	18.4%
EBITDA	27.8%	28.1%	28.0%	27.1%
Total Debt	3.4%	3.3%	3.7%	4.2%
Stockholders Equity	40.1%	37.6%	37.1%	40.2%
Total Assets	63.7%	60.8%	62.5%	68.3%
Operating Cash Flow	18.6%	18.4%	19.2%	19.5%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

KEY TAKEAWAY › Total Debt moved from 3.4% of revenue to 4.2% over this period (+0.8 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Information Technology

TCS vs. Information Technology Sector Average

KEY TAKEAWAY › TCS's P/E is 1% below its sector average — trading at a discount, which can mean overlooked value or a real, priced-in problem.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

Company	P/E	P/B	ROE	Mkt Cap (Cr)
TCS (this stock)	15.6	7.8	51.8%	840,506
INFY	14.7	5.0	31.9%	457,769
HCLTECH	19.6	4.7	23.8%	355,829
WIPRO	13.2	2.1	15.5%	173,790

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 3 largest sector peers, INFY has the highest ROE (31.9%) vs TCS's 51.8% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

Peer Positioning Map

KEY TAKEAWAY › TCS sits in the quadrant that is cheap and high-quality — often the most interesting quadrant, worth checking why the market hasn't re-rated it, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

KEY TAKEAWAY › Debt-to-Equity of 0.11x is below the ~1x watch level — leverage looks manageable on this measure alone.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
• Whether the stock is priced richer or cheaper than same-sector peers right now • A repeatable, mechanical comparison — same rule applied to all 200 stocks	• Whether the premium is justified by superior growth, order book, or moat • The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › TCS is flagged **Cheap vs peers (P/E, -1% vs sector, but sector itself is depressed)** because its current multiple sits -1% vs peers — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

Why This Verdict

KEY TAKEAWAY › **MIXED SIGNAL** (strong ROE + sector-wide IT demand slowdown) — a middling Insight Score combined with a valuation that's -1% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE	THE BEAR CASE
• TCS's ROE of 51.8% is roughly 1.6x Infosys's and more than 3x Wipro's, yet its P/E premium over both has almost disappeared -- a valuation gap that looks hard to justify on fundamentals alone. • AI revenue run-rate of ~\$2.6 billion (Q1 FY27) shows TCS successfully monetizing the same AI shift that is disrupting traditional staff-augmentation revenue elsewhere in the sector. • 71.8% promoter holding by Tata Sons signals long-term strategic commitment and insulates the company from the kind of ownership-driven volatility seen at more widely-held peers.	• ~12,000 layoffs in a single year, concentrated in mid-and-senior roles, raise real questions about delivery capacity and institutional knowledge loss during a period when the company is simultaneously trying to scale new AI offerings. • The CEO pay hike alongside mass layoffs is a governance-optics problem that, while not a balance-sheet risk, can affect employer brand and retention of the talent TCS needs most for its AI transition. • A 7.83x P/B and premium multiple relative to Wipro and Infosys's book values still price in some scale premium -- if the sector-wide slowdown in traditional IT services spending persists, that premium could compress further.

Sources: [Eastern Herald](#) · [PeopleMatters](#)

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
61/100	Cheap vs peers	0.11x	—

TCS's valuation gap with Infosys has nearly closed (15.6x vs 14.7x P/E) despite TCS running a far superior ROE (51.8% vs 31.9%) and holding the strongest brand and scale position in Indian IT -- on a pure numbers basis, that looks like TCS is statistically cheap relative to its own quality. The MIXED SIGNAL read reflects that this cheapness is happening inside a sector-wide slowdown and workforce restructuring cycle affecting all four major IT players, not something specific to TCS's execution. Whether the AI transition ultimately expands or compresses margins industry-wide is still an open question this deck cannot resolve -- this is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
A sustained re-rating of the sector as a whole, independent of this company's own numbers.	- P/E re-rates further above the Information Technology sector average (15.8x) while ROE stays flat — that would mean the market is pricing in growth the numbers don't yet show. - Debt-to-Equity rises meaningfully above its current 0.11x — the balance sheet is a strength today, and that would erode it. - Net Income growth reverses and turns negative for two consecutive years — the current growth trend is doing a lot of the work in this verdict.

KEY TAKEAWAY › 1 triggers on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time BHEL reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Metric (Rs Cr)	FY2026 (actual)	FY2027E	FY2028E	FY2029E
Revenue	267,021	282,513	298,904	316,246
Net Income	49,210	51,818	54,565	57,457

Based on a historical Revenue CAGR of +5.8% and Net Income CAGR of +5.3% over the last 3 years.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
FLAGGED Total Debt rising every year	CLEAR Net margin declining every year	CLEAR Most recent year negative	CLEAR Debt-to-Equity above 1.5x

■ Total Debt has risen every year for the last 4 years of available data.

These are mechanical checks on the numbers above, not a professional risk assessment.

Free Cash Flow (Rs Cr)	38,865	41,664	44,971	47,948
Operating Cash Flow (Rs Cr)	41,965	44,338	48,908	52,094
Capital Expenditure (Rs Cr)	-3,100	-2,674	-3,937	-4,146
ROE	46.61%	50.73%	51.24%	45.89%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for TCS — Tata Consultancy Services.

ClearStocks · An independent, personal research project
