THE ONE-PAGE READ

Executive Summary

AXISBANK — Axis Bank Ltd.

Cheap vs peers (P/B, -29%)

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
63/100	Financial Services	—	Trading below its sector's typical valuation on this metric.

- Brokerage views are sharply split between bull and bear cases on this stock (see Analyst Perspectives in Section 5 for the specific points on each side).
- Revenue grew at a 12.2% CAGR over the last 3 years of available financial history (see Section 3).

This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

—	September 2026	63/100	Rs 396,316 Cr

Valuation Verdict: Cheap vs peers (P/B, -29%) · **Model Read:** Trading below its sector's typical valuation on this metric.

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Financial Services	Financial Services	Nifty 200	INE238A01034

Axis Bank Ltd.

Founded 1993 (as UTI Bank; renamed Axis Bank in 2007) — India's third-largest private-sector bank by assets, offering retail banking (deposits, cards, personal and home loans), corporate and commercial banking, SME lending, and treasury operations. In 2023 Axis Bank completed the acquisition of Citibank's India consumer banking business, adding premium credit card customers and affluent-segment deposits -- an integration still being digested as of FY27..

Retail Banking
Corporate Banking
SME / Commercial Banking
Treasury & Wholesale Banking

A full company profile, shareholding pattern, segment breakdown and industry context follow in Section 2 of this report.

SECTION 2

Company, Industry & Leadership

- Company Profile
- Shareholding Pattern
- Industry Context — Market Sizing
- Industry Context — Competitive Landscape
- Leadership
- Recent News

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
33 years	Mumbai, Maharashtra, India	4	Nifty 200

OWNERSHIP

Axis Bank has no single controlling promoter -- ownership is spread across institutions, with Life Insurance Corporation of India as the largest individual shareholder at roughly 8.1%. As of March 2026, Foreign Institutional Investors hold about 42.0% and Domestic Institutions roughly 43.4% -- together well over 80% of the bank -- with public/retail shareholders holding the remaining ~6.4% (of which 1.19% is individuals holding over Rs 2 lakh in capital and 3.93% individuals holding up to Rs 2 lakh).

OPERATIONS

India's third-largest private-sector bank by assets, offering retail banking (deposits, cards, personal and home loans), corporate and commercial banking, SME lending, and treasury operations. In 2023 Axis Bank completed the acquisition of Citibank's India consumer banking business, adding premium credit card customers and affluent-segment deposits -- an integration still being digested as of FY27.

Sources: Trendlyne — Axis Bank Shareholding Pattern · Univest — Axis Bank Share Price Target 2026

Shareholding Pattern

FII (Foreign Institutions)	42.0%
DII (Domestic Institutions)	43.4%
Public / Retail	6.4%
Promoter	0% — none; LIC is largest single holder at ~8.1% but not classified as promoter

Key Named Investors		
Investor	Holding	Note
Life Insurance Corporation of India (LIC)	~8.1% (244.9 million shares)	Largest single shareholder; classified within promoter category but not a controlling promoter in the traditional sense

Sources: [Trendlyne](#) — [Axis Bank Shareholding Pattern](#)

KEY TAKEAWAY › Like ICICI Bank, Axis Bank is fully institution- and public-held with no controlling promoter group -- but its FII concentration (42%) is notably higher than most Indian private banks, which the bear case flags as a source of global risk-off sensitivity.

Industry Context

Axis Bank's Q1 FY27 results (July 2026) showed standalone net profit up 22.5% YoY to Rs 7,114 Cr, even as net interest margin fell to 3.46% -- a cycle low, reflecting continued deposit-cost pressure and the drag from the Citibank-portfolio integration. Net interest income grew a more modest 8% to Rs 14,646 Cr. Advances grew 19% YoY to Rs 12.62 lakh Cr, led by a strong 38% jump in corporate loans and 25% growth in SME, while retail loan growth was comparatively muted at 8%. Asset quality improved meaningfully: gross NPA fell to 1.28% from 1.57% a year earlier, and net NPA to 0.39% from 0.45%, with provision coverage at 70%. Capital adequacy stood at a comfortable 16.67% (CET1: 14.64%).

Sources: [Axis Bank Q1 FY27 slides — Investing.com](#) · [Axis Bank Q1 PAT rises 23% YoY — Business Standard](#)

KEY TAKEAWAY › The tension in this quarter is clear in the numbers themselves: profit grew strongly (+22.5%) largely on lower provisions and asset-quality improvement, while the core lending-margin engine (NIM) actually weakened to a cycle low -- a pattern worth watching for whether it reverses as deposit costs ease.

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. AXISBANK
HDFC Bank	Largest private-sector bank	Larger scale and typically commands a premium P/E to Axis; less exposed to the NIM compression Axis is currently seeing.
ICICI Bank	Large private-sector bank	Similar institution-held ownership structure to Axis; has generally posted steadier NIM and ROE than Axis over the past few years.
Kotak Mahindra Bank	Large private-sector bank	Smaller balance sheet but historically higher return ratios; a common comparison point on capital efficiency.

Sources: [Univest](#) — [Axis Bank Share Price Target 2026](#)

KEY TAKEAWAY ›

Axis Bank is described by analysts as "the cheapest large private bank by earnings multiple" at around 14x P/E -- the question the bull case rests on is whether that discount closes as NIM normalizes and Citi-integration synergies mature, or whether it persists given Axis's weaker recent margin trend versus HDFC Bank and ICICI Bank.

BOARD & SENIOR MANAGEMENT ROSTER

Leadership

Managing Director & Chief Executive Officer	Amitabh Chaudhry

1 ITEM, MOST RECENT FIRST

Recent News

2026-07-18

Axis Bank Q1 FY27 profit surges 22.5% to Rs 7,114 Cr as NIM hits cycle low of 3.46%

Advances up 19% YoY led by 38% corporate loan growth; asset quality improved with gross NPA down to 1.28% from 1.57%; capital adequacy at 16.67%.

Business Standard — [source](#)

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
14.3x	1.8x	12.3%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 4 years)

Metric (Rs Cr)	FY2023	FY2024	FY2025	FY2026
Total Revenue	62,416	76,603	84,668	88,067
Net Income	10,818	26,386	28,055	26,385
EBITDA	—	—	—	—
Total Debt	198,445	228,200	220,687	280,511
Stockholders Equity	129,782	157,024	187,235	215,035
Free Cash Flow	20,685	-7,940	41,938	-10,847
ROE	8.3%	16.8%	15.0%	12.3%
Year-over-year growth				
YoY Growth	FY2024	FY2025	FY2026	
Revenue Growth	+22.7%	+10.5%	+4.0%	
Net Income Growth	+143.9%	+6.3%	-6.0%	

KEY TAKEAWAY › Revenue grew at a 12.2% CAGR and Net Income at a 34.6% CAGR over the last 3 years of available data — profit growth outpaced revenue growth, suggesting improving margins.

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

- Revenue grew 41% cumulatively from FY2023 to FY2026 (Rs 62,416 Cr → Rs 88,067 Cr), a 12.2% CAGR over 3 years.
- Growth has slowed every year — from +22.7% to +4.0% — worth checking whether that's a maturing base or a genuine demand slowdown.

KEY TAKEAWAY › AXISBANK's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

- Net margin moved from 17.3% in FY2023 to 30.0% in FY2026 — expanding profitability on each rupee of revenue.
- Net Income CAGR (34.6%) has outpaced Revenue CAGR (12.2%) — classic operating leverage: fixed costs are being spread over a larger revenue base.

KEY TAKEAWAY › Net Income for AXISBANK across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for AXISBANK — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 8.3% to 12.3% over FY2023-FY2026 — a meaningful improvement in how efficiently shareholder capital is being turned into profit.
- Shareholder Equity grew 66% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 13.1% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › AXISBANK's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

KEY TAKEAWAY › EBITDA margin moved from 0.0% of revenue in FY2023 to 0.0% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2023	FY2024	FY2025	FY2026
Net Income	17.3%	34.4%	33.1%	30.0%
EBITDA	—	—	—	—
Total Debt	317.9%	297.9%	260.6%	318.5%
Stockholders Equity	207.9%	205.0%	221.1%	244.2%
Total Assets	2154.0%	1982.0%	1957.0%	2209.7%
Operating Cash Flow	35.4%	-7.3%	52.4%	-9.8%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

KEY TAKEAWAY

› Total Debt moved from 317.9% of revenue to 318.5% over this period (+0.6 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Financial Services

KEY TAKEAWAY › AXISBANK's P/E is 65% below its sector average — trading at a discount, which can mean overlooked value or a real, priced-in problem.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

Company	P/E	P/B	ROE	Mkt Cap (Cr)
AXISBANK (this stock)	14.3	1.8	12.3%	396,316
HDFCBANK	15.5	1.8	8.6%	1,097,635
ICICIBANK	18.5	2.7	14.9%	1,021,468
SBIN	10.9	1.5	14.0%	937,923
BAJFINANCE	32.3	5.8	16.7%	659,728
KOTAKBANK	20.8	2.3	10.6%	422,278
BAJAJFINSV	31.2	4.0	12.6%	315,248

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 47 largest sector peers, TATAINVEST has the highest ROE (150.0%) vs AXISBANK's 12.3% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

Peer Positioning Map

KEY TAKEAWAY › AXISBANK sits in the quadrant that is cheap with below-average returns — cheap for a reason until proven otherwise, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Not enough financial-history data available to compute this yet.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
- Whether the stock is priced richer or cheaper than same-sector peers right now - A repeatable, mechanical comparison — same rule applied to all 200 stocks	- Whether the premium is justified by superior growth, order book, or moat - The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › AXISBANK is flagged **Cheap vs peers (P/B, -29%)** because its current multiple sits -65% vs peers — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

Why This Verdict

KEY TAKEAWAY › Trading below its sector's typical valuation on this metric. — a middling Insight Score combined with a valuation that's -65% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE	THE BEAR CASE
• Citi India integration synergies are still materializing -- roughly 3 million premium credit card customers and Rs 25,000 Cr of consumer deposits were added, with more cross-sell upside ahead. • ROE is on a recovery path toward an 18% FY27-28 target from a current ~15.8%, and NIM is expected by some analysts to normalize toward 4.1-4.2% as deposit costs ease. • At roughly 14x trailing P/E, Axis is described as the cheapest large private bank by earnings multiple, leaving room for re-rating if execution improves.	• NIM at 3.46% is a cycle low, and retail loan growth (8% YoY) lagged well behind corporate loan growth (38%) this quarter -- a mix shift that can pressure margins further if it continues. • High FII concentration (42%, with some estimates as high as 47.6% including all foreign holders) makes the stock unusually sensitive to global risk-off sentiment and FII outflows. • Broader macro headwinds flagged by analysts, including the 26% US reciprocal tariff on Indian goods, add uncertainty to earnings estimate revisions in the near term.

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
63/100	Cheap vs peers	—	—

Axis Bank's Q1 FY27 is a study in contrasts: headline profit growth (+22.5%) looks strong, but it's underpinned more by lower provisions and improving asset quality than by the core lending engine, where NIM actually hit a cycle low. The Citibank integration is still a genuine, not-yet-fully-realized growth lever, but the corporate-heavy loan mix this quarter (38% growth vs 8% in retail) is worth watching -- it can flatter growth optics while adding cyclicalilty. This is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
• A sustained re-rating of the sector as a whole, independent of this company's own numbers.	• P/E re-rates further above the Financial Services sector average (41.2x) while ROE stays flat — that would mean the market is pricing in growth the numbers don't yet show. • Net Income growth reverses and turns negative for two consecutive years — the current growth trend is doing a lot of the work in this verdict.

KEY TAKEAWAY › 1 trigger on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time AXISBANK reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Metric (Rs Cr)	FY2026 (actual)	FY2027E	FY2028E	FY2029E
Revenue	88,067	98,777	110,788	124,261
Net Income	26,385	35,515	47,806	64,349

Based on a historical Revenue CAGR of +12.2% and Net Income CAGR of +34.6% over the last 3 years.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
CLEAR Total Debt rising every year	CLEAR Net margin declining every year	FLAGGED Most recent year negative	CLEAR Debt-to-Equity above 1.5x

■ Most recent year's Free Cash Flow is negative.

These are mechanical checks on the numbers above, not a professional risk assessment.

EVERY NUMBER IN THIS DECK, TRACEABLE

Appendix — Raw Financial Data

Every figure used to build the tables, charts, ratios and forecast in this deck, exactly as recorded per fiscal year, converted to Rs Crore to match every other table above. Use this to verify any calculation independently.

Metric	2023-03-31	2024-03-31	2025-03-31	2026-03-31
Total Revenue (Rs Cr)	62,416	76,603	84,668	88,067
Net Income (Rs Cr)	10,818	26,386	28,055	26,385
EBIT (Rs Cr)	—	—	—	—
EBITDA (Rs Cr)	—	—	—	—
Total Debt (Rs Cr)	198,445	228,200	220,687	280,511
Stockholders Equity (Rs Cr)	129,782	157,024	187,235	215,035
Cash & Equivalents (Rs Cr)	139,272	138,050	117,149	118,041
Total Assets (Rs Cr)	1,344,418	1,518,239	1,656,963	1,946,050
Free Cash Flow (Rs Cr)	20,685	-7,940	41,938	-10,847
Operating Cash Flow (Rs Cr)	22,075	-5,555	44,384	-8,637
Capital Expenditure (Rs Cr)	-1,389	-2,385	-2,446	-2,210
ROE	8.34%	16.80%	14.98%	12.27%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for AXISBANK — Axis Bank Ltd..

ClearStocks · An independent, personal research project
