THE ONE-PAGE READ

Executive Summary

INFY — Infosys Ltd.

Cheap vs peers (P/E, -45%)

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
93/100	Information Technology	—	Strong profitability

- Brokerage views are sharply split between bull and bear cases on this stock (see Analyst Perspectives in Section 5 for the specific points on each side).
 - Revenue grew at a 3.4% CAGR over the last 3 years of available financial history (see Section 3).
- This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

Key Statistics

CURRENT PRICE	REPORT DATE	INSIGHT SCORE	MARKET CAP
—	September 2026	93/100	Rs 457,684 Cr

Valuation Verdict: Cheap vs peers (P/E, -45%) · **Model Read:** Strong profitability (ROE) trading below its sector's typical valuation.

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Information Technology	Information Technology	Nifty 200	INE009A01021

Infosys Ltd.

Founded 1981, by N. R. Narayana Murthy and six co-founders — India's second-largest IT services company by revenue, providing consulting, technology, outsourcing and next-generation digital services (including AI/GenAI offerings) to clients globally, with BFSI (banking, financial services, insurance) as its largest industry vertical..

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
45 years	Bengaluru, Karnataka, India	6	Nifty 200

OWNERSHIP

As of June 2026, promoters (Infosys founders and their families/trusts) hold roughly 13.8% -- down slightly from the prior quarter as founders have gradually sold down over the years. Foreign Institutional Investors hold about 27.1%, Mutual Funds ~23.0%, Insurance companies ~16.2%, other Domestic Institutions ~3.8%, and non-institutional/public investors the remaining ~16.1%.

OPERATIONS

India's second-largest IT services company by revenue, providing consulting, technology, outsourcing and next-generation digital services (including AI/GenAI offerings) to clients globally, with BFSI (banking, financial services, insurance) as its largest industry vertical.

Shareholding Pattern

FII (Foreign Institutions)	27.1%
Mutual Funds	23.0%
Insurance Companies	16.2%
Other DII	3.8%
Public / Non-Institutional	16.1%
Promoter (Founders & families)	13.8%

Key Named Investors		
Investor	Holding	Note
Infosys founders and founder families/trusts	~13.8% combined	Includes N.R. Narayana Murthy, Nandan Nilekani and other co-founders; individually each holds a small single-digit percentage

Sources: [MarketsMojo](#) — [Infosys Shareholding](#) (Jun 2026)

KEY TAKEAWAY

Infosys is one of the few large Indian IT companies where the founders still collectively hold a meaningful (though minority and declining) stake, rather than the fully institution-held structure seen at ICICI Bank or L&T.

Industry Context

Infosys's Q1 FY27 results (July 2026) showed net profit up 12% YoY to Rs 7,769 Cr on revenue of Rs 48,211 Cr (+14% YoY in rupee terms; +3% YoY, +0.8% QoQ in dollar terms), with operating margin improving to 21.1% from 20.8% a year earlier. The company narrowed its FY27 constant-currency revenue growth guidance to 1.5%-3.0% -- a cautious signal on demand even as margins held up. Large deal wins totaled \$3.6 billion (61% from new business, i.e. not just renewals), and AI-related work is now 8.2% of revenue. Free cash flow was strong at Rs 9,051 Cr, a 116.4% conversion of net profit. In a significant leadership change, Ashiss Kumar Dash was named CEO Designate to succeed Salil Parekh from April 1, 2027.

Sources: [Infosys Q1 FY27 Results — Outlook Business](#) · [Infosys Q1 FY27 Guidance — Upstox](#)

KEY TAKEAWAY › The narrowed revenue guidance alongside stable margins is the key tension in this quarter's results -- profitability held up, but management is signalling that top-line growth is not accelerating the way bulls would want.

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. INFY
Tata Consultancy Services (TCS)	Largest Indian IT services company	Larger by revenue and market cap; typically commands a similar or slightly higher valuation multiple as the sector's bellwether.
HCLTech	Large-cap IT services	More engineering/products-and-platforms weighted than Infosys; a common comparison point on margin trends.
Wipro	Large-cap IT services	Historically slower revenue growth than Infosys; often used as the sector's laggard benchmark.

Sources: [Trendlyne](#) — [Infosys Research Reports](#)

KEY TAKEAWAY › Infosys sits in the top tier of Indian IT services alongside TCS -- the sector-wide debate right now is how much AI-driven productivity gains for clients will pressure the traditional billable-hours services model that all of these companies still substantially depend on.

BOARD & SENIOR MANAGEMENT ROSTER

Leadership

Non-Executive Chairman	Nandan Nilekani
CEO & Managing Director (until March 2027)	Salil Parekh
CEO Designate (effective April 1, 2027)	Ashiss Kumar Dash

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
14.7x	5.0x	33.9%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 4 years)

Metric (Rs Cr)	FY2023	FY2024	FY2025	FY2026
Total Revenue	1,821	1,856	1,928	2,016
Net Income	298	317	316	331
EBITDA	468	497	506	510
Total Debt	101	100	96	97
Stockholders Equity	917	1,056	1,120	979
Free Cash Flow	253	288	409	373
ROE	32.5%	30.0%	28.2%	33.9%
Year-over-year growth				
YoY Growth	FY2024	FY2025	FY2026	
Revenue Growth	+1.9%	+3.9%	+4.6%	
Net Income Growth	+6.2%	-0.3%	+4.9%	

KEY TAKEAWAY › Revenue grew at a 3.4% CAGR and Net Income at a 3.6% CAGR over the last 3 years of available data — profit growth outpaced revenue growth, suggesting improving margins.

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

- Revenue grew 11% cumulatively from FY2023 to FY2026 (Rs 1,821 Cr → Rs 2,016 Cr), a 3.4% CAGR over 3 years.
- Growth has accelerated every year — FY2024 at +1.9% up to FY2026 at +4.6% — a sign of building, not fading, momentum.

KEY TAKEAWAY › INFY's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

- Net margin moved from 16.4% in FY2023 to 16.4% in FY2026 — expanding profitability on each rupee of revenue.
- Net Income CAGR (3.6%) has outpaced Revenue CAGR (3.4%) — classic operating leverage: fixed costs are being spread over a larger revenue base.

KEY TAKEAWAY › Net Income for INFY across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

- EBITDA margin moved from 25.7% to 25.3% over the period — pressure on core operating efficiency, independent of one-off items.
- Total Debt has fallen 4% over the period (Rs 101 Cr → Rs 97 Cr) while EBITDA grew — the balance sheet is deleveraging in absolute terms.
- At the latest EBITDA of Rs 510 Cr against Rs 97 Cr of debt, it would take roughly 0.2 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for INFY — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 32.5% to 33.9% over FY2023-FY2026 — a meaningful improvement in how efficiently shareholder capital is being turned into profit.
- Shareholder Equity grew 7% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 31.1% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › INFY's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

KEY TAKEAWAY › EBITDA margin moved from 25.7% of revenue in FY2023 to 25.3% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2023	FY2024	FY2025	FY2026
Net Income	16.4%	17.1%	16.4%	16.4%
EBITDA	25.7%	26.8%	26.3%	25.3%
Total Debt	5.5%	5.4%	5.0%	4.8%
Stockholders Equity	50.4%	56.9%	58.1%	48.5%
Total Assets	84.1%	89.0%	90.4%	81.6%
Operating Cash Flow	15.7%	17.0%	22.6%	20.0%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

KEY TAKEAWAY › Total Debt moved from 5.5% of revenue to 4.8% over this period (-0.7 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Information Technology

KEY TAKEAWAY › INFY's P/E is 47% below its sector average — trading at a discount, which can mean overlooked value or a real, priced-in problem.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

Company	P/E	P/B	ROE	Mkt Cap (Cr)
INFY (this stock)	14.7	5.0	33.9%	457,684
TCS	16.7	7.6	45.9%	840,506
HCLTECH	20.5	4.7	22.1%	349,964
WIPRO	14.0	2.3	14.9%	174,508
TECHM	27.6	4.8	16.2%	141,469
LTM	25.8	5.5	20.9%	135,008
OFSS	31.1	15.2	33.7%	105,005

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 11 largest sector peers, TCS has the highest ROE (45.9%) vs INFY's 33.9% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

Peer Positioning Map

KEY TAKEAWAY › INFY sits in the quadrant that is cheap and high-quality — often the most interesting quadrant, worth checking why the market hasn't re-rated it, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

KEY TAKEAWAY › Debt-to-Equity of 0.10x is below the ~1x watch level — leverage looks manageable on this measure alone.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
- Whether the stock is priced richer or cheaper than same-sector peers right now - A repeatable, mechanical comparison — same rule applied to all 200 stocks	- Whether the premium is justified by superior growth, order book, or moat - The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › INFY is flagged **Cheap vs peers (P/E, -45%)** because its current multiple sits -47% vs peers — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

Why This Verdict

KEY TAKEAWAY › Strong profitability (ROE) trading below its sector's typical valuation. — a strong Insight Score combined with a valuation that's -47% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE	THE BEAR CASE
• Large deal wins (\$3.6B this quarter, 61% new business) suggest a healthy pipeline despite cautious guidance. • Operating margin improved YoY (21.1% vs 20.8%) even while growth guidance was trimmed -- cost discipline is working. • AI-related revenue (8.2% of total) and GenAI platform monetization are an emerging growth lever, not yet fully priced in per some brokerages. • Strong free cash flow conversion (116.4% of net profit) supports continued buybacks/dividends.	• FY27 constant-currency revenue guidance was narrowed to 1.5-3% -- a soft growth signal from management itself. • US tariff announcements and global macro uncertainty in 2026 were flagged as bear-case risks by brokerages. • Voluntary attrition ticked up (13% vs 12.6% prior quarter), a potential early signal of wage/talent pressure. • A CEO transition (Salil Parekh to Ashiss Kumar Dash, effective April 2027) introduces near-term leadership uncertainty.

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
93/100	Cheap vs peers	0.10x	—

Infosys's Q1 FY27 tells two slightly different stories at once: margins and deal-signing activity look healthy, but management's own guidance narrowed rather than widened -- not the pattern you'd expect if the outlook were unambiguously improving. The upcoming CEO transition adds a layer of near-term uncertainty on top of that. For a stock this size, the more informative number over the next few quarters is probably guidance revisions and large-deal TCV, not any single quarter's revenue print.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
• A sustained re-rating of the sector as a whole, independent of this company's own numbers.	• P/E re-rates further above the Information Technology sector average (28.0x) while ROE stays flat — that would mean the market is pricing in growth the numbers don't yet show. • Debt-to-Equity rises meaningfully above its current 0.10x — the balance sheet is a strength today, and that would erode it. • Net Income growth reverses and turns negative for two consecutive years — the current growth trend is doing a lot of the work in this verdict.

KEY TAKEAWAY › 1 trigger on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time INFY reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Metric (Rs Cr)	FY2026 (actual)	FY2027E	FY2028E	FY2029E
Revenue	2,016	2,085	2,157	2,231
Net Income	331	343	355	368

Based on a historical Revenue CAGR of +3.4% and Net Income CAGR of +3.6% over the last 3 years.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
CLEAR Total Debt rising every year	CLEAR Net margin declining every year	CLEAR Most recent year negative	CLEAR Debt-to-Equity above 1.5x

KEY TAKEAWAY › All 4 mechanical checks come back clear — no rising-debt, declining-margin, negative-FCF or elevated-leverage pattern detected. This is not a full risk assessment; always verify independently.

SECTION 6

Appendix & Methodology

- Risks & Limitations
- Disclaimers
- Appendix — Raw Financial Data
- Glossary & Methodology

Risks & Limitations

- This deck is generated automatically from a statistical model and public data — it has not been reviewed by a financial analyst.
- Historical patterns the model relies on may not repeat in the future.
- Data may be delayed or contain provider errors; always verify key figures independently.
- The 3-year forecast above is a mechanical extrapolation of past growth, not a professional projection — it does not account for competition, macro conditions, or company-specific plans.
- This is not a substitute for professional financial advice.

Disclaimers

1. General: This document is produced by an independent, personal research project (ClearStocks) for educational purposes only.
2. Not Investment Advice: Nothing in this deck is financial, investment, legal or tax advice.
3. No Recommendation: The Insight Score and valuation verdict are model outputs, not a recommendation to buy, hold or sell.
4. Data Accuracy: Figures are sourced from public data providers and may contain errors, delays or omissions.
5. No Guarantee: Historical performance and model scores do not guarantee future results.
6. Liability: The creator of this deck accepts no liability for losses arising from its use.

EVERY NUMBER IN THIS DECK, TRACEABLE

Appendix — Raw Financial Data

Every figure used to build the tables, charts, ratios and forecast in this deck, exactly as recorded per fiscal year, converted to Rs Crore to match every other table above. Use this to verify any calculation independently.

Metric	2023-03-31	2024-03-31	2025-03-31	2026-03-31
Total Revenue (Rs Cr)	1,821	1,856	1,928	2,016
Net Income (Rs Cr)	298	317	316	331
EBIT (Rs Cr)	416	440	450	455
EBITDA (Rs Cr)	468	497	506	510
Total Debt (Rs Cr)	101	100	96	97
Stockholders Equity (Rs Cr)	917	1,056	1,120	979
Cash & Equivalents (Rs Cr)	148	177	286	234
Total Assets (Rs Cr)	1,531	1,652	1,742	1,645
Free Cash Flow (Rs Cr)	253	288	409	373
Operating Cash Flow (Rs Cr)	285	315	435	404
Capital Expenditure (Rs Cr)	-32	-27	-26	-31
ROE	32.50%	29.99%	28.18%	33.85%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for INFY — Infosys Ltd..

ClearStocks · An independent, personal research project

Refreshed monthly · Educational research only, not investment advice
