THE ONE-PAGE READ

Executive Summary

SBIN — State Bank of India

Valuation pending, updates once live price sync runs

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
—/100	Financial Services	—	FUNDAMENTALS REVIEWED

- 55.03% promoter (Government of India) ownership limits free float and ties the stock to public-sector capex and policy cycles.
- Brokerage views are sharply split between bull and bear cases on this stock (see Analyst Perspectives in Section 5 for the specific points on each side).
- Revenue grew at a 12.2% CAGR over the last 3 years of available financial history (see Section 3).

This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Financial Services	Financial Services	Nifty 200	INE062A01020

State Bank of India

Founded 1955 (as State Bank of India, tracing back to the Bank of Calcutta, 1806) — India's largest bank by assets and branch network, spanning retail banking (deposits, home and personal loans), corporate and commercial banking, international banking, treasury/global markets, and a large subsidiary ecosystem (SBI Life Insurance, SBI Cards, SBI Mutual Fund, SBI General Insurance) each separately listed or valued. Its YONO digital platform is central to its retail deposit and cross-sell strategy..

- Recent News

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
71 years	Mumbai, Maharashtra, India	4	Nifty 200

OWNERSHIP

The Government of India (President of India) holds a controlling ~55.03% stake, making SBI a public-sector bank. Domestic institutions hold roughly 25.9% (Life Insurance Corporation of India alone holds ~8.70%, the largest non-government shareholder), foreign institutions hold roughly 12.5%, and public/retail shareholders hold the remaining ~5.9%.

OPERATIONS

India's largest bank by assets and branch network, spanning retail banking (deposits, home and personal loans), corporate and commercial banking, international banking, treasury/global markets, and a large subsidiary ecosystem (SBI Life Insurance, SBI Cards, SBI Mutual Fund, SBI General Insurance) each separately listed or valued. Its YONO digital platform is central to its retail deposit and cross-sell strategy.

Sources: Trendlyne — SBI Shareholding Pattern · SBI Board of Directors profile (26.06.2026)

Shareholding Pattern

Promoter (Government of India)	55.03%
DII (Domestic Institutions)	25.9%
FII (Foreign Institutions)	12.5%
Public / Retail	5.9%

Key Named Investors

Investor	Holding	Note
Life Insurance Corporation of India (LIC)	~8.70%	Largest non-government shareholder
SBI Mutual Fund	~3.37%	Aggregated across actively-managed schemes
HDFC Mutual Fund	~1.73%	Aggregated across actively-managed schemes
Nippon India Mutual Fund	~1.22%	Aggregated across actively-managed schemes

Sources: [Shareholding Pattern of SBI as on 31st March 2026](#) — HelloBanker

KEY TAKEAWAY › At just over 55%, government ownership gives the state clear control while still leaving a large enough float for institutional and retail investors to matter -- worth watching if the government ever pursues further stake sales, which it has periodically discussed for PSU banks.

Industry Context

SBI's Q1 FY27 results (reported August 2026) showed the strongest asset-quality print the bank has posted in over two decades: gross NPA ratio fell to 1.47% (down 36 basis points year-on-year) and net NPA to 0.38%, with net profit up roughly 10% YoY. Net interest income grew 12% and the provision coverage ratio stood at 74.2%. The market read this as confirmation that the decade-long post-2015 PSU bank asset-quality cleanup cycle has genuinely completed for India's largest lender, not just a one-quarter improvement.

Sources: [SBI Q1 FY27: lowest NPA ratio in 2+ decades](#) — Upstox

KEY TAKEAWAY › SBI shares rose roughly 3.6% on the day of this result and were up about 13% year-to-date around that point -- a case where a bank's numbers, not narrative, moved the stock.

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. SBIN
HDFC Bank	Largest private-sector bank	Commands a premium valuation multiple to SBI on the market's view that private banks convert scale into profit more efficiently than PSU banks, despite SBI's much larger balance sheet.
ICICI Bank	Large private-sector bank	Also trades at a meaningfully higher P/E than SBI -- the standard PSU-vs-private valuation gap in Indian banking, which SBI's improving asset quality is gradually narrowing.
Bank of Baroda	PSU bank peer	A closer like-for-like comparison as a fellow public-sector bank; useful for isolating whether SBI's re-rating is bank-specific or a broader PSU banking theme.

Sources: [Trendlyne](#) — [SBI Shareholding Pattern](#)

KEY TAKEAWAY › SBI trades at a persistent discount to private-sector banks of similar or smaller size -- the central question for this stock is whether the asset-quality improvement seen in FY27 is enough to close that gap over time.

BOARD & SENIOR MANAGEMENT ROSTER

Leadership

Chairman	Challa Sreenivasulu Setty
Managing Director (Corporate Banking & Subsidiaries)	Ashwini Kumar Tewari
Managing Director (International Banking, Global Markets & Technology)	Rana Ashutosh Kumar Singh
Managing Director (Retail Business & Operations)	Rama Mohan Rao Amara
Managing Director (Risk, Compliance & SARG)	Ravi Ranjan

We show only board/leadership roles that are officially disclosed; we do not have shareholding cap-table detail beyond what's publicly filed.

Sources: [SBI Board of Directors profile \(26.06.2026\)](#)

1 ITEM, MOST RECENT FIRST

Recent News

August 2026

SBI posts lowest NPA ratio in over two decades in Q1 FY27

Gross NPA fell to 1.47% (-36bps YoY), net NPA to 0.38% (-9bps YoY), net profit up ~10% YoY to Rs 21,121 Cr, NII up 12% to Rs 46,992 Cr, provision coverage ratio 74.2%. Shares rose ~3.6% intraday on the print.

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
—X	—X	14.0%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 4 years)

Metric (Rs Cr)	FY2023	FY2024	FY2025	FY2026
Total Revenue	270,337	323,614	349,523	381,709
Net Income	55,648	67,085	77,561	83,299
EBITDA	—	—	—	—
Total Debt	522,093	556,503	618,125	726,892
Stockholders Equity	358,931	414,939	487,037	596,131
Free Cash Flow	-90,057	17,457	39,847	29,734
ROE	15.5%	16.2%	15.9%	14.0%
Year-over-year growth				
YoY Growth	FY2024	FY2025	FY2026	
Revenue Growth	+19.7%	+8.0%	+9.2%	
Net Income Growth	+20.6%	+15.6%	+7.4%	

KEY TAKEAWAY › Revenue grew at a 12.2% CAGR and Net Income at a 14.4% CAGR over the last 3 years of available data — profit growth outpaced revenue growth, suggesting improving margins.

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

■ Revenue grew 41% cumulatively from FY2023 to FY2026 (Rs 270,337 Cr → Rs 381,709 Cr), a 12.2% CAGR over 3 years.

■ Growth has been uneven year to year (from +8.0% to +19.7%), rather than a smooth trend — consistent with lumpy, order-book-driven revenue recognition typical of capital-intensive project businesses.

KEY TAKEAWAY › SBIN's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

- Net margin moved from 20.6% in FY2023 to 21.8% in FY2026 — expanding profitability on each rupee of revenue.
- Net Income CAGR (14.4%) has outpaced Revenue CAGR (12.2%) — classic operating leverage: fixed costs are being spread over a larger revenue base.

KEY TAKEAWAY › Net Income for SBIN across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for SBIN — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 15.5% to 14.0% over FY2023-FY2026 — a decline in capital efficiency worth investigating alongside the margin trend.
- Shareholder Equity grew 66% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 15.4% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › SBIN's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

KEY TAKEAWAY › EBITDA margin moved from 0.0% of revenue in FY2023 to 0.0% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2023	FY2024	FY2025	FY2026
Net Income	20.6%	20.7%	22.2%	21.8%
EBITDA	—	—	—	—
Total Debt	193.1%	172.0%	176.8%	190.4%
Stockholders Equity	132.8%	128.2%	139.3%	156.2%
Total Assets	2202.6%	2080.8%	2092.6%	2180.1%
Operating Cash Flow	-31.8%	6.7%	13.0%	10.0%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

KEY TAKEAWAY › Total Debt moved from 193.1% of revenue to 190.4% over this period (-2.7 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Financial Services

P/E, P/B not shown — SBIN's own live figure hasn't synced yet, so there is nothing real to compare against the sector average.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

Company	P/E	P/B	ROE	Mkt Cap (Cr)
SBIN (this stock)	—	—	14.0%	—
HDFCBANK	13.7	1.8	13.6%	1,080,226
360ONE	—	—	12.4%	—
AUBANK	—	—	13.2%	—
ABCAPITAL	—	—	10.9%	—
AXISBANK	—	—	12.3%	—
BSE	—	—	37.4%	—

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 47 largest sector peers, TATAINVEST has the highest ROE (150.0%) vs SBIN's 14.0% — worth understanding why before treating either figure in isolation.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Not enough financial-history data available to compute this yet.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
• Whether the stock is priced richer or cheaper than same-sector peers right now • A repeatable, mechanical comparison — same rule applied to all 200 stocks	• Whether the premium is justified by superior growth, order book, or moat • The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › SBIN is flagged **Valuation pending, updates once live price sync runs** — the premium/discount vs. its sector peer median above isn't computable yet because this stock's own live P/E hasn't synced; it will fill in once the price refresh runs.

INSIGHT SCORE METHODOLOGY

Why This Verdict

KEY TAKEAWAY › FUNDAMENTALS REVIEWED (steady double-digit ROE and profit growth; not yet scored on valuation) — a weak Insight Score combined with a valuation that's — is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE	THE BEAR CASE
• SBI is the only large PSU bank consistently delivering ROE above 17%, and gross NPAs below 2% after a decade-long cleanup enable genuinely clean earnings growth from here. • The YONO digital platform (~80 million users) gives SBI a low-cost deposit-gathering advantage that smaller PSU peers can't easily replicate, and the infrastructure credit cycle (roads, railways, renewables, ports) directly benefits its corporate book.	• As a government-controlled bank, SBI can be directed toward policy lending on non-commercial terms, which is a structural overhang private banks don't carry. • Given SBI's sheer balance-sheet size, a small number of large corporate account defaults can have an outsized impact on reported asset quality, and net interest margins are exposed if the RBI cuts rates faster than currently expected in FY27.

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
—/100	Valuation pending, updates once live price sync runs	—	—

SBI's FY27 story so far is a genuine asset-quality inflection, not just a good quarter -- a gross NPA ratio below 1.5% for India's largest bank, with double-digit profit and NII growth alongside it, is a meaningfully different starting point than the SBI of a decade ago. The open question this deck can't resolve is whether that improvement is durable enough for the market to finally close SBI's persistent valuation discount to private banks like HDFC Bank and ICICI Bank, or whether its government ownership (directed lending risk, policy influence) keeps that discount structurally in place regardless of the numbers. This is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
A sustained re-rating of the sector as a whole, independent of this company's own numbers.	Net Income growth reverses and turns negative for two consecutive years — the current growth trend is doing a lot of the work in this verdict.

KEY TAKEAWAY › 1 trigger on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time SBIN reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Metric (Rs Cr)	FY2026 (actual)	FY2027E	FY2028E	FY2029E
Revenue	381,709	428,228	480,416	538,964
Net Income	83,299	95,287	109,001	124,688

Based on a historical Revenue CAGR of +12.2% and Net Income CAGR of +14.4% over the last 3 years.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
FLAGGED Total Debt rising every year	CLEAR Net margin declining every year	CLEAR Most recent year negative	CLEAR Debt-to-Equity above 1.5x

■ Total Debt has risen every year for the last 4 years of available data.

These are mechanical checks on the numbers above, not a professional risk assessment.

SECTION 6

Appendix & Methodology

Free Cash Flow (Rs Cr)	-90,057	17,457	39,847	29,734
Operating Cash Flow (Rs Cr)	-86,014	21,632	45,484	38,097
Capital Expenditure (Rs Cr)	-4,044	-4,175	-5,637	-8,363
ROE	15.50%	16.17%	15.93%	13.97%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for SBIN — State Bank of India.
