THE ONE-PAGE READ

Executive Summary

ICICIBANK — ICICI Bank Ltd.

Fairly valued vs peers (P/B, +7%)

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
54/100	Financial Services	—	Valuation is in line with its sector peers on this metric.

- Brokerage views are sharply split between bull and bear cases on this stock (see Analyst Perspectives in Section 5 for the specific points on each side).
 - Revenue grew at a 18.1% CAGR over the last 3 years of available financial history (see Section 3).
- This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

Key Statistics

CURRENT PRICE	REPORT DATE	INSIGHT SCORE	MARKET CAP
—	September 2026	54/100	Rs 1,021,468 Cr

Valuation Verdict: Fairly valued vs peers (P/B, +7%) · **Model Read:** Valuation is in line with its sector peers on this metric.

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Financial Services	Financial Services	Nifty 200	INE090A01021

ICICI Bank Ltd.

Founded 1994 (as a subsidiary of ICICI Ltd; ICICI Ltd itself founded 1955) — India's second-largest private-sector bank by assets, spanning retail banking (deposits, home and personal loans, cards), corporate and commercial banking, and a large subsidiary ecosystem including ICICI Prudential Life Insurance, ICICI Lombard General Insurance, and ICICI Securities, each separately listed. Known for early, aggressive investment in digital banking infrastructure..

Retail Banking
Corporate & Commercial Banking

Life & General Insurance (subsidiaries)

A full company profile, shareholding pattern, segment breakdown and industry context follow in Section 2 of this report.

SECTION 2

Company, Industry & Leadership

- Company Profile
- Shareholding Pattern
- Industry Context — Market Sizing
- Industry Context — Competitive Landscape
- Leadership
- Recent News

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
32 years	Mumbai, Maharashtra, India	4	Nifty 200

OWNERSHIP

ICICI Bank has no promoter shareholder -- it is a professionally-run, widely-held private bank. Foreign Institutional Investors hold roughly 45.7% and Domestic Institutional Investors roughly 45.2% (mutual funds alone account for ~29.5% of the total), with public/retail shareholders holding the remaining ~9.1%. Life Insurance Corporation of India is the largest single named domestic holder at ~7.14%.

OPERATIONS

India's second-largest private-sector bank by assets, spanning retail banking (deposits, home and personal loans, cards), corporate and commercial banking, and a large subsidiary ecosystem including ICICI Prudential Life Insurance, ICICI Lombard General Insurance, and ICICI Securities, each separately listed. Known for early, aggressive investment in digital banking infrastructure.

Sources: Trendlyne — ICICI Bank Shareholding Pattern · ICICI Bank Board of Directors — Sandeep Bakhshi

Shareholding Pattern

FII (Foreign Institutions)	45.7%
DII (Domestic Institutions)	45.2%
Public / Retail	9.1%
Promoter	0% — none; professionally-managed

Key Named Investors		
Investor	Holding	Note
Life Insurance Corporation of India (LIC)	~7.14%	Largest named domestic holder
SBI Mutual Fund	~6.53%	Aggregated across actively-managed schemes
ICICI Prudential Mutual Fund	~4.47%	Aggregated across actively-managed schemes
Government of Singapore	~2.51%	Sovereign wealth investor

Sources: [Trendlyne](#) — [ICICI Bank Shareholding Pattern](#)

KEY TAKEAWAY › Like ITC, ICICI Bank has no promoter shareholder -- there is no controlling family or government stake, so ownership influence is spread across a large, diversified base of foreign and domestic institutions instead.

Industry Context

ICICI Bank's Q1 FY27 results (July 2026) showed standalone net profit up 15.9% YoY to Rs 14,804.5 Cr, alongside continued asset-quality improvement: gross NPA ratio fell to 1.38% (from 1.67% a year earlier) and net NPA to 0.35% (from 0.41%). Advances grew to Rs 16.31 lakh Cr from Rs 13.64 lakh Cr and deposits to Rs 18.34 lakh Cr from Rs 16.09 lakh Cr year-on-year -- double-digit growth on both sides of the balance sheet alongside improving, not deteriorating, credit quality.

Sources: [ICICI Bank Q1 FY27 Results](#) — [Angel One](#)

KEY TAKEAWAY › ICICI Bank's gross NPA ratio (1.38-1.96% depending on the reporting basis cited) is among the lowest of any large Indian bank, private or public -- asset quality is not the debate for this stock the way it still partly is for PSU banks.

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. ICICIBANK
HDFC Bank	Largest private-sector bank	Larger by assets and typically commands a similar or slightly higher valuation multiple; the two are the standard large-private-bank comparison set in Indian markets.
Axis Bank	Large private-sector bank	Closer in scale to ICICI Bank; useful for isolating whether ICICI's premium reflects bank-specific execution or a broader large-private-bank re-rating.
State Bank of India	Largest PSU bank	Far larger balance sheet but trades at a persistent discount to ICICI Bank -- the standard PSU-vs-private valuation gap in Indian banking.

Sources: [Trendlyne](#) — [ICICI Bank Shareholding Pattern](#)

KEY TAKEAWAY › ICICI Bank sits at the top of India's private banking valuation tier alongside HDFC Bank -- the relevant question for this stock is less 'is it a good bank' and more 'is that quality already fully priced in'.

BOARD & SENIOR MANAGEMENT ROSTER

Leadership

Managing Director & Chief Executive Officer	Sandeep Bakhshi

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
18.5x	2.7x	14.9%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 4 years)

Metric (Rs Cr)	FY2023	FY2024	FY2025	FY2026
Total Revenue	135,581	161,210	204,715	223,407
Net Income	34,037	44,256	51,029	54,208
EBITDA	—	—	—	—
Total Debt	183,509	200,999	203,650	207,617
Stockholders Equity	214,498	256,144	313,906	363,060
Free Cash Flow	-6,239	153,606	118,035	63,595
ROE	15.9%	17.3%	16.3%	14.9%
Year-over-year growth				
YoY Growth	FY2024	FY2025	FY2026	
Revenue Growth	+18.9%	+27.0%	+9.1%	
Net Income Growth	+30.0%	+15.3%	+6.2%	

KEY TAKEAWAY › Revenue grew at a 18.1% CAGR and Net Income at a 16.8% CAGR over the last 3 years of available data — revenue outpaced profit growth, suggesting margin pressure.

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

■ Revenue grew 65% cumulatively from FY2023 to FY2026 (Rs 135,581 Cr → Rs 223,407 Cr), a 18.1% CAGR over 3 years.

■ Growth has been uneven year to year (from +9.1% to +27.0%), rather than a smooth trend — consistent with lumpy, order-book-driven revenue recognition typical of capital-intensive project businesses.

KEY TAKEAWAY › ICICIBANK's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

- Net margin moved from 25.1% in FY2023 to 24.3% in FY2026 — compressing profitability on each rupee of revenue.
- Net Income CAGR (16.8%) has lagged Revenue CAGR (18.1%) — revenue growth is not yet converting proportionally into bottom-line growth.

KEY TAKEAWAY › Net Income for ICICIBANK across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for ICICIBANK — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 15.9% to 14.9% over FY2023-FY2026 — a decline in capital efficiency worth investigating alongside the margin trend.
- Shareholder Equity grew 69% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 16.1% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › ICICIBANK's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

KEY TAKEAWAY › EBITDA margin moved from 0.0% of revenue in FY2023 to 0.0% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2023	FY2024	FY2025	FY2026
Net Income	25.1%	27.5%	24.9%	24.3%
EBITDA	—	—	—	—
Total Debt	135.4%	124.7%	99.5%	92.9%
Stockholders Equity	158.2%	158.9%	153.3%	162.5%
Total Assets	1444.5%	1466.4%	1290.7%	1304.6%
Operating Cash Flow	-2.8%	97.6%	60.0%	30.1%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

KEY TAKEAWAY › Total Debt moved from 135.4% of revenue to 92.9% over this period (-42.4 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Financial Services

KEY TAKEAWAY › ICICIBANK's P/E is 55% below its sector average — trading at a discount, which can mean overlooked value or a real, priced-in problem.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

Company	P/E	P/B	ROE	Mkt Cap (Cr)
ICICIBANK (this stock)	18.5	2.7	14.9%	1,021,468
HDFCBANK	15.5	1.8	8.6%	1,097,635
SBIN	10.9	1.5	14.0%	937,923
BAJFINANCE	32.3	5.8	16.7%	659,728
KOTAKBANK	20.8	2.3	10.6%	422,278
AXISBANK	14.3	1.8	12.3%	396,316
BAJAJFINSV	31.2	4.0	12.6%	315,248

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 47 largest sector peers, TATAINVEST has the highest ROE (150.0%) vs ICICIBANK's 14.9% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

Peer Positioning Map

KEY TAKEAWAY › ICICIBANK sits in the quadrant that is cheap with below-average returns — cheap for a reason until proven otherwise, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Not enough financial-history data available to compute this yet.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
- Whether the stock is priced richer or cheaper than same-sector peers right now - A repeatable, mechanical comparison — same rule applied to all 200 stocks	- Whether the premium is justified by superior growth, order book, or moat - The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › ICICIBANK is flagged **Fairly valued vs peers (P/B, +7%)** because its current multiple sits -55% vs peers — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

Why This Verdict

KEY TAKEAWAY › Valuation is in line with its sector peers on this metric. — a middling Insight Score combined with a valuation that's -55% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE	THE BEAR CASE
• ROA above 2% and best-in-class loan growth among large private banks, with gross NPA around 1.4-2.0% (depending on reporting basis) -- among the lowest of any large Indian bank -- support a premium valuation. • Net profit grew 14-16% year-on-year with double-digit advances and deposit growth simultaneously, a combination that's hard for smaller or PSU peers to match at this scale.	• Credit costs in the unsecured retail segment (personal loans, credit cards) could normalize upward from currently low levels, denting margins if underwriting standards loosen during the growth phase. • As a large, foreign-institution-heavy stock (~46% FII ownership), ICICI Bank is more exposed than domestically-owned peers to FII outflows during global risk-off periods, independent of its own execution.

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
54/100	Fairly valued vs peers	—	—

ICICI Bank's FY27 numbers look almost boringly good for a large bank: double-digit profit, loan and deposit growth all landing together, with asset quality improving rather than just holding steady. That combination is exactly why the stock carries a premium valuation versus SBI and other PSU peers -- the market isn't pricing a turnaround story here, it's pricing continuity of an already-strong run. The real question this deck can't answer is how much of that quality is already reflected in the price versus HDFC Bank, its closest comparable, and how the unsecured retail book performs if credit costs normalize from today's low levels. This is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
• A sustained re-rating of the sector as a whole, independent of this company's own numbers.	• P/E re-rates further above the Financial Services sector average (41.1x) while ROE stays flat — that would mean the market is pricing in growth the numbers don't yet show. • Net Income growth reverses and turns negative for two consecutive years — the current growth trend is doing a lot of the work in this verdict.

KEY TAKEAWAY › 1 trigger on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time ICICIBANK reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Metric (Rs Cr)	FY2026 (actual)	FY2027E	FY2028E	FY2029E
Revenue	223,407	263,874	311,670	368,124
Net Income	54,208	63,304	73,927	86,333

Based on a historical Revenue CAGR of +18.1% and Net Income CAGR of +16.8% over the last 3 years.

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
FLAGGED Total Debt rising every year	CLEAR Net margin declining every year	CLEAR Most recent year negative	CLEAR Debt-to-Equity above 1.5x

■ Total Debt has risen every year for the last 4 years of available data.

These are mechanical checks on the numbers above, not a professional risk assessment.

SECTION 6

Capital Expenditure (Rs Cr)	-2,468	-3,679	-4,770	-3,730
ROE	15.87%	17.28%	16.26%	14.93%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for ICICIBANK — ICICI Bank Ltd..

ClearStocks · An independent, personal research project

Refreshed monthly · Educational research only, not investment advice
