THE ONE-PAGE READ

Executive Summary

ITC — ITC Ltd.

Cheap vs peers (P/E, -63%)

INSIGHT SCORE	SECTOR	CURRENT PRICE	COMBINED READ
85/100	Fast Moving Consumer Goods	—	Strong profitability

- Brokerage views are sharply split between bull and bear cases on this stock (see Analyst Perspectives in Section 5 for the specific points on each side).
 - Revenue grew at a 3.6% CAGR over the last 3 years of available financial history (see Section 3).
- This is a data snapshot for research purposes only — it is not investment advice, and it is not a recommendation to buy, hold or sell this stock. See the Disclaimers section at the end of this deck.

Key Statistics

CURRENT PRICE	REPORT DATE	INSIGHT SCORE	MARKET CAP
—	September 2026	85/100	Rs 330,912 Cr

Valuation Verdict: Cheap vs peers (P/E, -63%) · **Model Read:** Strong profitability (ROE) trading below its sector's typical valuation.

Company Overview

SECTOR	INDUSTRY	INDEX	ISIN
Fast Moving Consumer Goods	Fast Moving Consumer Goods	Nifty 200	INE154A01025

ITC Ltd.

Founded 1910 — A diversified conglomerate built around five core business segments: Cigarettes (the highest-margin and historically dominant profit driver), FMCG-Others (packaged foods under Aashirvaad, Sunfeast, Bingo, Yippee and Classmate; personal care under Savlon, Vivel and Fiama), Paperboards, Paper & Packaging, and Agri Business (leaf tobacco, wheat, spices, coffee exports). The former Hotels segment was demerged into a separate listed entity, ITC Hotels Limited, effective January 2025..

Cigarettes
FMCG — Others (Foods, Personal Care)
Paperboards, Paper & Packaging
Agri Business

A full company profile, shareholding pattern, segment breakdown and industry context follow in Section 2 of this report.

SECTION 2

Company, Industry & Leadership

- Company Profile
- Shareholding Pattern
- Industry Context — Market Sizing
- Industry Context — Competitive Landscape
- Leadership
- Recent News

Company Profile

COMPANY AGE	HEADQUARTERS	BUSINESS SEGMENTS	INDEX MEMBERSHIP
116 years	Kolkata, West Bengal, India	4	Nifty 200

OWNERSHIP

ITC has no promoter shareholder -- it is a professionally-run, widely-held company. Domestic Institutional Investors hold roughly 49.2% (Life Insurance Corporation of India alone holds ~15.83%, the single largest shareholder), Foreign Institutional Investors hold roughly 34.8%, and public/retail shareholders hold the remaining ~16%. A notable legacy stake is held via Tobacco Manufacturers (India) Limited (~17.79%), an entity historically linked to British American Tobacco, which itself sits inside the FII/FDI figures above.

OPERATIONS

A diversified conglomerate built around five core business segments: Cigarettes (the highest-margin and historically dominant profit driver), FMCG-Others (packaged foods under Aashirvaad, Sunfeast, Bingo, Yippee and Classmate; personal care under Savlon, Vivel and Fiamma), Paperboards, Paper & Packaging, and Agri Business (leaf tobacco, wheat, spices, coffee exports). The former Hotels segment was demerged into a separate listed entity, ITC Hotels Limited, effective January 2025.

Sources: [ITC Ltd. shareholding](#) — Trendlyne · [ITC Ltd. Leadership](#) — itcportal.com

Shareholding Pattern

DII (Domestic Institutions)	49.2%
FII (Foreign Institutions)	34.8%
Public / Retail	16.0%
Promoter	0% — none; professionally-managed

Key Named Investors		
Investor	Holding	Note
Life Insurance Corporation of India (LIC)	~15.83%	Single largest named shareholder, domestic
Tobacco Manufacturers (India) Limited	~17.79%	Legacy entity historically linked to British American Tobacco (BAT)
ICICI Prudential Mutual Fund	~3.58%	Aggregated across actively-managed schemes
SBI Mutual Fund	~3.29%	Aggregated across actively-managed schemes

Sources: [Trendlyne](#) — ITC Shareholding Pattern (Mar 2026)

KEY TAKEAWAY › ITC has no promoter shareholder at all -- unusual for a Nifty 200 company -- which means there is no single controlling block whose intentions (buying more, pledging shares, succession) investors need to track the way they would for a family-controlled or PSU stock.

Industry Context

The single biggest event shaping ITC's investment case in 2026 is a steep change in cigarette taxation: GST on cigarettes rose from 28% to 40% of retail sale price, with excise duties also increased, effective February 1, 2026 -- together an estimated 60-65% surge in the total tax burden on ITC's cigarette business. To pass this through, ITC has had to raise MRPs by roughly 35% in a calibrated, phased manner, balancing revenue recovery against the risk of pushing price-sensitive consumers toward illicit, untaxed cigarettes -- a chronic risk in this industry whenever legal cigarettes get meaningfully more expensive than the untaxed market.

Sources: [ITC slips 9% in 3 days; plunges 32% so far in 2026](#) — [Business Standard](#)

KEY TAKEAWAY › This tax shock is the direct reason ITC's stock is down roughly 32% in 2026 -- it is not a company-specific execution problem, it is a sector-wide regulatory cost increase that hits ITC hardest because cigarettes remain its single most profitable segment.

COMPETITIVE LANDSCAPE

Industry Context

Player	Category	Position vs. ITC
Hindustan Unilever	FMCG — Home & Personal Care leader	Far larger and more profitable in FMCG specifically, but has no cigarette business — not directly comparable on overall margin structure, only on the FMCG-Others segment.
Nestle India	FMCG — Packaged Foods	Commands a premium P/E to ITC on the strength of pure-play packaged-foods growth and brand pricing power; ITC's Foods business is smaller and lower-margin by comparison.
Godrej Consumer Products	FMCG — Personal & Home Care	Closer in scale to ITC's non-cigarette FMCG business alone; useful as a like-for-like read on how the market values ITC's FMCG-Others segment if it were standalone.

Sources: [Trendlyne](#) — ITC Shareholding Pattern

KEY TAKEAWAY › ITC doesn't have a true like-for-like peer -- it's simultaneously a tobacco company, a packaged-foods company, and a paperboard/packaging company under one ticker. The comparison above is useful context, not an apples-to-apples ranking.

Sources: [ITC Ltd. Leadership](#) — [itcportal.com](#)

2 ITEMS, MOST RECENT FIRST

Recent News

 2026

GST and excise hike on cigarettes takes effect, ITC stock falls ~32% in 2026

GST on cigarettes rose from 28% to 40% of retail sale price with higher excise, effective Feb 1, 2026 -- roughly a 60-65% increase in total cigarette tax burden. ITC has raised MRPs by ~35% in phases; Motilal Oswal models a 15% cigarette revenue decline and 19% EBIT decline in FY27 and rates the stock Neutral with a Rs 300 target.

Business Standard — [source](#)

 January 2025

ITC Hotels demerger completed

Effective January 6, 2025, ITC demerged its Hotels business into a separately listed entity, ITC Hotels Ltd, giving shareholders 1 ITC Hotels share for every 10 ITC shares held while ITC retained a 40% stake. Hotels contributed only ~3% of ITC's FY24 revenue but was capital-intensive and lower-return; the split lets the market value ITC's core cigarettes/FMCG business without that drag.

Kotak Neo — [source](#)

SECTION 3

Financial Analysis

- Financial Snapshot
- Financial History & Growth Trends
- Financial Trend Charts
- Common-Size Statement

SECTION 3 OPENS WITH THE 3 NUMBERS THAT MATTER MOST

Financial Snapshot

P/E RATIO	P/B RATIO	RETURN ON EQUITY
16.6x	4.6x	28.5%

P/E Ratio	Roughly how many years of current profit it would take to earn back today's share price. Lower can mean cheaper — but only means something read against the sector average (Section 4), not alone.
P/B Ratio	Compares the share price to the company's accounting net worth per share. A P/B well above 1x means the market values the business far above its stated book assets.
Return on Equity (ROE)	How efficiently the company turns shareholder capital into profit. Consistently higher ROE than peers, at similar leverage, generally signals a stronger underlying business.

Full historical trend, growth-rate analysis, and chart-by-chart commentary follow over the next several pages of this section.

Financial History (last 4 years)

Metric (Rs Cr)	FY2023	FY2024	FY2025	FY2026
Total Revenue	70,245	67,391	74,653	78,213
Net Income	19,192	20,459	34,747	20,689
EBITDA	27,767	28,256	28,923	29,829
Total Debt	306	304	285	2,399
Stockholders Equity	69,155	74,507	70,030	72,507
Free Cash Flow	16,135	13,616	15,348	16,281
ROE	27.8%	27.5%	49.6%	28.5%
Year-over-year growth				
YoY Growth	FY2024	FY2025	FY2026	
Revenue Growth	-4.1%	+10.8%	+4.8%	
Net Income Growth	+6.6%	+69.8%	-40.5%	

KEY TAKEAWAY › Revenue grew at a 3.6% CAGR and Net Income at a 2.5% CAGR over the last 3 years of available data — revenue outpaced profit growth, suggesting margin pressure.

FINANCIAL TREND ANALYSIS 1 OF 4

Revenue Trend

- Revenue grew 11% cumulatively from FY2023 to FY2026 (Rs 70,245 Cr → Rs 78,213 Cr), a 3.6% CAGR over 3 years.
- Growth has been uneven year to year (from -4.1% to +10.8%), rather than a smooth trend — consistent with lumpy, order-book-driven revenue recognition typical of capital-intensive project businesses.

KEY TAKEAWAY › ITC's revenue trend over FY2023-FY2026 shown above — see the bullets for what's actually driving the shape of this line, not just its direction.

FINANCIAL TREND ANALYSIS 2 OF 4

Profitability Trend

- Net margin moved from 27.3% in FY2023 to 26.5% in FY2026 — compressing profitability on each rupee of revenue.
- Net Income CAGR (2.5%) has lagged Revenue CAGR (3.6%) — revenue growth is not yet converting proportionally into bottom-line growth.

KEY TAKEAWAY › Net Income for ITC across FY2023-FY2026 — read alongside the Revenue Trend page to see whether profit is growing with, faster, or slower than revenue.

FINANCIAL TREND ANALYSIS 3 OF 4

Operating Profit vs. Leverage

- EBITDA margin moved from 39.5% to 38.1% over the period — pressure on core operating efficiency, independent of one-off items.
- Total Debt has risen 683% over the period (Rs 306 Cr → Rs 2,399 Cr) while EBITDA grew — debt is being taken on faster than the operating profit base that would service it.
- At the latest EBITDA of Rs 29,829 Cr against Rs 2,399 Cr of debt, it would take roughly 0.1 years of current EBITDA to clear all debt — the Debt-to-EBITDA figure on the Leverage page.

KEY TAKEAWAY › EBITDA (operating profit) plotted against Total Debt for ITC — the gap or convergence between these two lines is the core leverage story for this company.

FINANCIAL TREND ANALYSIS 4 OF 4

Return on Equity Trend

- ROE moved from 27.8% to 28.5% over FY2023-FY2026 — a meaningful improvement in how efficiently shareholder capital is being turned into profit.
- Shareholder Equity grew 5% over the period (retained profits accumulating on the balance sheet) — a larger equity base makes a given ROE % harder to sustain without proportionally larger profit growth.
- Average ROE across the 4 years shown was 33.3% — compare this to the Sector Comparison page to judge whether this is a structurally strong or weak return on capital for this industry.

KEY TAKEAWAY › ITC's ROE trend — the Sector Comparison page next shows whether this is strong or weak relative to real sector peers, not just relative to its own past.

WHAT THIS TABLE MEANS

Common-Size Statement (% of Revenue) (1/2)

What is this? A common-size statement restates every P&L line as a percentage of that year's Total Revenue instead of a raw Rupee figure. That makes it possible to compare cost and margin structure across years (or against a peer of a different size) on a level footing — e.g. if Net Income was 4.8% of revenue in FY23 and 6.1% in FY26, profitability improved even if you ignore the absolute Rupee numbers entirely.

KEY TAKEAWAY › EBITDA margin moved from 39.5% of revenue in FY2023 to 38.1% in FY2026 — the full year-by-year breakdown, including Total Debt, Equity and Cash Flow as a % of revenue, is on the next page.

FULL TABLE, EVERY LINE ITEM

Common-Size Statement (% of Revenue) (2/2)

% of Revenue	FY2023	FY2024	FY2025	FY2026
Net Income	27.3%	30.4%	46.5%	26.5%
EBITDA	39.5%	41.9%	38.7%	38.1%
Total Debt	0.4%	0.5%	0.4%	3.1%
Stockholders Equity	98.4%	110.6%	93.8%	92.7%
Total Assets	122.3%	136.3%	118.0%	119.9%
Operating Cash Flow	26.9%	25.5%	23.6%	23.6%

Shows how each line item has moved relative to revenue over time — a shrinking Net Income % of revenue, for instance, means margins are under pressure even if revenue itself is growing.

KEY TAKEAWAY › Total Debt moved from 0.4% of revenue to 3.1% over this period (+2.6 points) — cross-check this against the Leverage & Solvency page later in this section, which shows the same trend as a hard Debt-to-Equity ratio.

SECTION 4

Peer & Sector Benchmarking

- Sector Comparison
- Competitor Benchmark
- Peer Positioning Map
- Leverage & Solvency Ratios

STOCK VS. SECTOR AVERAGE, AT A GLANCE

Sector Comparison — Fast Moving Consumer Goods

KEY TAKEAWAY › ITC's P/E is 66% below its sector average — trading at a discount, which can mean overlooked value or a real, priced-in problem.

Note: the sector average shown is a current, point-in-time snapshot across sector peers — we do not fabricate a multi-year historic sector-average series, since our data source does not carry that history reliably enough to publish it as fact.

Competitor Benchmark

Company	P/E	P/B	ROE	Mkt Cap (Cr)
ITC (this stock)	16.6	4.6	28.5%	330,912
HINDUNILVR	43.7	9.5	30.9%	463,668
NESTLEIND	71.2	52.7	80.0%	271,989
VBL	40.6	6.3	15.5%	137,869
BRITANNIA	47.1	24.1	49.6%	122,879
MARICO	56.8	25.1	41.9%	105,658
UNITDSPR	61.8	11.7	20.5%	104,499

Compared against its largest sector peers within the Nifty 200 by market capitalisation (real figures from the same dataset, not estimates).

KEY TAKEAWAY › Among its 13 largest sector peers, COLPAL has the highest ROE (83.7%) vs ITC's 28.5% — worth understanding why before treating either figure in isolation.

VALUATION VS. QUALITY, AT A GLANCE

Peer Positioning Map

KEY TAKEAWAY › ITC sits in the quadrant that is cheap with below-average returns — cheap for a reason until proven otherwise, relative to the peer set shown above.

BALANCE-SHEET RISK, VISUALIZED

Leverage & Solvency Ratios

Debt-to-Equity above ~1x, or Debt-to-EBITDA above ~3x, generally signals a more leveraged balance sheet — worth weighing against the sector norm before drawing conclusions.

KEY TAKEAWAY › Debt-to-Equity of 0.03x is below the ~1x watch level — leverage looks manageable on this measure alone.

Note: Liquidity ratios (Current/Quick Ratio) and Efficiency ratios (Asset/Inventory Turnover, Receivables Days) are not shown — our data source doesn't include Current Assets, Current Liabilities, Inventory or Receivables figures, so we're not able to compute these honestly.

SECTION 5

Valuation, Risk & Outlook

- Valuation Detail
- Why This Verdict
- Analyst Perspectives — Bull vs. Bear
- Our Take
- What Would Change Our View
- 3-Year Trend-Based Forecast
- Risk Flags

HOW CLEARSTOCKS REACHED THIS VERDICT — METHODOLOGY

Valuation Detail

WHAT THIS DOES CAPTURE	WHAT THIS DOES NOT CAPTURE
• Whether the stock is priced richer or cheaper than same-sector peers right now • A repeatable, mechanical comparison — same rule applied to all 200 stocks	• Whether the premium is justified by superior growth, order book, or moat • The company's own valuation history — only today's peer snapshot

KEY TAKEAWAY › ITC is flagged **Cheap vs peers (P/E, -63%)** because its current multiple sits -66% vs peers — a data comparison, not a judgement on whether that premium is deserved.

INSIGHT SCORE METHODOLOGY

Why This Verdict

KEY TAKEAWAY › Strong profitability (ROE) trading below its sector's typical valuation. — a strong Insight Score combined with a valuation that's -66% vs peers is what mechanically produces this read; it is not a prediction of where the stock goes next.

Past patterns in fundamentals are not a guarantee of future results — this is a research signal, not investment advice.

THIRD-PARTY RESEARCH, PARAPHRASED & SOURCED

Analyst Perspectives — Bull vs. Bear

The views below are ClearStocks' own paraphrase of publicly reported brokerage/analyst commentary — not our own opinion, and not a reproduction of any single report. Each point is sourced.

THE BULL CASE	THE BEAR CASE
• Cigarette volumes grew ~4% YoY pre-tax-hike, the strongest in three years -- some analysts still see 3-5% volume growth plus 6-8% pricing as achievable even after the tax increase, given ITC's pricing power and distribution reach. • FMCG-Others crossed 8% EBITDA margin in Q3 FY26 for the first time at real scale, with brokerages modeling a path to 12-15% margins by FY28 as Aashirvaad, Sunfeast and Bingo mature.	• The Feb 2026 GST/excise hike is a structural, not cyclical, headwind -- Motilal Oswal's post-hike model cuts FY27 cigarette revenue by 15% and EBIT by 19%, and further MRP hikes risk pushing volumes toward the untaxed illicit market. • ITC carries a persistent valuation discount from global ESG-driven fund mandates that structurally exclude tobacco companies, regardless of the FMCG growth story underneath.

SCORECARD SYNTHESIS, NOT A BUY/SELL CALL

Our Take

INSIGHT SCORE	VALUATION	LEVERAGE (D/E)	ORDER BOOK
85/100	Cheap vs peers	0.03x	—

ITC in 2026 is really two stories stapled together: a cigarette business absorbing the single biggest tax shock in years, and an FMCG-Others business finally showing real margin progress after two decades of subsidized scale-building. The stock's ~32% fall this year is the market re-pricing the cigarette segment for a genuinely worse post-tax-hike earnings path (Motilal Oswal: -15% revenue, -19% EBIT in FY27 for cigarettes specifically), not a reaction to some one-off scandal or execution failure. Whether ITC is now cheap or still overpriced depends almost entirely on two things this deck can't resolve for you: how much of the ~35% MRP hike sticks with consumers without a meaningful shift to illicit cigarettes, and how fast FMCG-Others' margin gains scale into a large enough profit pool to matter at the whole-company level. This is a data snapshot, not a professional analyst's judgement call.

This is ClearStocks' own automated synthesis of the model output and the numbers above — not professional analyst commentary, and not investment advice.

SPECIFIC TRIGGERS, NOT A PREDICTION

What Would Change Our View (1/2)

WOULD MAKE US MORE POSITIVE	WOULD MAKE US MORE CAUTIOUS
• A sustained re-rating of the sector as a whole, independent of this company's own numbers.	• P/E re-rates further above the Fast Moving Consumer Goods sector average (48.4x) while ROE stays flat — that would mean the market is pricing in growth the numbers don't yet show. • Debt-to-Equity rises meaningfully above its current 0.03x — the balance sheet is a strength today, and that would erode it. • Net Income growth reverses and turns negative for two consecutive years — the current growth trend is doing a lot of the work in this verdict.

KEY TAKEAWAY › 1 trigger on each side above, all tied to numbers already shown elsewhere in this deck — the next page turns this into a simple quarterly re-check process.

HOW TO USE THIS PAGE EACH QUARTER

What Would Change Our View (2/2)

KEY TAKEAWAY › None of this is a prediction that any of these will happen — it's a checklist of exactly which numbers, from the sections already in this report, would change the read above if they moved. Re-check this deck against the next quarter's results using this page as the guide.

This is the one page in the deck designed to be reused, not just read once — bookmark it, and walk through both sides of the prior page's table every time ITC reports results.

3-Year Trend-Based Forecast

This is not a professional forecast or a DCF model. It's a simple, mechanical projection: we take the actual growth rate this company posted over its last 3 years of available data, and extend that same rate forward. Real results depend on far more than a straight-line extrapolation of the past.

Metric (Rs Cr)	FY2026 (actual)	FY2027E	FY2028E	FY2029E
Revenue	78,213	81,065	84,021	87,085
Net Income	20,689	21,214	21,752	22,304

4 MECHANICAL CHECKS RUN AGAINST THE NUMBERS ABOVE

Risk Flags

DEBT TREND	MARGIN TREND	FREE CASH FLOW	LEVERAGE
CLEAR Total Debt rising every year	CLEAR Net margin declining every year	CLEAR Most recent year negative	CLEAR Debt-to-Equity above 1.5x

KEY TAKEAWAY › All 4 mechanical checks come back clear — no rising-debt, declining-margin, negative-FCF or elevated-leverage pattern detected. This is not a full risk assessment; always verify independently.

EVERY NUMBER IN THIS DECK, TRACEABLE

Appendix — Raw Financial Data

Every figure used to build the tables, charts, ratios and forecast in this deck, exactly as recorded per fiscal year, converted to Rs Crore to match every other table above. Use this to verify any calculation independently.

Metric	2023-03-31	2024-03-31	2025-03-31	2026-03-31
Total Revenue (Rs Cr)	70,245	67,391	74,653	78,213
Net Income (Rs Cr)	19,192	20,459	34,747	20,689
EBIT (Rs Cr)	25,958	26,439	26,972	28,119
EBITDA (Rs Cr)	27,767	28,256	28,923	29,829
Total Debt (Rs Cr)	306	304	285	2,399
Stockholders Equity (Rs Cr)	69,155	74,507	70,030	72,507
Cash & Equivalents (Rs Cr)	463	626	620	643
Total Assets (Rs Cr)	85,883	91,826	88,091	93,792
Free Cash Flow (Rs Cr)	16,135	13,616	15,348	16,281
Operating Cash Flow (Rs Cr)	18,878	17,179	17,627	18,464
Capital Expenditure (Rs Cr)	-2,743	-3,563	-2,279	-2,183
ROE	27.75%	27.46%	49.62%	28.53%

Glossary & Methodology

P/E Ratio — Price-to-Earnings: share price divided by earnings per share. Roughly, how many years of current profit it would take to earn back today's price.

P/B Ratio — Price-to-Book: share price divided by book value (net worth) per share.

ROE — Return on Equity: Net Income divided by Stockholders Equity — how efficiently a company turns shareholder capital into profit.

EBITDA — Earnings Before Interest, Tax, Depreciation & Amortisation — a proxy for core operating profitability before financing and accounting effects.

Free Cash Flow — Operating Cash Flow minus Capital Expenditure — cash actually left over after running and maintaining the business.

Debt-to-Equity — Total Debt divided by Stockholders Equity — how much of the balance sheet is funded by borrowing vs. owners' capital.

Debt-to-EBITDA — Total Debt divided by EBITDA — roughly, how many years of operating profit it would take to pay off all debt.

CAGR — Compound Annual Growth Rate — the constant year-over-year growth rate that would take a starting value to an ending value over a given number of years.

Common-Size Statement — Every financial-statement line shown as a percentage of Total Revenue for that year, making it easy to compare structure across years regardless of company size.

Insight Score — ClearStocks' own 0-100 model output, estimating how a stock's fundamentals rank against its peers based on historical patterns.

Data & methodology, in brief: financial history comes from this project's own fundamentals pipeline, sourced from company financial statements. Sector and competitor figures are computed live from the same Nifty 200 dataset the website uses — every peer is a real company with real, current figures, never a synthetic average. The 3-year forecast is a compound-growth extrapolation of each company's own historical CAGR, not a DCF model. Not included: Liquidity/Efficiency ratios (the underlying balance-sheet line items aren't in this data source) — omitted rather than estimated.

Thank you.

This concludes the ClearStocks Company Deck for ITC — ITC Ltd..

ClearStocks · An independent, personal research project
